

I am strongly opposed to bill **HB4138**.

This Bill would give the Oregon Department of State Lands the authority to request the Marine Board make new regulations in regard to erosion. While this bill may have been conceived with good intentions, its passage may give groups that aren't involved in boating too much power in regulating our waterways.

I hope you DO NOT support this bill. It's clear there is a great controversy with regard to it. There needs to be further discussion and research to both sides.

Please stop HB4099 and let the OSMB complete their rule making process. Creating new State laws is not necessary when there are existing processes and agencies in place to address such issues contained in the House Bills being brought to you by Representatives Bill Kennemer and Representative Rich Vial.

Thank you for your time.
