

Comments on Senate Bill 1549
From Chris Bouneff, Executive Director, NAMI Oregon
February 5, 2018
Senate Committee on Health Care

NAMI Oregon wishes to express its support for Senate Bill 1549, which would ensure that patients at the Oregon State Hospital retain their Medicaid coverage for up to 12 months following admission. This simple change in statute has the potential to improve the coordination of care as patients undergo treatment and are discharged to their home communities from OSH.

NAMI Oregon is pleased to support SB 1549, and we encourage the Committee to approve the legislation.
