Subject: Clean Energy Jobs bill
Date: Monday, February 05, 2018 9:03:01 PM

I wish to weigh in on the side of passing this very important legislation. Use of fossil fuels vs clean, renewable energy is not a partisan issue, nor will the solution wait.

The bill which puts fees on uses of fossil fuels, then uses same fees to support clean energy jobs is surely a win-win situation.

It is especially important that We the People forge ahead in light of the federal government's recalcitrance in implementing solutions.

Thank you.
