

Dear Comitee members,

Please oppose HB 4135. This ruling will effect many who can not speak for themselves. It will undoubtedly touch all of our lives in one form or another. I know it must take great courage to stand up for people when that vote would be costly both monetarily to the state and could, perhaps, also be in popularity with some groups of people. I, however, have great faith in you as strong leaders to honor people with conditions such as dementia. Please, spare us of the potential additional suffering this bill could bring our families. I believe you are the ones who have the power to protect the lives of our loved ones. I ask that you carefully weigh this matter and choose to oppose this bill.

Thank you for your consideration and time.

Gratefully,
Leah Young
