

Dear members of the House Committee on Energy and the Environment,

My personal story is one of severe asthma after a chemical exposure in the 1990's. I now know how it feels to struggle to breathe, and to suffer bone loss from the side effects of asthma medications. I am writing in support of HB 4002, to fund DEQ's Cleaner Air Oregon program. Please, make this a priority. Every citizen of this state deserves clean air.

Sincerely,
Patricia Armstrong
