

ALCON,

This bill scares me. Until a person is convicted in front of a jury, there should be a presumption of innocence in our society. The burden of proof should NOT be on the defendant. This bill will expand the definition of "family member" to many who in no way can be considered family. They will now be able to request orders that prohibit law abiding citizens from owning firearms. The law will punish people who comply with stalking and restraining orders. These orders are often used to harass people and are often based on false allegations. The procedures to remove the right to possess firearms permanently shouldn't be able to be rubber stamped by an administrative procedure.

V/R,

Cory Cinquini
