

HB 3289 A STAFF MEASURE SUMMARY

Carrier: Rep. Whisnant

House Committee On Higher Education and Workforce Development

Action Date: 04/11/17

Action: Do pass with amendments and rescind subsequent referral to Ways and Means. (Printed A-Eng.)

Vote: 9-0-0-0

Yeas: 9 - Alonso Leon, Bynum, Clem, Heard, Johnson, Reardon, Reschke, Sollman, Whisnant

Fiscal: Has minimal fiscal impact

Revenue: No revenue impact

Prepared By: Laura Kentnesse, LPRO Analyst

WHAT THE MEASURE DOES:

Requires Higher Education Coordinating Commission to submit annual report to interim committees of the legislature that describes progress made in providing competency-based education in public post-secondary institutions of education in Oregon. Requires report to describe effectiveness of expanding competency-based education in public post-secondary institutions and of granting post-secondary degrees on basis of competency-based education, identify issues and barriers, including post-secondary accreditation standards, that present challenges to implementing or expanding competency-based education programs, analyze competency-based education models and determine which models have been successful and recommend specific policy changes and initiatives that public post-secondary institutions may implement to expand competency-based education.

ISSUES DISCUSSED:

- Value of individualized, student-centered education using innovative technology
- Value of education that measures student knowledge rather than time investment
- Lack of clarity about how public post-secondary institutions are currently implementing competency-based principles
- Requiring report does not diminish importance of exploring competency-based education models in Oregon

EFFECT OF AMENDMENT:

Replaces measure.

BACKGROUND:

Competency-based education describes learning progressions and student advancement that is proficiency-based or mastery-based, rather than based on the passage of time. Many states have been exploring competency-based learning in recent years, with task forces, studies and pilot programs as common mechanisms to investigate policy opportunities. The National Conference of State Legislatures (NCSL) and the Education Commission of the States (ECS) report that benefits of competency-based education include an emphasis on student knowledge, skill acquisition and innovative student-centered learning systems. In addition, NCSL and ECS identify challenges such as selecting subjects that align well with competency-based education, developing student assessments and modifying K-12 funding systems to support a proficiency-based model.
