These are the last words of my mother in her end of life with dementia/alzheimer in a semi-comatose condition even while on morphine and lorazapam (sedative). She passed 3 weeks later @ 12:04a 5:30pm on Palm Sunday.

She spoke of the exact day of her passing. She was talking about the palm branches that one makes crosses out of. Her spirit is very much alive within her until the last Natural breath.

No one should decide to withhold food and water. They can still feel pain til the end.

Thank you, Karen Goodness/Silverton
