

Members of the committee:

I have found some interesting information that makes this bill very wrong.

On 12-1-2010 a study by U.C. Berkeley: Environmental Science and Technology.

Found no less than 29% of all air pollution in the L.A. and S.F. Bay area comes from China.

How much is here in Oregon. This will require a major study. Why penalize Oregonians for China's problem.

Next How much of the pollution is from the thousands of tons a day from MT. ST Helens.?

Next according to various plant articles. Manic Botanix / on line growing (as an example).

explains how CO2 enriches plant grow and health. So why do you want to limit this?

Next from school we were taught that plants , trees, etc. need CO2 and produce O2 .

So it seems this is just another ploy to control and lie and raise taxes.

So please VOTE NO on this ridiculous bill .

respectfully

Ritch Hanneman and family
