SUMMARY

Modifies statewide greenhouse gas emissions reduction goals.

Authorizes Public Utility Commission to allow rate or rate schedule to include differential rates or to reflect amounts for programs that enable public utilities to assist low-income residential customers. Authorizes commission to allow electric companies and natural gas utilities to recover costs for prudent investments in or expenses for infrastructure measures that support adoption of alternative forms of transportation.

Amends greenhouse gas reporting statute.

Repeals Energy Facility Siting Council carbon dioxide emissions standards.

Requires Environmental Quality Commission to adopt by rule standards and requirements for reducing methane emissions from landfills.

Requires Environmental Quality Commission to regulate use of hydrofluorocarbons in certain products.

Abolishes Oregon Global Warming Commission.

Modifies requirements for ethanol content in gasoline.

Prohibits sale or offer for sale of general service lamps that do not meet certain efficiency standards. Authorizes State Department of Energy to modify prohibition by rule to align with laws of adjacent states.

Provides for direct, expedited judicial review by Oregon Supreme Court of certain constitutional questions related to Oregon Greenhouse Gas Initiative.

Requires certain reports and reviews related to Oregon Greenhouse Gas Initiative.

Declares emergency, effective on passage.

NOTE: Matter in boldfaced type in an amended section is new; matter [italic and bracketed] is existing law to be omitted. New sections are in boldfaced type.
A BILL FOR AN ACT
Relating to greenhouse gas emissions; creating new provisions; amending ORS 244.050, 352.823, 468.015, 468A.205, 468A.265, 468A.279, 468A.280, 469.300, 469.310, 469.373, 469.405, 469.407, 469.501, 469.503, 469.504, 469.505, 646.913, 757.259 and 757.528 and section 12, chapter 751, Oregon Laws 2009, and sections 75 and 76, chapter 750, Oregon Laws 2017; repealing ORS 468A.200, 468A.210, 468A.215, 468A.220, 468A.225, 468A.230, 468A.235, 468A.240, 468A.245, 468A.250, 468A.255, 468A.260 and 469.409; and declaring an emergency.

Be It Enacted by the People of the State of Oregon:

STATEWIDE GREENHOUSE GAS EMISSIONS REDUCTION GOALS

SECTION 1. ORS 468A.205 is amended to read:
468A.205. (1) The Legislative Assembly declares that it is the [policy] goal of this state to achieve a reduction in anthropogenic greenhouse gas emissions levels in Oregon: [reduce greenhouse gas emissions in Oregon pursuant to the following greenhouse gas emissions reduction goals:]
[(a) By 2010, arrest the growth of Oregon’s greenhouse gas emissions and begin to reduce greenhouse gas emissions.]
[(b) By 2020, achieve greenhouse gas levels that are 10 percent below 1990 levels.]
[(c) By 2050, achieve greenhouse gas levels that are at least 75 percent below 1990 levels.]
[(a) To at least 45 percent below 1990 emissions levels by 2035; and
(b) To at least 80 percent below 1990 emissions levels by 2050.]
(2) The Legislative Assembly declares that it is the policy of this state for state and local governments, businesses, nonprofit organizations and individual residents to prepare for the effects of [global warming] climate change and by doing so, prevent and reduce the social, economic and envi-
environmental effects of \[global warming\] climate change.

(3) This section does not create any additional regulatory authority for an agency of the executive department as defined in ORS 174.112.

**OREGON GREENHOUSE GAS INITIATIVE**

(Statement of Purpose)

**SECTION 2.** (1) The Legislative Assembly finds and declares that the purposes of sections 2, 4 to 32, 33 to 37, 38 to 40, 41, 42, 43 and 45 to 53 of this 2020 Act are:

(a) To achieve a reduction in total levels of regulated emissions under sections 4 to 32 of this 2020 Act to at least 45 percent below 1990 emissions levels by 2035 and to achieve a reduction in total regulated emissions levels to at least 80 percent below 1990 emissions levels by 2050;

(b) To promote greenhouse gas emissions sequestration and mitigation;

(c) To promote the adaptation and resilience of natural and working lands, fish and wildlife resources, communities, the economy and this state’s infrastructure in the face of climate change and ocean acidification; and

(d) To provide assistance to households, businesses and workers impacted by climate change or by climate change policies.

