

Oregon's 100-Year Water Vision

Meta Loftsgaarden, Executive
Director, Oregon Watershed
Enhancement Board

Tom Byler, Director, Oregon
Water Resources Department

Integrated Water Resources Strategy

“Oregon’s 2017 Integrated Water Resources Strategy continues to chart a long-term course to meet the state’s instream and out-of-stream water needs. All Oregonians need water to thrive—it supports our economies, our renowned wildlife and nature, bountiful agriculture products, and healthy and livable communities”

Governor Kate Brown (IWRS Foreword, 2017)

Oregon’s **2017** Integrated Water Resources Strategy

Oregon's 2017 Integrated Water Resources Strategy

A framework for improving our understanding of Oregon's water resources and meeting our instream and out-of-stream needs, including water quantity, water quality, and ecosystem needs

(1) Understand Water Resources Today

Further Understand Limited Water Supplies & Systems
(groundwater, surface water, and their interaction)

Improve Water Quality &
Quantity Information

Further Understand Our
Water Management Institutions

Understanding Water Resources / Supplies / Institutions

- 1.A Conduct additional groundwater investigations
- 1.B Improve water resource data collection & monitoring
- 1.C Coordinate inter-agency data collection, processing, and use in decision-making

← OBJECTIVES →

← CRITICAL
ISSUES →

← RECOMMENDED
ACTIONS →

(2) Understand Instream and Out-of-Stream Needs

Further Define Out-of-Stream Needs / Demands
(i.e., diverted water)

Further Define Instream Needs / Demands
(i.e., left-in-place water)

Understanding Oregon's Out-of-Stream Needs/Demands

- 2.A Regularly update long-term water demand forecasts
- 2.B Improve water-use measurement & reporting
- 2.C Determine adjudicated water right claims
- 2.D Authorize the update of water right records with contact information
- 2.E Regularly update Oregon's water-related permitting guide

Understanding Oregon's Instream Needs/Demands

- 3.A Determine flows needed (quality & quantity) to support instream needs
- 3.B Determine needs of groundwater dependent ecosystems

(3) Understand the Coming Pressures That Affect Our Needs and Supplies

Economic Development

Water & Energy

Climate Change

Extreme Events

Population Growth

Water & Land Use

Water-Related Infrastructure

Education & Outreach

Water & Energy

- 4.A Analyze the effects on water from energy development projects & policies
- 4.B Take advantage of existing infrastructure to develop non-traditional hydroelectric power
- 4.C Promote strategies that increase/integrate energy & water savings

Climate Change

- 5.A Support continued basin-scale climate change research efforts
- 5.B Assist with climate change adaptation & resiliency strategies

Extreme Events

- 5.5A Plan and prepare for drought resiliency
- 5.5B Plan and prepare for flood events
- 5.5C Plan and prepare for a Cascadia subduction earthquake event

Economic Development & Population Growth
(See Actions 2A and 3A)

Water & Land Use

- 6.A Improve integration of water information into land use planning (and vice versa)
- 6.B Improve state agency coordination
- 6.C Encourage low-impact development practices and green infrastructure

Water-Related Infrastructure

- 7.A Develop and upgrade water and wastewater infrastructure
- 7.B Encourage regional (sub-basin) approaches to water and wastewater systems
- 7.C Ensure public safety/dam safety

Education and Outreach

- 8.A Support Oregon's K-12 environmental literacy plan
- 8.B Provide education and training for Oregon's next generation of water experts
- 8.C Promote community education and training opportunities
- 8.D Identify ongoing water-related research needs

← OBJECTIVES →

← CRITICAL
ISSUES →

← RECOMMENDED
ACTIONS →

(4) Meet Oregon's Instream and Out-of-Stream Needs

Place-Based Efforts

Water Management & Development

Healthy Ecosystems

Public Health

Funding

Place-Based Efforts

- 9.A Continue to undertake place-based integrated, water resources planning
- 9.B Coordinate implementation of existing natural resource plans
- 9.C Partner with federal agencies, tribes, and neighboring states in long-term water resources management

