

Please do not allow this attack on civil liberties to become a law for this state. It is misdirected and will do much more harm than good. It's based on irrational emotion instead of fact and logic.

This is not about protecting anyone, it's about further restricting gun rights and, eventually all rights. We must end this guilty when accused and get back to guilty until proven innocent.

Please stand up for the Constitution and our God given rights and live up to your oath of office.

Thank you.