(2) Sections 2, 4 to 32, 33 to 37, 38 to 40, 41, 42, 43 and 45 to 53 of this 2020 Act and the rules adopted pursuant to sections 2, 4 to 32, 33 to 37, 38 to 40, 41, 42, 43 and 45 to 53 of this 2020 Act may not be interpreted to limit the authority of any state agency to adopt and implement measures to reduce greenhouse gas emissions.

(Chapter Placement)
SECTION 3. (1) Sections 2 and 4 to 32 of this 2020 Act are added to and made a part of ORS chapter 468A.

(2) Section 97 to 100 and 102 to 105 of this 2020 Act are added to and made a part of ORS chapter 468.

(General Regulatory Provisions)

SECTION 4. Definitions. As used in sections 2 and 4 to 32 of this 2020 Act:

(1) “Aggregation” means an approach for qualifying and quantifying offset projects, for the purposes of reducing costs and increasing the development of offset projects, that allows for the grouping together of two or more geographically separate activities:

(a) Undertaken by one or more parties; and

(b) That result in reductions or removals of greenhouse gases in a similar manner.

(2) “Allowance” means a fungible authorization to emit one metric ton of carbon dioxide equivalent.

(3) “Annual allowance budget” means the number of allowances available to be allocated during one year of the Oregon Greenhouse Gas Initiative.

(4) “Anthropogenic greenhouse gas emissions” means greenhouse gas emissions that are not biogenic emissions.

(5) “Best available science” means science that is reliable and unbiased and that involves the use of supporting studies conducted in accordance with sound and objective science practices, including, when available, peer-reviewed science and supporting studies and data collected by accepted methods or best available methods.

(6) “Biogenic emissions” means carbon dioxide emissions generated from the combustion of biomass-derived fuels.

(7) “Biomass-derived fuels” includes:
(a) Nonfossilized and biodegradable organic material originating from plants, animals or microorganisms;
(b) Products, by-products, residues or waste from agriculture, forestry or related industries; and
(c) The nonfossilized and biodegradable organic fractions of industrial and municipal wastes, including gases and liquids recovered from:
   (A) The decomposition of nonfossilized and biodegradable organic material originating from plants, animals or microorganisms; or
   (B) Municipal solid waste disposed of in a landfill.

(8)(a) “Business unit” means a business operation that is located at a facility permitted as a single air contamination source under ORS 468.065, 468A.040 or 468A.155, but that is distinguishable from one or more other business operations located at the facility by:
   (A) The short title and six-digit code in the 2017 North American Industry Classification System applicable to the business operation;
   (B) Accounting practices for the business operation that maintain the finances for the business operation as distinct from the finances of other business operations located at the facility; and
   (C) The capability of the business operation to operate separately and independently of other business operations at the facility if not colocated with the other business operations.
(b) “Business unit” does not mean a cogeneration facility.

(9) “Carbon dioxide equivalent” means the amount of carbon dioxide by weight that would produce the same global warming impact as a given weight of another greenhouse gas, based on considerations including but not limited to the best available science, including information from the Intergovernmental Panel on Climate Change.

(10) “Compliance instrument” means one allowance or one offset credit that may be used to fulfill a compliance obligation.
(11) “Compliance obligation” means the quantity of regulated emissions that are attributable to a covered entity, and for which
compliance instruments must be retired, for a compliance period.

(12) “Consumer-owned utility” has the meaning given that term in ORS 757.270.

(13) “Covered entity” means a person that is designated by the Office of Greenhouse Gas Regulation as subject to the Oregon Greenhouse Gas Initiative.

(14) “Direct environmental benefits in this state” means:

(a) A reduction in or avoidance of emissions of any air contaminant in this state other than a greenhouse gas;

(b) A reduction in or avoidance of pollution of any of the waters of the state, as the terms “pollution” and “the waters of the state” are defined in ORS 468B.005; or

(c) An improvement in the health of natural and working lands in this state.

(15) “EITE entity” means a covered entity that is engaged in the manufacture of goods through one or more emissions-intensive, trade-exposed processes, as further designated by the office pursuant to section 19 of this 2020 Act.

(16) “Electric company” has the meaning given that term in ORS 757.600.

(17) “Electricity service supplier” has the meaning given that term in ORS 757.600.

