

To The Committee,

I strongly urge you to stop this bill in the committee.

I agree that more focus needs to be made on mentally ill people with a death wish to harm others. But this can certainly be taken advantage of to harm innocent people by vengeful relatives, friends, etc.

Maybe you should add a tax to any purchase of violent music, video games, movies etc. I think that would go a lot further to changing behaviors in the long run.

If someone wants to harm someone they'll find a way to do it.

Chicago has the most strict gun laws and the highest rates of deaths. Your approach is not the answer and is a violation of our Constitutional rights.

Please stop this bill!

Thank You,
Carla Pletka
