

Dear House Committee on Energy and the Environment:

I am writing to urgently ask you to support HB 4002, which will finally allow Oregonians to have reasonable, health-based protections against toxic air pollutants. HB 4002 will provide the critical funding necessary to ensure the long-delayed implementation of a strong statewide air program under Cleaner Air Oregon.

Thank you very much for standing up for the health of Oregonians.

Yours Sincerely,

Daniel Jaffee