Water Management & Development

- 10.A Improve water-use efficiency and water conservation
- 10.B Improve access to built storage
- 10.C Encourage additional water reuse projects
- 10.D Reach environmental outcomes with non-regulatory alternatives
- 10.E Continue the water resources development program
- 10.F Provide an adequate presence in the field
- 10.G Strengthen water quantity & water quality permitting programs

Healthy Ecosystems

- 11.A Improve watershed health, resiliency, and capacity for natural storage
- 11.B Develop additional instream protections
- 11.C Prevent and eradicate invasive species
- 11.D Protect and restore instream habitat and habitat access for fish and wildlife
- 11.E Develop additional groundwater protections

Public Health

- 12.A Ensure the safety of Oregon's drinking water
- 12.B Reduce the use of and exposure to toxics and other pollutants
- 12.C Implement water quality pollution control plans

Funding

- 13.A Fund development and implementation of Oregon's IWR5
- 13.B Fund water resources management activities at state agencies
- 13.C Invest in local or regional water planning efforts
- 13.D Invest in feasibility studies for water resources projects
- 13.E Invest in implementation of water resources projects

Understand Water Resources Today

(1) Understand Water Resources Today

Further Understand Limited Water Supplies & Systems
(groundwater, surface water, and their interaction)

Improve Water Quality &
Quantity Information

Further Understand Our
Water Management Institutions

Understanding Water Resources / Supplies / Institutions

- 1.A Conduct additional groundwater investigations
- 1.B Improve water resource data collection & monitoring
- 1.C Coordinate inter-agency data collection, processing, and use in decision-making

← OBJECTIVES →

← CRITICAL
ISSUES →

← RECOMMENDED
ACTIONS →

Understand Instream and Out-of-Stream Needs

ACTIONS →

(4) Meet Oregon's Instream and Out-of-Stream Needs

Place-Based Efforts

Water Management & Development

Healthy Ecosystems

Public Health

Funding

Place-Based Efforts

- 9.A Continue to undertake place-based integrated, water resources planning
- 9.B Coordinate implementation of existing natural resource plans
- 9.C Partner with federal agencies, tribes, and neighboring states in long-term water resources management

Water Management & Development

- 10.A Improve water-use efficiency and water conservation
- 10.B Improve access to built storage
- 10.C Encourage additional water reuse projects
- 10.D Reach environmental outcomes with non-regulatory alternatives
- 10.E Continue the water resources development program
- 10.F Provide an adequate presence in the field
- 10.G Strengthen water quantity & water quality permitting programs

Healthy Ecosystems

- 11.A Improve watershed health, resiliency, and capacity for natural storage
- 11.B Develop additional instream protections
- 11.C Prevent and eradicate invasive species
- 11.D Protect and restore instream habitat and habitat access for fish and wildlife
- 11.E Develop additional groundwater protections

Public Health

- 12.A Ensure the safety of Oregon's drinking water
- 12.B Reduce the use of and exposure to toxics and other pollutants
- 12.C Implement water quality pollution control plans

Funding

- 13.A Fund development and implementation of Oregon's IWRS
- 13.B Fund water resources management activities at state agencies
- 13.C Invest in local or regional water planning efforts
- 13.D Invest in feasibility studies for water resources projects
- 13.E Invest in implementation of water resources projects

The background is a light blue and green illustration. It features a winding river in the center, with mountains in the distance. On the left, there are evergreen trees and a small house. On the right, there's a farm with a barn, a tractor, and a cow. In the foreground, there are stylized houses and buildings, suggesting a mix of rural and urban environments.

100-Year Water Vision

- Preparing a Secure, Safe and Resilient Water Future for All Oregonians
- Develop broad coalition to assess current status, evaluate need, develop funding and investment strategies for built and natural infrastructure
- Build on the Integrated Water Resources Strategy and other existing plans

Example IWRS Recommended actions (2017)

- Plan and prepare for drought resiliency, flood events, Cascadia
- Ensure public safety/dam safety
- Provide an adequate presence in the field
- Strengthen water quantity/quality permitting programs
- Develop additional groundwater protections
- Invest in local/regional water planning
- Invest in implementation of water resources projects

100-Year Vision Goals

Health: Secure, safe, accessible, and healthy water for current and future Oregonians.

