

I don't understand why the senate wants to waste money referring th NPV to the ballot when this is ultimately a legislative power. It seems like S. Courtney and S. Burdock are apparently against this bill and wish to throw it into purgatory for years. Why can't they just let the Senate vote on allowing the NPV? What are the afraid of?

I support the National Popular Vote and I oppose SB1512 which refers it to the voters. I want the senate to proceed with the HB 2927 bill that the legislature has passed four times and does not refer it to the voters.
