

Our current electoral college system allows those living in the less densely populated areas to have a voice. Bypassing this system would eliminate the voice of many as the electoral college gives weight to smaller populated states like Oregon. The electoral college gives Oregonians a say rather than allowing larger populated states to dictate the outcome of elections. Voters in Oregon enjoy a 30.9% per capital electoral representation HIGHER THAN voters in New York in the electoral college system. That would be taken away with a popular vote.

Please vote no on SB 1512.
