

HB 4145 is an atrocity at best. It will do nothing to prevent any act of violence, only to obstruct law-abiding citizens of their constitutional rights when falsely accused by someone claiming to be a family member with a grudge against the individual. This is no more than a self-serving bill to repay those who donated so much to the political troffers and will make criminals of those who have done nothing wrong without the least bit of an effect on criminal activity. This bill is ill-advised and poorly conceived and only reflects the pure distain of this country's and state's constitutions with a total disregard of individual rights.
