

Regarding HB 4001

As a member of the agricultural community and on behalf of the owners and employees of Bethel Heights Vineyard, I urge you to pass the Clean Energy Jobs bill, HB 4001. No one knows better than farmers the extreme urgency of our need to address climate change. It has become apparent that the federal government is unwilling to do anything about climate change but make it worse. This bill is perhaps not perfect, but at least it lets Oregon start doing something about it instead of just talking about it. We must start right now to cap carbon pollution and invest in our clean energy future.

Please make this investment in our future.

Thank you,

Patricia Dudley
