

I urge a NO vote on this bill.

There is plenty of credible evidence against man-made global warming, if you bother to seek information on the topic in a fair-minded manner. There is NOT a reason to totally disrupt our economic system for this reason.

For the progressives in power in Salem, it is, as it has always been, an excuse for government to control private business and receive HUGE tax windfalls from it. Government grows. Private industry is inhibited. People keep less of their own money. Personal freedom is reduced. All for no valid reason!

This is TERRIBLE for Oregon.

Please vote NO.
