

I support HB 4138.

I received a message from Active Water Sports in Oregon City requesting I express opposition to this bill. When I read their reasoning, I could see they were ill-informed on the purpose of this bill OR, perhaps, they don't want to see any changes which they believe may detract from their boat sales.

This bill makes good sense. All government agencies should be able to work together to arrive at solutions which achieve the desired end result. If DSL sees a problem affecting their area of jurisdiction, they should be able to work with OSMB to remedy the problem.

I wish more local, state, and federal agencies would work together to arrive at needed and intelligent solutions.

Please support the passage of HB 4138.

Thank you,
