

The reason the USA is the safest, most prosperous country on the planet, offering the highest levels of personal liberty and opportunity, is because of the US Constitution. It is foolish to sacrifice the rights that make our country the best place to live in the world, in exchange for a false sense of security. It is wrong to forfeit the 2nd amendment rights and confiscate the property of a citizen, who has not been convicted of a dangerous crime, in the name of prudence. In this country we are supposed to be innocent until proven guilty and free from unlawful seizure of our property. On the surface, it sounds like a good idea to seize the weapons of a person who is believed to be dangerous and placed under a restraining order. However, there is a big difference between "believed" and "convicted". Do not erode the US Constitution and the Bill of Rights... PROTECT THEM! Oppose HB 4145.

Respectfully,

Jacob Nelson
