Subject: Possible Amendment to HB 4031A

To Chair Denbrow & Members of teh Senate Committee on the
Environment & Natural Resoures

We have been informed that an attempt may be made to amend the above Bill. As we understand it, this propose amendment would change the designation of the Lanphere property at I-5 & Exit 282B. Please oppose this attempt.

Any change in the designation of the Lanphere property which is included in the rural reserve belies the very name of the Committee because it is detrimental to the environment and in the long term destructive of one of our most precious natural resources--fertile farm land, a natural resource that in the long term is the only hope of preserving healthy life in this country and on this planet.

The voices of those who live in this area have already been heard once, when an application for a zoning change was overwhelmingly opposed by our area residents. There is nothing new to change our minds. Moreover, members of the Oregon Legislature should not be parties to attempt to circumvent "regular procedure," as Sen. McCain said, and act like the fools in Washington. The regular land use process must be followed, and members of the Committee should stand tall and not be parties to private subversion of

procedures designed to protect against this very kind of sneak attack that favors only one or a few private interests and disregards the views of the public.

This message is from the three registered voters at [7480 SW Bunker Post Ct., Wilsonville.](#)