(18) “Electric system manager” includes any entity that, as needed, operates or markets electricity generating facilities, or purchases wholesale electricity, to manage the load for wholesale or retail electricity customers within a balancing authority area that is at least partially located in Oregon, including but not limited to the following types of entities:

(a) Electric companies.

(b) Electricity service suppliers.

(c) Consumer-owned utilities.
(d) The Bonneville Power Administration.

(e) Electric generation and transmission cooperatives.

(19) “Eligible Indian tribe” means each of the Burns Paiute Tribe, the Confederated Tribes of Coos, Lower Umpqua and Siuslaw Indians, the Confederated Tribes of the Grand Ronde Community of Oregon, the Confederated Tribes of Siletz Indians of Oregon, the Confederated Tribes of the Umatilla Indian Reservation, the Confederated Tribes of the Warm Springs Reservation of Oregon, the Coquille Indian Tribe, the Cow Creek Band of Umpqua Tribe of Indians and the Klamath Tribes.

(20) “General market participant” means a person that is not a covered entity and that intends to purchase, hold, sell or voluntarily surrender compliance instruments.

(21) “Greenhouse gas” includes, but is not limited to, carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons, sulfur hexafluoride and nitrogen trifluoride.

(22) “Impacted community” means a community at risk of being disproportionately impacted by climate change as designated by the Oregon Greenhouse Gas Reduction Board under section 103 of this 2020 Act.

(23) “Indian trust lands” means lands within this state held in trust by the United States for the benefit of an eligible Indian tribe or individual members of an eligible Indian tribe.

(24) “Multistate jurisdictional electric company” means an electric company that serves electricity customers in both Oregon and one or more other states.

(25) “Natural and working lands” means:

(a) Lands and waters:

(A) Actively used by an agricultural owner or operator for an agricultural operation that includes, but need not be limited to, active engagement in farming or ranching;
(B) Producing forest products;

(C) Consisting of forests, woodlands, grasslands, sagebrush steppes, deserts, freshwater and riparian systems, wetlands, coastal and estuarine areas, the submerged and submersible lands within Oregon’s territorial sea, watersheds, wildlands or wildlife habitats; or

(D) Used for recreational purposes such as parks, urban and community forests, trails, greenbelts and other similar open space land; and

(b) Lands and waters described in paragraph (a) of this subsection that are Indian trust lands or lands within the boundaries of the reservation of an eligible Indian tribe.

(26) “Natural gas supplier” means any entity that is not a natural gas utility and that:

(a) Procures natural gas for end use in this state; or

(b) Owns natural gas as it is imported into this state for end use in this state.

(27) “Natural gas utility” means a natural gas utility regulated by the Public Utility Commission under ORS chapter 757.

(28) “Offset credit” means a fungible credit generated by an offset project that represents a greenhouse gas emissions reduction or removal of one metric ton of carbon dioxide equivalent.

(29) “Offset project” means a project that reduces or removes greenhouse gas emissions that are not regulated emissions.

(30) “Oregon Greenhouse Gas Initiative” means the program adopted by rule by the Oregon Greenhouse Gas Reduction Board under section 5 of this 2020 Act and in accordance with the provisions of sections 4 to 32 of this 2020 Act.

(31) “Permitted air contamination source” means an air contamination source as defined in ORS 468A.005 for which a permit is issued by the Department of Environmental Quality pursuant to ORS 468.065, 468A.040 or 468A.155.
(32) “Registered entity” means a covered entity or general market participant that has successfully registered to participate in the Oregon Greenhouse Gas Initiative.

(33) “Regulated emissions” means the verified anthropogenic greenhouse gas emissions reported by or assigned to a covered entity under ORS 468A.280 that the office determines are anthropogenic greenhouse gas emissions regulated under sections 4 to 32 of this 2020 Act.

(34) “Surrender” means to transfer a compliance instrument to the office to fulfill a compliance obligation or on a voluntary basis.

(35) “Trade-exposed natural gas user” means a person that is engaged in processes for which the indirect costs of compliance with the Oregon Greenhouse Gas Initiative may create a substantial risk of leakage, as further designated by the office pursuant to section 18 of this 2020 Act.

SECTION 5. General provisions; designation of covered entities.

