

I am a family farmer in central oregon

If I have to retrofit existing equipment and semi trucks, it would fiancally ruin us. Right now we are barely paying for all the new price increases on insurance, freight health care fuel taxes ect. New equipment is not an option we buy 15 year old tractors, trucks combine, new combine runs 400,000, please vote against hb4003 My business and employees depend on a sensible decision. There is no way to make California incomes in Oregon.
