Subject: No to HB 4091 State Banking
Date: Saturday, February 17, 2018 11:44:34 AM

No state banking to support the cannabis industry. Would the legislature create a special bank for the cigarette industry? Also, isn't it hypocrisy to make a big effort to curb smoking and yet bend over backwards for drug smokers? Yes it is. What health costs will this generate in the future? People need their lungs more than ever when they are old. If people want to pay to pollute their lungs, at least don't help them and pay for it.

Opening a state bank, especially to support the drug industry, is the wrong thing to do. It could be a whole can of worms with many unintended consequences and possibly put Oregon citizens on the hook for paying lawsuits related to that type of banking. Don't go near this idea.