(1)(a) The Oregon Greenhouse Gas Reduction Board shall, in accordance with ORS chapter 183, adopt rules necessary for the Office of Greenhouse Gas Regulation to implement the Oregon Greenhouse Gas Initiative established under sections 4 to 32 of this 2020 Act. The rules shall:

(A) Place a limit on the total anthropogenic greenhouse gas emissions that are regulated emissions by setting annual allowance budgets for 2022 to 2050; and

(B) Provide a system for covered entities to buy and sell allowances and offset credits used to demonstrate compliance with the covered entities’ compliance obligations.

(b)(A) The annual allowance budget for 2022 shall be a number of allowances equal to baseline emissions as calculated under paragraph (c) of this subsection.

(B) In 2023 and each following calendar year before 2036, the number
of allowances available in each annual allowance budget shall decline by a constant amount necessary to accomplish a reduction in total regulated emissions levels to at least 45 percent below 1990 emissions levels by 2035.

(C) In 2036 and in each following calendar year before 2051, the number of allowances available in each annual allowance budget shall decline by a constant amount necessary to accomplish a reduction in total regulated emissions levels to at least 80 percent below 1990 emissions levels by 2050.

(c) The office shall calculate baseline emissions to be equal to a forecast of regulated emissions for 2022, informed by the three-year average of the total, expressed in metric tons of carbon dioxide equivalent, of anthropogenic greenhouse gas emissions attributable to all persons that the office designates to be covered entities under the Oregon Greenhouse Gas Initiative. In calculating baseline emissions, the office shall use greenhouse gas emissions information from the three most recent years prior to 2022 for which greenhouse gas emissions information is available and confirmed by the office. The office shall exclude from the calculation of baseline emissions those greenhouse gas emissions during the three most recent years prior to 2022 that would not have been regulated emissions if the Oregon Greenhouse Gas Initiative had been in effect during the time that the greenhouse gas emissions occurred.

(2) Subject to section 6 of this 2020 Act, the office shall designate persons as covered entities as follows:

(a) The office shall designate an electric system manager as a covered entity for the purpose of addressing annual regulated emissions from outside this state that are attributable to the generation of electricity that the electric system manager schedules for delivery and consumption in this state, including wholesale market purchases for which the energy source for the electricity is not known, and ac-
counting for transmission and distribution line losses. For the purposes of this paragraph, the board may adopt rules necessary to address electricity scheduled for delivery and consumption in this state through an energy imbalance market or other centralized market administered by a market operator.

(b) The office shall designate a natural gas supplier as a covered entity for the purpose of addressing annual regulated emissions that are attributable to the combustion of natural gas that is:

(A) Sold by the natural gas supplier for use in this state;

(B) Distributed on a local distribution system operated by a natural gas utility; and

(C) Directly consumed or resold for use in this state by the customer of the natural gas supplier.

(c) The office shall designate a natural gas utility as a covered entity for the purpose of addressing annual regulated emissions that are attributable to the combustion of natural gas that the natural gas utility imports, sells or distributes for use in this state and that are not emissions accounted for through the regulation of natural gas suppliers under paragraph (b) of this subsection.

(d) The office shall designate as covered entities persons that produce in Oregon, or import into Oregon, liquid or gaseous fuel other than natural gas that is sold or distributed for use in this state, as necessary to address annual regulated emissions that are attributable to the combustion of the fuel.

(e) Except as provided in paragraph (f) of this subsection, the office shall designate a permitted air contamination source as a covered entity if the annual regulated emissions attributable to the air contamination source meet or exceed 25,000 metric tons of carbon dioxide equivalent. For purposes of this paragraph, the annual regulated emissions attributable to the permitted air contamination source may not include anthropogenic greenhouse gas emissions accounted for
through the regulation of a person described in paragraph (b), (c) or (d) of this subsection.

(f) If a permitted air contamination source is a facility composed of two or more business units colocated with a cogeneration facility that generates energy utilized by the permitted air contamination source, the office shall designate the permitted air contamination source as a covered entity for each individual business unit with annual regulated emissions attributable to the business unit that meet or exceed 25,000 metric tons of carbon dioxide equivalent. A person designated as a covered entity under this paragraph shall be a covered entity only for addressing the annual regulated emissions attributable to the business units for which the person is designated as a covered entity. For the purposes of this paragraph, the office shall attribute to a business unit the annual regulated emissions from the cogeneration facility colocated with the business unit that are proportionate to the annual energy usage of the business unit.

