As a member of NE Portland, a youth advocate, and a transit dependent individual I would like express my support of the following sections of HB 2017 (2017) technical fix bill, HB 4059, -9 amendment. It essential to include this additional amendment to HB 2017 in order to ensure that there is specific language within HB 2017 that outlines pathways to best serve youth.

Student transportation access is essential. By taking this action, transportation agencies will just be investing in future riders. Funding should be used in additional to what transit agencies are already providing, and they should seek ways to make sure impacted individuals benefit most.

Sincerely,
Adrian Cato
