Greetings!

I am writing concerning my adamant Disapproval of a bridge ever going in on the Deshutes River in the Rimrock Trail area.

As a very frequent user of this area the overuse and displacement of what is left of this "natural" area would be devastating!

It is more than obvious that those pushing for the expansion of this area will never be happy with the "enough" we have and will keep pushing for more developed "natural" areas! We do have enough trail opportunities in this area! The difference I have seen in just the last 2 years alone that overuse has brought is heartbreaking!

Please assure that a bridge never be built in this area so that generations in the future will enjoy this area in as natural a state as possible!

Thank you!

Lenora James