(3) The board shall adopt rules for the system required by subsection (1) of this section that include, but need not be limited to:

(a) Rules allowing for the purchase, sale and exchange of compliance instruments;

(b) Rules allowing registered entities to bank and carry forward allowances;

(c) Rules prohibiting the borrowing of allowances from future compliance periods;

(d) Rules allowing general market participants to participate in the Oregon Greenhouse Gas Initiative; and

(e) Compliance periods, standards for calculating compliance obligations and procedures for covered entities to fulfill their compliance obligations.

(4) The office shall require a covered entity to surrender to the office the quantity of compliance instruments necessary to fulfill the
covered entity’s compliance obligation no later than the surrender date specified by the board by rule or order.

(5) For purposes of determining the compliance obligation for a covered entity that is an electric system manager, electricity scheduled by the electric system manager that is generated from a renewable energy resource, regardless of the disposition of the renewable energy certificate associated with the electricity, shall be considered to have the emissions attributes of the underlying renewable energy resource.

(6) In addition to any penalty provided by law, rules adopted by the board:

(a) Shall require a covered entity that fails to fulfill a compliance obligation to surrender to the office a number of compliance instruments that is in addition to the entity’s compliance obligation; and

(b) May establish a process for placing restrictions on the holding account of a registered entity determined to have engaged in a violation of a provision of sections 4 to 32 of this 2020 Act or rules adopted under sections 4 to 32 of this 2020 Act.

(7) A compliance instrument issued by the office does not constitute property or a property right for any purpose under state or local law, including taxation.

(8)(a) All covered entities and general market participants must register as registered entities to participate in the Oregon Greenhouse Gas Initiative.

(b) The board shall adopt by rule registration requirements and any additional requirements necessary for registered entities to participate in auctions administered pursuant to section 28 of this 2020 Act.

(9) In adopting rules pursuant to this section or any other rulemaking authority provided under sections 4 to 32 of this 2020 Act, the board shall endeavor to develop the rules in a manner that does not preclude participation by the State of Oregon in regional
greenhouse gas emissions reduction programs.

SECTION 6. Exclusions. (1) The Office of Greenhouse Gas Regulation shall exclude from regulated emissions under sections 4 to 32 of this 2020 Act:

(a) Greenhouse gas emissions from the combustion of fuel that is demonstrated to have been used as aviation fuel or as fuel in watercraft or railroad locomotives; and

(b) The emissions attributable to a landfill, as defined in ORS 459.005.

(2) For purposes of section 5 (2)(d) of this 2020 Act, the office may exempt from designation as a covered entity any person that imports in a calendar year less than a de minimis amount of gasoline or diesel fuel, in total, as determined by the Oregon Greenhouse Gas Reduction Board by rule. Gasoline and diesel fuel imported by persons that are related or share common ownership or control shall be aggregated in determining whether a person may be exempted under this subsection.

SECTION 7. Allocation of allowances, generally. (1) The Office of Greenhouse Gas Regulation shall allocate the allowances available in each annual allowance budget as follows:

(a) The office shall allocate a number of the allowances for deposit in an allowance price containment reserve. Allowances may be sold from the allowance price containment reserve under section 28 of this 2020 Act only to address any high costs of compliance instruments for covered entities.

(b) The office shall allocate for retirement a number of the allowances as necessary to meet statutory requirements for retirement of allowances under the Oregon Greenhouse Gas Initiative.

(c) The office shall allocate a number of the allowances for direct distribution at no cost to covered entities that are electric companies pursuant to rules adopted under section 14 of this 2020 Act.

(d) The office shall allocate a number of the allowances for direct
distribution at no cost to covered entities that are electric system
managers other than electric companies pursuant to section 15 of this
2020 Act.

(e) The office shall allocate a number of the allowances for deposit
in an electricity price containment reserve. Allowances may be di-
rectly distributed to regulated entities that are electric system man-
agers at no cost from the electricity price containment reserve only
when the distribution is necessary to protect customers from cost in-
creases associated with unexpected increases in regulated emissions
attributable to an electric system manager that are outside of the
control of the electric system manager, including but not limited to
unexpected increases in regulated emissions due to hydroelectric
power generation variability. The Oregon Greenhouse Gas Reduction
Board shall adopt rules for electric system managers to apply for di-
rect distribution at no cost of allowances from the electricity price
containment reserve. The rules shall prioritize distribution of allo-
ances from the electricity price containment reserve to electric system
managers that experience unexpected increases in regulated emissions
attributable to variation in hydroelectric power generation to serve the
load of electricity customers in Oregon.

