

My name is Bill Steele. I am owner and winemaker at Cowhorn Vineyard & Garden. We are a certified Biodynamic and Organic vineyard and farm. Besides wine we also produce almost 10,000 pounds of food annually, principally asparagus. We support the Clean Energy program as a solution to the climate change problems. This program will produce jobs for Oregonians and put our state at the forefront of Clean Energy.

Thank you for your consideration,

Bill Steele