Economy: Adequate and clean ground and surface water to support economic vitality for all Oregonians.

Environment: Adequate cool, clean water for native fish and wildlife to thrive, and healthy watersheds that can store and filter water naturally.

Safety: Resilient water supply and flood protection systems that can face natural hazards like earthquakes, floods and drought.

Draft Water Vision Problem Statements

Oregon's water infrastructure has served us well, but is showing its age.

We have underinvested in the new natural and built systems to meet the needs of a vibrant 21st century Oregon.

Draft Problem Statements

What's at Risk?

Built and natural water supply infrastructure & conservation tools to access adequate water

Built and natural waste water and water treatment infrastructure for cool, clean water

Built and natural stormwater infrastructure, levees and dams

What's the Result?

Lack of reliable access to water in emergencies and for healthy people, communities, food production, economy

Increased health risks for people, fish and wildlife

Reduced community safety, increased property damage, and economic hardship

What's Lacking?

Data about water and infrastructure

Capacity across all Oregon communities for planning, strategic investment and implementation

Coordinated built and natural water infrastructure investments

What's the Impact?

Reduced ability for strategic decision-making, cross-agency coordination, and ways to test new ideas

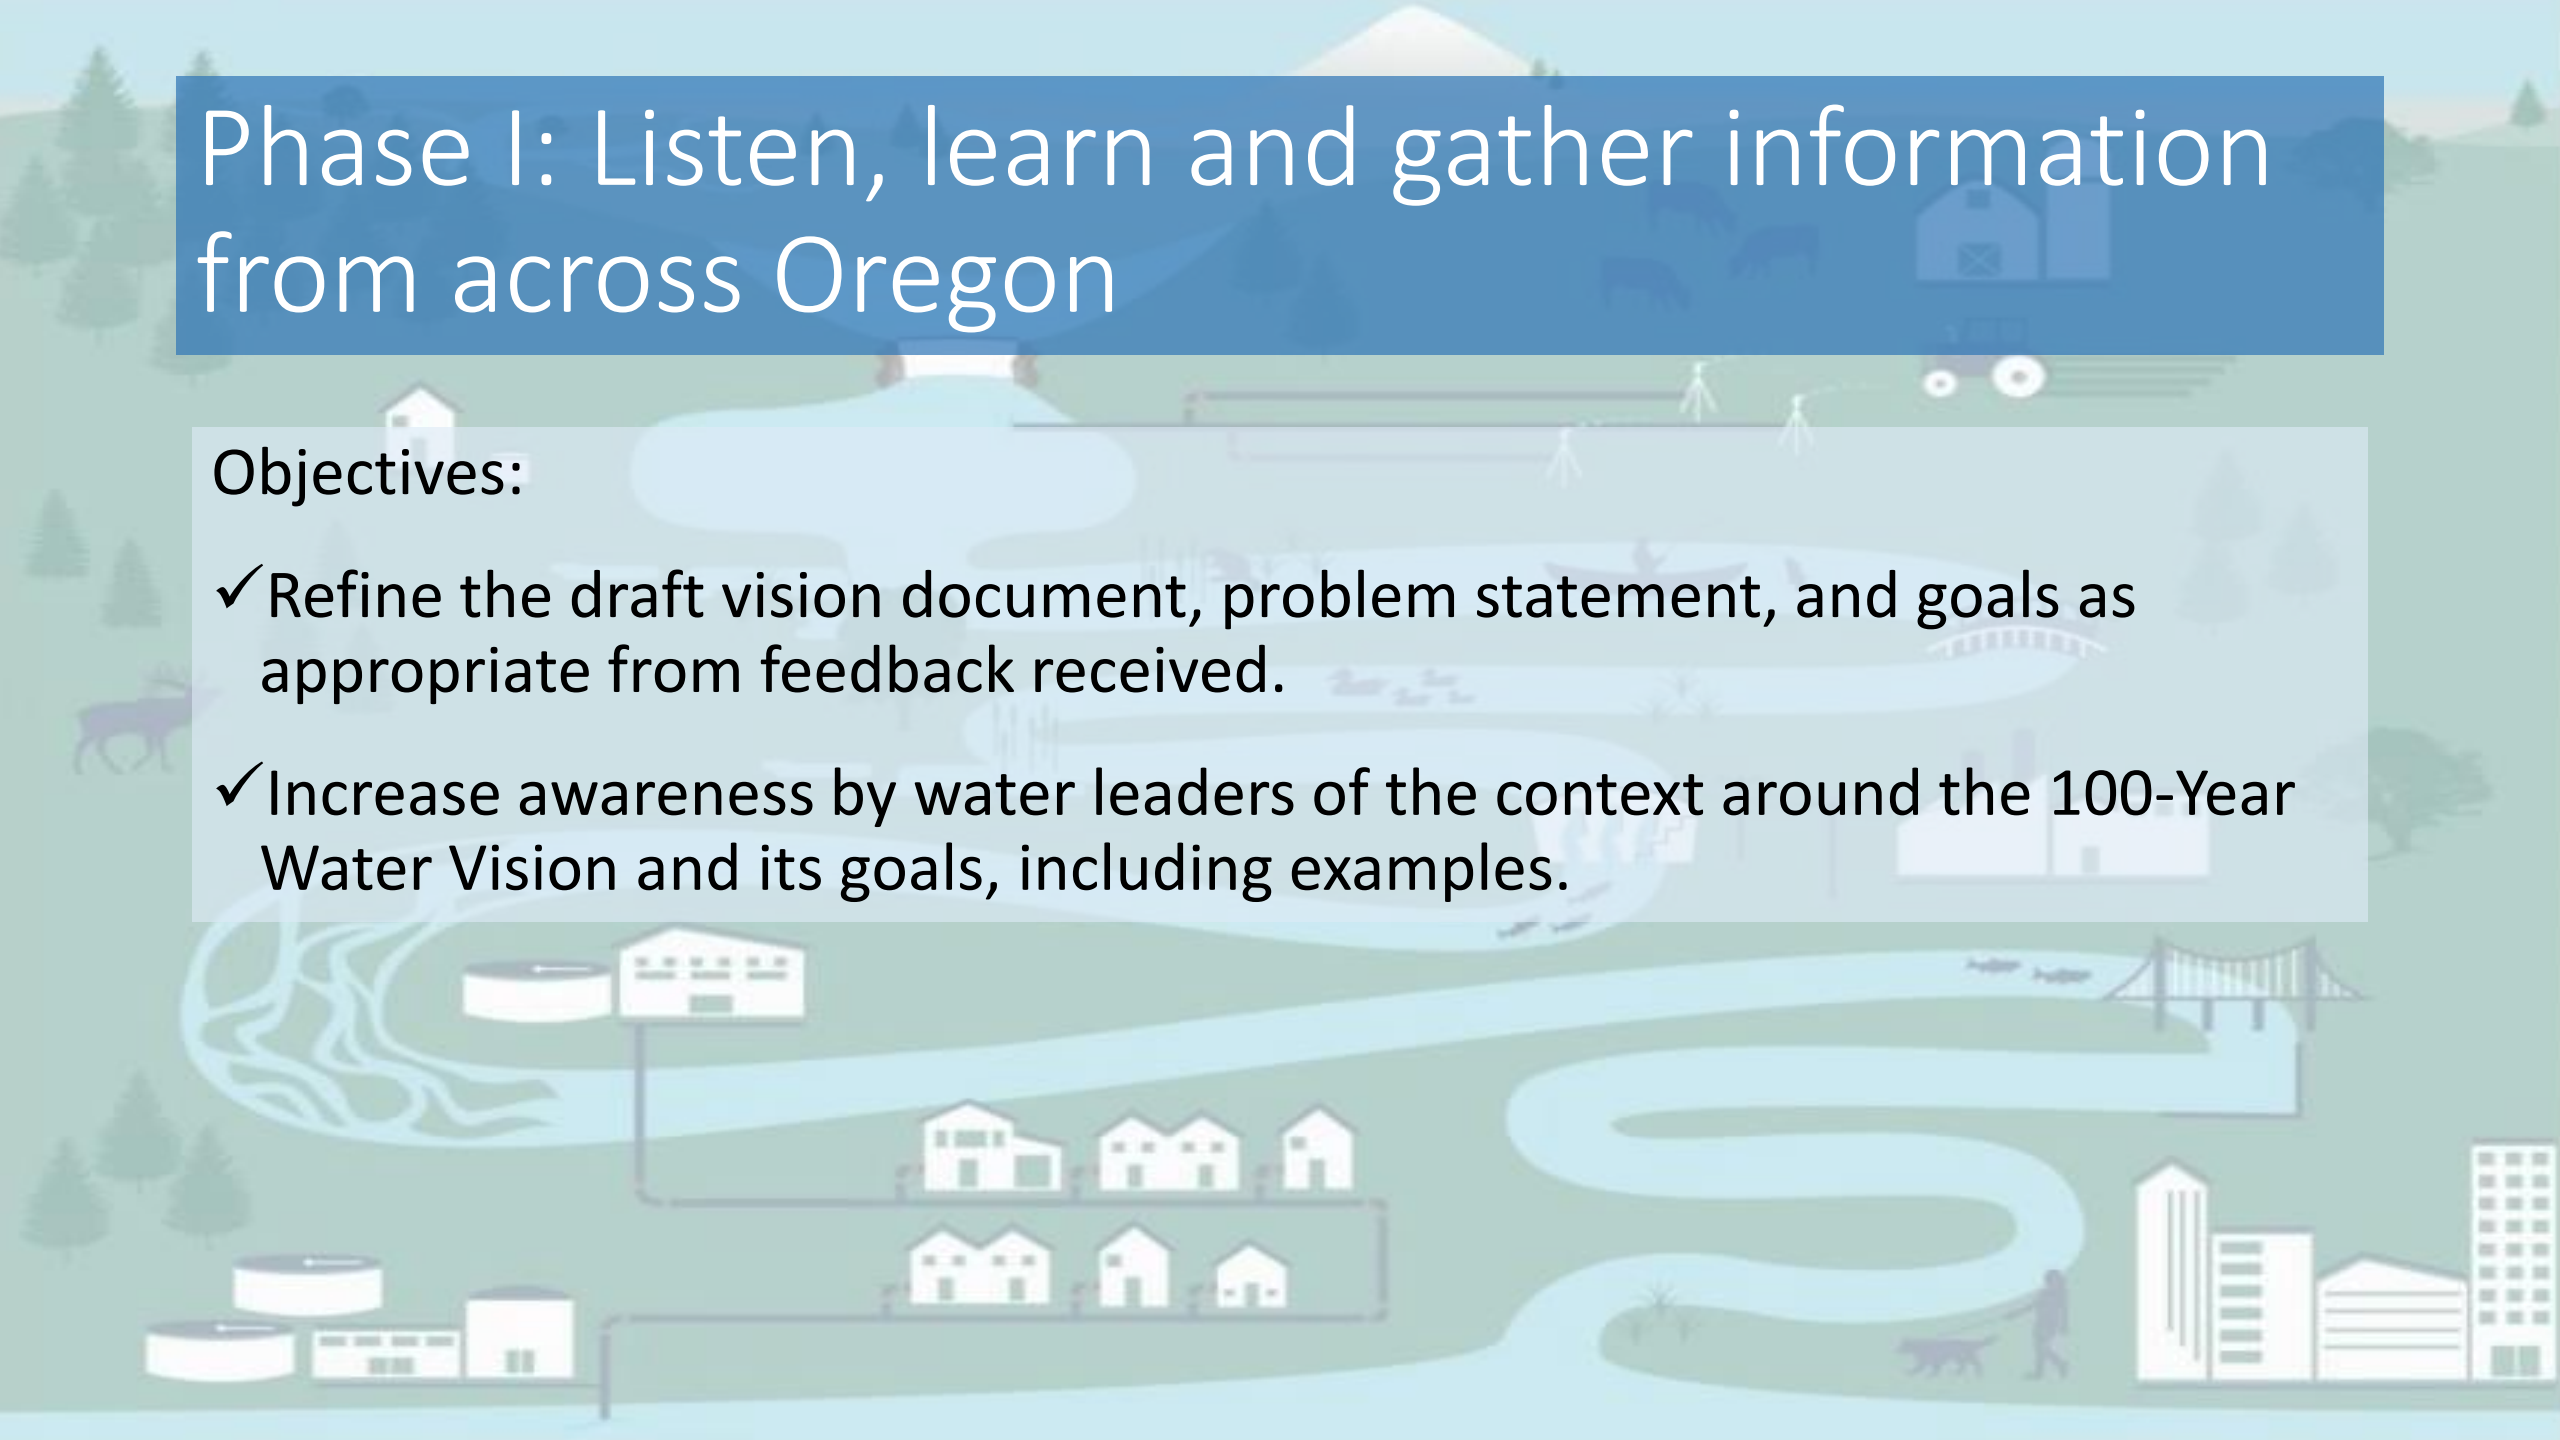

Missed opportunities to take advantage of large-scale funding and partnerships

Reduced ability for Oregonians – including disproportionately impacted and rural communities – to access adequate clean water and return it for downstream uses

Phase I: Listen, learn and gather information from across Oregon

Objectives:

- ✓ Refine the draft vision document, problem statement, and goals as appropriate from feedback received.
- ✓ Increase awareness by water leaders of the context around the 100-Year Water Vision and its goals, including examples.

Phase I: Listen, learn and gather information from across Oregon

Objectives:

- ✓ Building on the Integrated Water Resources Strategy (IWRS), increase understanding of available data and gaps in data related to current surface and groundwater condition, as well as built and natural water infrastructure conditions and needs.
- ✓ Building on the IWRS, increase identification of priority data needs for effective built and natural water infrastructure decision-making.
- ✓ Increase knowledge of current state and federal funding available for water system investments and funding gaps.

