Oregon House Transportation Committee Members
Re: Support for HB 4092

Dear Oregon House Transportation Committee Members,

Lynx FBO Network is a fixed based operator based at the Aurora airport and we directly employ 11-16 Oregonians at even given time. We fuel and relocate most of the aircraft on the airport and 95% of the visiting customers and their aircraft. We also provide numerous other ancillary services such as rental car reservations, hotel accommodations, catering orders, plus many more. All of these tasks send based and visiting customers to all of our local establishments. We order our catering from Canby, Aurora, Wilsonville, and Tualatin. Our rental cars come from Canby, Tualatin, and Tigard. Our hotels that we book for our visitors are located in Wilsonville. Our transport drivers come from Portland. Those are some of the indirect jobs and municipalities that will continue to see growth from a longer safer runway at the Aurora State Airport. The much needed 1000 feet of runway, will make this airport safer, its businesses stable, and allows for dedicated companies like ours to ensure we can continue to employ great Oregonians. If I can answer any questions you may have, please reach out to me.

Sincerely,

Josh Lewis