(f) The office shall allocate a number of the allowances for direct
distribution at no cost to covered entities that are natural gas utilities
pursuant to section 17 of this 2020 Act.

(g) In order to mitigate leakage and pursuant to sections 19 and 20
of this 2020 Act, the office shall allocate a number of the allowances
for direct distribution at no cost to covered entities that are EITE
entities.

(h) The office shall allocate a number of the allowances for deposit
in an emissions-intensive, trade-exposed process reserve. Allowances
in the emissions-intensive, trade-exposed process reserve may be di-
rectly distributed at no cost only to:
(A) EITE entities pursuant to rules adopted under section 20 (8) of this 2020 Act; or

(B) An EITE entity designated as such pursuant to section 19 (2) of this 2020 Act.

(i) The office may allocate a number of the allowances for deposit in any other reserves or accounts that the board establishes by rule and as the office determines is necessary.

(j) The office shall allocate the allowances that are not otherwise allocated pursuant to paragraphs (a) to (i) of this subsection for deposit in an auction holding account for auction pursuant to section 28 of this 2020 Act. If allowances deposited in the auction holding account under this paragraph remain unsold after two or more consecutive auctions held pursuant to section 28 of this 2020 Act, the office may redistribute the unsold allowances to the allowance price containment reserve described in paragraph (a) of this subsection.

(2) The receipt by a covered entity of an allowance directly distributed by the office at no cost to the covered entity may not be subject to any local tax, fee, assessment or other charge and is exempt from taxation under ORS chapters 316, 317 and 318.

SECTION 8. Retirement of allowances for certain electric system managers. (1) In 2022 and each following calendar year before 2051, the Office of Greenhouse Gas Regulation shall retire from the annual allowance budget, on behalf of a covered entity that is an electric system manager, a number of allowances equal to the regulated emissions attributable to a consumer-owned utility, if the three-year average of the annual anthropogenic greenhouse gas emissions attributable to electricity that is scheduled, by the consumer-owned utility or by an electric generation and transmissions cooperative, for final delivery by the consumer-owned utility for consumption in this state is less than 25,000 metric tons of carbon dioxide equivalent.

(2) Allowances directly retired by the office on behalf of a covered
entity under this section shall count toward fulfilling the covered entity’s compliance obligation for the compliance period during which the allowances are directly retired.

SECTION 9. Retirement of allowances for certain electricity service suppliers. (1) As used in this section:

(a) “Direct access” has the meaning given that term in ORS 757.600.
(b) “Electricity services” has the meaning given that term in ORS 757.600.
(c) “Retail electricity consumer” has the meaning given that term in ORS 757.600.

(2) In 2022 and in each following calendar year before 2026, the Office of Greenhouse Gas Regulation shall retire from the annual allowance budget, on behalf of a covered entity that is an electricity service supplier, a number of allowances equal to the regulated emissions attributable to the electricity service supplier for electricity services provided:

(a) To a person that was a direct access retail electricity consumer prior to January 31, 2020; and
(b) Pursuant to a contract that became effective on or before January 31, 2020.

(3) An electricity service supplier may not include in the rate or bill charged to a retail electricity consumer the costs associated with compliance by the electricity service supplier with the Oregon Greenhouse Gas Initiative that are attributable to the regulated emissions for which allowances are retired under subsection (2) of this section.

(4) The office may annually request from retail electricity consumers the information that is necessary to administer this section. If a retail electricity consumer does not comply with a request under this subsection, the office may not retire under this section any allowances for regulated emissions attributable to electricity services provided to
that retail electricity consumer.

(5) Allowances directly retired by the office on behalf of a covered entity under this section shall count toward fulfilling the covered entity’s compliance obligation for the compliance period during which the allowances are directly retired.

SECTION 10. Section 9 of this 2020 Act is repealed on January 2, 2026.

