

In regards of House Health Care bill HB 4135

Do not push this through for your sake and the sake of the people that will be harmed. Government shall not harm it's people.

This is not moving forward, take time to really think this trough, this isn't a good thing you would be doing. It not some thing humans do to one another, this is not the solution. Don't put money above everything else.

This is something so horrific it will stay with you until your last day, hour, minute of your life.

Human life is most precious and must be guarded at all cost.

I have a story to tell you that is related that I have only hold a hand full of the closest people. I would like to tell it to you. It will leave you speechless, I promise. I would be willing to tell you this true story because of seriousness of this bill and it's 2nd time trying to pass.

I know there is not a lot of time so I will make my self available anytime and any place to communicate with you.

Sincerely,

Joe LaVelle
