

Please Stop HB 4092 In The House Transportation Policy Committee

Chair McLain:

I am a farmer and a resident in the Aurora area, writing to you and your Committee in Opposition to HB 4092. If you allow it to pass, it would set a very bad precedence for our land use system here in Oregon. The bill is destructive to Oregon's very valuable EFU land and the method through which the bill is looking to expand airport runways is wrong and short-circuits due process. It opens the door for corruption and the destruction of our agriculture and resource land base. To allow for this type of change on EFU land without going through the conditional use permit process or public input is just wrong. I am opposed to the change in EFU land definition that would allow the expansion to happen without public input, permits, and the appropriate environmental studies.

Please stop this end-run attempt on the Oregon Land Use System.