SECTION 11. Retirement of allowances for covered entities that are natural gas powered electric power generation facilities. (1) In 2022 and each following calendar year before 2027, the Office of Greenhouse Gas Regulation shall retire from the annual allowance budget, on behalf of a covered entity described in section 5 (2)(e) of this 2020 Act, if the covered entity is a natural gas powered electric power generation facility with an applicable code of 22112 under the 2017 North American Industry Classification System, a number of allowances equal to the regulated emissions that are attributable to the generation in this state by the covered entity of electricity:

(a) That is delivered to and consumed in another state, accounting for transmission and distribution line losses; and

(b) For which the capital and fuel costs associated with the generation are included in the rates of a multistate jurisdictional electric company that are charged to electricity customers in a state other than Oregon.

(2) Allowances directly retired by the office on behalf of a covered entity under this section shall count toward fulfilling the covered entity’s compliance obligation for the compliance period during which the allowances are directly retired.

SECTION 12. Section 11 of this 2020 Act is repealed on January 2, 2027.

SECTION 13. Retirement of allowances for certain motor vehicle fuel importers and suppliers. (1) As used in this section:
(a) “Metropolitan planning area” has the meaning given that term in 49 U.S.C. 5303(b).

(b) “Motor vehicle” means a vehicle that is self-propelled or designed for self-propulsion.

(c) “Motor vehicle fuel” means any combustible gas, liquid or material of a kind used as fuel for the generation of power to propel a motor vehicle.

(d) “Truck stop” means a public facility for the fueling of motor vehicles that has, at the facility:

(A) At least four showers available for public use;

(B) A permanently established truck scale; and

(C) One or more underground storage tanks that are dedicated to supplying diesel motor vehicle fuel to at least four fueling islands that are each:

(i) Dedicated to fueling trucks; and

(ii) Equipped with both a pump designed for the high-speed dispensing of diesel motor vehicle fuel and a satellite diesel motor vehicle fuel pump.

(2) In 2022 and each following calendar year before 2025, the Office of Greenhouse Gas Regulation shall retire from the annual allowance budget, on behalf of a covered entity described in section 5 (2)(d) of this 2020 Act, a number of allowances equal to 100 percent of regulated emissions attributable to the combustion of motor vehicle fuel that is:

(a) Produced in Oregon or imported into Oregon by the covered entity; and

(b) Delivered into a fuel tank used for propelling a motor vehicle at:

(A) A delivery point with a zip code that is located outside the boundary of the metropolitan planning area that includes Portland; or

(B) A truck stop that is geographically located 1.5 miles or less from
the border between the State of Oregon and a state that has not
adopted a program for regulating greenhouse gas emissions from mo-
tor vehicle fuel.

(3) In 2025 and each following calendar year before 2051, and subject
to subsection (5) of this section, the office shall retire from the annual
allowance budget, on behalf of a covered entity described in section 5
(2)(d) of this 2020 Act, a number of allowances equal to 100 percent of
regulated emissions attributable to the combustion of motor vehicle
fuel that is:

(a) Produced in Oregon or imported into Oregon by the covered
entity; and

(b) Delivered into a fuel tank used for propelling a motor vehicle
at:

(A) A delivery point with a zip code that is located outside:

(i) The boundary of a metropolitan planning area that includes
Portland;

(ii) The city limits of a city, if the total aggregated gallons of motor
vehicle fuel annually delivered at delivery points with zip codes inside
the city limits equals 10 million gallons or more; or

(iii) The boundary of a county or a city not described in sub-
subparagraph (ii) of this subparagraph for which the office has re-
ceived a certified copy of an adopted ordinance or resolution described
in subsection (4) of this section; or

(B) A truck stop that is geographically located 1.5 miles or less from
the border between the State of Oregon and a state that has not
adopted a program for regulating greenhouse gas emissions from mo-
tor vehicle fuel.

(4) A county or a city may, by ordinance or resolution, exercise the
option for the cost of the Oregon Greenhouse Gas Initiative to apply
to motor vehicle fuel delivered into the fuel tanks for propelling motor
vehicles at delivery points located within the boundary of the county
or city. Not later than 10 days after passage of an ordinance or resolution approving exercise of the option described in this subsection, the governing body of the county or city shall provide by certified mail to the office a certified copy of the adopted ordinance or resolution.

