

Hello,

Please know that I support HB 4002. I live in the “plume” of Bull’s Eye Glass in SE Portland. I was diagnosed with breast cancer at age 48. I do not have a family history of breast cancer and I do not have a (known) genetic risk. I believe environmental influences are to blame and I support HB 4002 to help mitigate these risks for others.

Respectfully submitted,
Kathy Hamm
