

FAIRSHOT FOR ALL SUPPORTS HB 3391

Fair Shot for All is a united movement of more than 30 racial justice organizations, community groups and labor unions fighting together for racial, gender and economic justice. Our priorities tackle critical barriers to safety, health and security and continue our fight to secure a fair shot for every Oregonian. We are standing up for women, people of color, LGBTQ communities, immigrants and working families. Together, we are sending a message loud and clear: Every Oregonian needs real opportunity and a fair shot at a secure future.

The decision about whether and when to become a parent is one of the most important decisions that we all face, and it's a decision with important implications for our families, our economic security and our futures. That's why every Oregonian—regardless of income, citizenship status, gender identity or type of insurance—must have access to full reproductive healthcare coverage. We believe that HB 3391 will ensure that diverse and low-income communities do not fall through the cracks.

The **Reproductive Health Equity Act** ensures that Oregonians receive the full range of preventive reproductive health services at zero out-of-pocket cost; fills gaps in reproductive health coverage for those categorically excluded from health programs due to citizenship status; and prohibits discrimination in reproductive health care.

Helping Oregon families thrive. The economic security of women and families is directly tied to access to reproductive health care. Consistent access to the full range of services is critical to helping women and transgender people achieve their own educational, employment and financial goals. Our families thrive when every Oregonian has coverage for the care they need to make decisions about their health.

Creating a healthier Oregon. Healthy communities begin with healthy bodies. Early detection and treatment can help prevent serious, lifelong health problems. If an Oregonian has access to affordable reproductive health care, they are more likely to seek care for treatable problems like an STD or a lump in their breast.

Building a stronger economy. Access to quality, affordable reproductive health care is a critical component to strong economic growth. Oregonians are more productive in the workplace when they can access the care they need. Prevention also reduces healthcare costs, making our economy healthier.
