

Why not attack the opioid problem which is causing more problems than firearms. We have enough regulations to control guns now, just implement those controls. Why not address the other major problems in Oregon like distracted driving, driving with out insurance, hit and run accidents. Why don't you all work on the high cost of prescription drugs and drug abuse. Oregon is the number one abuser of hydrocodone in the United States. We need more law enforcement people on the roads, fund the things we need rather than working on firearm control.
