Subject: Support for SB1508
Date: Monday, February 12, 2018 12:52:17 AM

I am writing to urge you to support, as I do, funding DEQ for a health-based air program to serve the quality of life Oregonians expect. Basing a program on the total amount of exposure and the potential toxicity of each pollutant gives Environmental Quality its true purpose. SB 1508 provides the funding needed. Please stand for the air quality required for our quality of life.

I do not support SB 1541 because its purpose is quite the opposite!

Thank you kindly,

Mary Ellen Andre
