 45 resources.

1 (3) The department shall conduct and maintain a continuous inventory of each state
2 agency's current and planned investments in information technology, a compilation of in-
3 formation about the current and planned investments and the total life cycle cost of the
4 current and planned investments. Each state agency shall cooperate with the department in
5 conducting and maintaining the inventory. The State Chief Information Officer shall develop
6 and implement state government-wide rules, policies and standards for conducting and
7 maintaining the required inventory and for managing the state government-wide information
8 technology portfolio. State agencies shall participate in the department's information tech-
9 nology portfolio-based management program and shall comply with the rules, policies and
10 standards that the State Chief Information Officer establishes under this subsection. The
11 provisions of this subsection do not relieve any state agency from accountability for equip-
12 ment, materials, supplies and tangible and intangible personal property under the state
13 agency's control.

14 (4) The department shall ensure that state agencies implement portfolio-based manage-
15 ment of information technology resources in accordance with this section and with rules,
16 policies and standards that the State Chief Information Officer adopts.

17 (5) Before adopting rules to implement the provisions of this section, the State Chief
18 Information Officer shall present the proposed rules to the Joint Legislative Committee on
19 Information Management and Technology.

20 (6) As used in this section, "state agency" has the meaning given that term in section 5
21 of this 2017 Act.

22 **SECTION 7.** (1) The purpose of enterprise information resources management is to cre-
23 ate a plan and implement a state government-wide approach for managing distributed infor-

27 (2) With input and recommendations from state agencies, the State Chief Information
28 Officer each biennium shall adopt an Enterprise Information Resources Management Strat-
29 egy in accordance with section 4 of this 2017 Act. The Enterprise Information Resources
30 Management Strategy must, among other functions, enable the Department of Information
31 Technology to manage and oversee distributed information technology assets throughout
32 state government. The Enterprise Information Resources Management Strategy must pre-
33 scribe the state government-wide infrastructure and services for managing these assets. The
34 State Chief Information Officer shall submit the Enterprise Information Resources Manage-
35 ment Strategy to the Joint Legislative Committee on Information Management and Tech-
36 nology for review.

37 (3) Following review by the Joint Legislative Committee on Information Management and
38 Technology, the department shall ensure state agency implementation of the Enterprise In-

40 policies and standards along with budget, resource and management plans that are necessary
41 to implement the Enterprise Information Resources Management Strategy.

42 (4) State agencies shall participate in managing information technology assets in ac-

44 with the rules, policies and standards of the State Chief Information Officer.

45 (5) A state agency that implements an information technology initiative that the de-

1 department estimates will cost more than \$1 million shall implement the information technol-

3 develops, sets or adopts. The information technology initiative is subject to the department's
4 oversight, and the department may require the state agency to obtain approval to implement
5 the information technology initiative or may direct the state agency to stop or modify the
6 implementation, cancel or modify a procurement related to the information technology ini-
7 tiative, modify the scope of the information technology initiative or take another action be-
8 fore awarding a public contract. After a state agency executes a public contract related to
9 the information technology initiative, the State Chief Information Officer may direct the
10 state agency to take any action in accordance with the terms and conditions of the public
11 contract that the department deems necessary or advisable to administer and enforce the
12 public contract, including directing the state agency to suspend performance or terminate
13 the public contract in whole or in part.

14 **SECTION 8.** (1) The State Chief Information Officer has responsibility for and authority
15 over information systems security in the executive department, including responsibility for
16 taking all measures that are reasonably necessary to protect the availability, integrity or
17 confidentiality of information systems or the information stored in information systems. The
18 State Chief Information Officer shall, after consultation and collaborative development with
19 state agencies, establish a state information systems security plan and associated standards,
20 policies and procedures. The plan must align with and support the Enterprise Information
21 Resources Management Strategy described in section 3 of this 2017 Act.

22 (2) The Department of Information Technology may:

23 (a) Review and verify the security of information systems operated by or on behalf of
24 state agencies;

25 (b) Monitor state network traffic to identify and react to security threats; and

26 (c) Conduct vulnerability assessments of state agency information systems for the pur-

28 disruption or any other event that threatens the availability, integrity or confidentiality of
29 information systems or the information stored in information systems.

30 (3) The Department of Information Technology shall contract with qualified, independent
31 consultants for the purpose of conducting vulnerability assessments under subsection (2) of
32 this section.

