

Dear Members of the House Committee on Energy and the Environment:

I have been following the work of the Clean Air Oregon Initiative and am writing to ask you to support HB 4002. Adequate funding is crucial if our state is to make any real progress in protecting its residents from the most dangerous and often not well understood forms of pollution. Without the funding to understand pollution risks, continually monitor them and ensure adequate enforcement, the work of the Clean Air Oregon Initiative cannot go forward.

Sincerely,

Linda Nettekoven