The background is a stylized, flat-design illustration of a landscape. It features a winding river in the center, with a small bridge crossing it. In the background, there are green hills and a large, light-colored mountain peak. To the left, there are several evergreen trees. In the foreground, there are various elements: a small house, a barn, a tractor, a canoe with a person, a person walking a dog, and several industrial buildings and storage tanks. The overall color palette is muted, with greens, blues, and earthy tones.

Phase I: Fall Actions

Interviews and Online Feedback

Water Academies

Technical Workshops

Presentations at organizational meetings, with boards and commissions, tribes and other partners

Website, Feedback, and Listserve

[More About the Vision](#) [Vision Problem Statement](#) [Get Involved](#) [Share Your Thoughts](#)

Our Shared Vision

To address changes in climate and population dynamics, Oregon will steward its water resources to ensure clean and abundant water for our people, our economy, and our environment, now and for future generations. Strategic investments will result in resilient natural and built water systems across the state to support safe and healthy communities, vibrant local economies, and a healthy environment.

Goals

Health

Secure, safe, accessible, and healthy water for current and future Oregonians.

Economy

Adequate and clean ground and surface water to support economic vitality for all Oregonians.

Environment

Adequate cool, clean water for native fish and wildlife to thrive, and healthy watersheds that can store and filter water naturally.

Safety

Resilient water supply and flood protection systems that can face natural hazards such as floods and drought.

Investing in Our Water Future

Many areas of Oregon are known for clean and reliable water. This is due to both favorable climate and the infrastructure we built in the 19th and 20th centuries to effectively move water from its source to where it is used. As has been identified in Oregon's Integrated Water Resources Strategy, 3 forces combine to place significant stress on Oregon's water:

1. Climate change and associated increases in fire, drought, and flooding;
2. A half century of underinvestment in built and natural water infrastructure; and
3. Our changing population and associated development – growing in some areas, shrinking in others.

These factors impact the quality and quantity of water for our communities, including water in our rivers, lakes, reservoirs, and aquifers. Simply put, if we are not willing to roll up our sleeves and work together to invest in our natural and built water systems, we place the safety of our communities, the health of our people and environment, and Oregon's economic future at risk.