33 (4) In collaboration with appropriate agencies, the State Chief Information Officer shall
34 develop and implement policies for responding to events that damage or threaten the avail-
35 ability, integrity or confidentiality of information systems or the information stored in in-
36 formation systems, whether those systems are within, interoperable with or outside the
37 state's shared computing and network infrastructure. In the policies, the State Chief Infor-
38 mation Officer shall prescribe actions reasonably necessary to:

39 (a) Promptly assemble and deploy in a coordinated manner the expertise, tools and
40 methodologies required to prevent or mitigate the damage caused or threatened by an event;

41 (b) Promptly alert other persons of the event and of the actions reasonably necessary to
42 prevent or mitigate the damage caused or threatened by the event;

43 (c) Implement forensic techniques and controls developed under subsection (5) of this
44 section;

45 (d) Evaluate the event for the purpose of possible improvements to the security of in-

1 formation systems; and

2 (e) Communicate and share information with appropriate agencies, using preexisting in-
3 cident response capabilities.

4 (5) After consultation and collaborative development with appropriate agencies, the De-
5 partment of Information Technology shall implement forensic techniques and controls for
6 the security of information systems, whether those systems are within, interoperable with
7 or outside the state's shared computing and network infrastructure. The techniques and
8 controls must include using specialized expertise, tools and methodologies to investigate
9 events that damage or threaten the availability, integrity or confidentiality of information
10 systems or the information stored in information systems. The Department of Information
11 Technology shall consult with the Oregon State Police, the Office of Emergency Manage-
12 ment, the Governor and others as necessary in developing forensic techniques and controls
13 under this section.

14 (6) The State Chief Information Officer shall ensure that reasonably appropriate remedial
15 actions are undertaken when the State Chief Information Officer finds that such actions are
16 reasonably necessary by reason of vulnerability assessments of information systems under
17 subsection (2) of this section, evaluation of events under subsection (4) of this section and
18 other evaluations and audits.

19 (7)(a) State agencies are responsible for securing computers, hardware, software, storage
20 media, networks, operational procedures and processes used in collecting, processing, stor-
21 ing, sharing or distributing information outside the state's shared computing and network
22 infrastructure, following information security standards, policies and procedures established
23 by the State Chief Information Officer and developed collaboratively with the state agencies.
24 State agencies may establish plans, standards and measures that are more stringent than
25 the standards established by the State Chief Information Officer to address specific agency
26 needs if the plans, standards and measures do not contradict or contravene the state infor-
27 mation systems security plan. Independent agency security plans must be developed within
28 the framework of the state information systems security plan.

29 (b) A state agency shall report the results of any vulnerability assessment, evaluation
30 or audit conducted by the agency to the Department of Information Technology for the
31 purposes of consolidating statewide security reporting and, when appropriate, to prompt a
32 state incident response.

33 (8) This section does not apply to:

34 (a) Research and student computer systems used by or in conjunction with any public
35 university listed in ORS 352.002; and

2 confidentiality of information systems or the information stored in information systems.

3 (2) The Secretary of State, the State Treasurer and the Attorney General shall each es-

28 (C) Implement forensic techniques and controls developed under paragraph (e) of this
29 subsection;

30 (D) Evaluate the event for the purpose of possible improvements to the security of in-
31 formation systems; and

32 (E) Communicate and share information with agencies, using preexisting incident re-
33 sponse capabilities; and

34 (e) Describe and implement forensic techniques and controls for the security of infor-
35 mation systems, whether those systems are within, interoperable with or outside the state's
36 shared computing and network infrastructure, including the use of specialized expertise,
37 tools and methodologies, to investigate events that damage or threaten the availability, in-
38 tegrity or confidentiality of information systems or the information stored in information
39 systems.

40 (4) The Secretary of State, the State Treasurer and the Attorney General shall partic-

1 Technology may take steps reasonably necessary to condition, limit or preclude electronic
2 traffic or other vulnerabilities between information systems for which the Secretary of State,
3 the State Treasurer or the Attorney General has authority under subsection (1) of this sec-
4 tion and the information systems for which the State Chief Information Officer has authority
5 under section 8 (1) of this 2017 Act.

6 **SECTION 10.** (1) The State Information Technology Operating Fund is established in the

9 Interest earnings on the fund assets must be credited to the fund.

10 (2) The State Chief Information Officer shall deposit into the State Information Tech-
11 nology Operating Fund moneys for information resources, information systems, information
12 technology and telecommunications that are appropriated to the Department of Information
13 Technology and that are necessary for the department to provide the services and functions

28 the state contracting agency or public corporation otherwise believes that the preliminary
29 quality assurance services will enable the contracting agency or public corporation to im-
30 plement an information technology initiative successfully.

31 (2) A state contracting agency or public corporation may not artificially divide or frag-
32 ment an information technology initiative so as to avoid the application of this section.

33 (3) Notwithstanding any procurement authority that a state contracting agency or a
34 public corporation has that is not subject to the authority of the Director of the Oregon
35 Department of Administrative Services or the State Chief Information Officer under ORS

41 (4)(a) If a state contracting agency or a public corporation awards a contract for pre-

40 and other materials or whether the director **or the State Chief Information Officer** also disagrees
41 with the state contracting agency's stated need for advice or assistance from a contractor.
