HEALTH CARE ADVOCATES FOR HB 3464

"Many Latinx children rely on these public health facilities for care ranging from nutrition programs to routine immunizations. The Latino Health Coalition strongly believes that we need to take steps to protect the privacy of Oregonians who use these critical services so that they feel safe caring for themselves and their children."

-Alberto Moreno, Oregon Latino Health Coalition, 6/8/2017

"As a nurse, I know that our communities are healthier when everyone has access to preventative care. When immigrants and their families are afraid to access care from public health facilities, they go without basic care like STD testing and routine immunizations. HB 3464 helps further protect patient privacy to ensure everyone in our community knows that they can access the care they need."

- Erin Shawn, FNP, ONA Cabinet on Health Policy Chair, 6/19/2017

"We must do everything we can to make sure that Oregonians are not afraid to access public health services that will improve their health. Nutrition programs such as WIC are important to ensure that pregnant woman and children are making healthy food choices."

-Morgan Cowling, Coalition of Local Health Officials, 6/19/2017

YES ON HB 3464
