## Senate Revenue Committee

Please do not allow the tax break that Trump and Congress passed be allowed to apply to Oregon taxes. The more moneyed classes do not deserve more tax breaks than the rest of us. Trickle down money has never worked. The money to the top causes income inequality which is not good for democracy. The money should be collected for needs in Oregon such as schools, PERS liability, underfunded departments and, lower college tuition. Since 2015 Oregon has given S-corporations, partnerships and limited liability companies a lower tax rate on their business income. This needs to end now. The state needs to take care of all its people.
