Subject: Cleaner Air Oregon Now
Date: Sunday, February 11, 2018 9:47:57 PM

I moved to Oregon to live a healthier lifestyle, less-dependent on cars and for the clean, green environment. I have been floored by how much of Oregon's environmental health is haphazardly managed due to lack of funds and regulatory standards. We have a chance to fix the lax air quality standards NOW with Cleaner Air Oregon which was developed through a public, consensus based process with large participation from scientists and researchers. Help industry innovate by incentivizing cleaner air before its too late. We can not afford to continue to allow heavy pollution to threaten the health and safety of our communities.

Don't let industry and some misguided politicians write inadequate standards into statute. Stand by CAO and demand a better outcome so we all may breathe easier for years to come.
