**Subject:** HB 4029 input

To the House Committee on Agriculture and National Resources,

I am writing in opposition to HB 4029. This bill proposes to ban all bridges. I feel strongly that such an all-encompassing law should not be allowed.. This bill appears to be aimed at blocking a pedestrian and bike bridge in a particular location across the Deschutes River.

I believe that the proposal to build such a bridge should continue to be explored. And I believe that this bridge is a good idea. It allows access from the east side, the ever growing population center, to a vast trail system on the west side of the river. Driving for access to these trails can be reduced.

Please kill this bill.

Thank you,

Jerry Spetz
