Dear legislators,

Oregon is experiencing more and more air quality issues putting communities at significant health risk. These risks are especially acute for children and the elderly. We need to fully fund air quality monitoring and we need to improve our air quality through more stringent air quality standards. I support HB4002 and SB1508. I oppose SB1541 as it is a step backwards. For the health and wellbeing of our communities we cannot afford to give industry a pass. I respectfully submit this testimony for your consideration.

Regards,

Liz Trojan
