Dear Senate Committee on Environment and Natural Resources:

I am writing to urgently ask you to oppose SB 1541, a bill developed with strong influence from industry lobbyists that would eviscerate the pollution control process under Cleaner Air Oregon. SB 1541 is a dangerous bill. It would weaken DEQ and tie critically needed DEQ funding to provisions that subvert the two-year public rule making process, strip the agency of its full authority to regulate, and set in statute less protective health standards for industry. This is a terrible bill which must be stopped. It is beyond disturbing that industry is working so hard to prevent Oregonians from finally being granted reasonable, long delayed health-based protections against toxic air pollutants..

I also urge you to support HB 4002/SB 1508, which will provide the critical funding necessary to ensure the implementation of a strong statewide air program under Cleaner Air Oregon.

Thank you very much for standing up for the health of Oregonians.

Yours Sincerely,

Daniel Jaffee