(5) The office shall cease to retire allowances from the annual allowance budget under subsection (3) of this section on January 1 of the year following the year in which the total number of counties in this state that have exercised the option described in subsection (4) of this section first meets or exceed 19 counties.

(6) Allowances directly retired by the office on behalf of a covered entity under this section shall count toward fulfilling the covered entity’s compliance obligation for the compliance period during which the allowances are directly retired. A covered entity may not include in the rate or bill charged for motor vehicle fuel delivered at a delivery point for which allowances are directly retired under this section any costs associated with compliance by the covered entity with the Oregon Greenhouse Gas Initiative.

SECTION 14. Direct distribution of allowances for electric companies. The Oregon Greenhouse Gas Reduction Board shall, in consultation with the Public Utility Commission, adopt rules for allocating allowances for direct distribution at no cost to covered entities that are electric companies. Direct distributions under this section must be for the exclusive benefit of retail customers that are supplied electricity by the electric company. Rules adopted under this section must allow for an electric company to use allowances directly distributed under this section to fulfill the compliance obligation associated with electricity supplied by the electric company to serve the load of the electric company’s retail customers in Oregon, subject to the oversight of the commission. The rules must include provisions necessary to implement direct distributions of allowances to electric companies as follows:

[21]
(1)(a) For the purpose of aligning the effects of sections 4 to 32 of this 2020 Act with the trajectory of emissions reductions by electric companies resulting from the requirements of ORS 469A.005 to 469A.210 and 757.518:

(A) The annual direct distributions to an electric company in 2022 and in each following calendar year before 2030 must be a number of allowances such that the electric company receives a total direct distribution of allowances over that time period equal to 100 percent of the electric company’s forecast regulated emissions for 2022 and for each following year until and including 2029 associated with the electricity supplied to serve the load of the electric company’s retail customers in Oregon; and

(B) The direct distribution to an electric company in 2030 must be a number of allowances equal to 100 percent of the electric company’s forecast regulated emissions associated with the electricity supplied to serve the load of the electric company’s retail electricity customers in Oregon for the calendar year 2030.

(b) For purposes of this subsection, forecast regulated emissions for an electric company must be based on or contained in the following, as of January 1, 2022:

(A) The most recent integrated resource plan filed by the electric company and acknowledged by order by the commission;

(B) Any updates to the integrated resource plan filed by the electric company with the commission; or

(C) In the case of a multistate jurisdictional electric company, other information developed consistent with a methodology approved by the commission.

(2) In 2031 and in each following calendar year before 2051, the direct distribution to an electric company under this section shall decline annually from the number of allowances directly distributed to the electric company in 2030 by the constant amount necessary to re-

[22]
duce the annual direct distributions such that the direct distribution in 2050 is a number of allowances equal to 20 percent of the average of the annual emissions of the electric company for the five most recent years prior to the effective date of this 2020 Act, as reported under ORS 468A.280.

SECTION 15. Direct distribution of allowances for certain electric system managers. (1) The Office of Greenhouse Gas Regulation shall allocate allowances for direct distribution at no cost to covered entities that are electric system managers other than electric companies as follows:

(a) The direct distribution to an electric system manager under this subsection in 2022 shall be a number of allowances equal to 100 percent of the anthropogenic greenhouse gas emissions that are:

(A) The electric system manager’s 2022 baseline emissions attributable to electricity scheduled by the electric system manager for final delivery by consumer-owned utilities for consumption in this state; and

(B) Not regulated emissions for which the office has retired allowances on behalf of the electric system manager.

(b) In 2022 and in each following calendar year before 2051, the direct distribution received by an electric system manager for emissions described in paragraph (a) of this subsection shall decline annually by a constant amount proportionate to the decline in the number of allowances available in annual allowance budgets pursuant to section 5 (1)(b) of this 2020 Act.

(c) Notwithstanding paragraph (b) of this subsection, the direct distribution to an electric system manager in any year may not be a number of allowances that is less than 20 percent of the number of allowances directly distributed to the electric system manager in 2022.

(2) Proceeds from the sale by a consumer-owned utility of allowances distributed at no cost under this section must be used by the
consumer-owned utility for the benefit of ratepayers, in furtherance of the purposes set forth in section 2 of this 2020 Act and as further required by the governing body of the consumer-owned utility.

(3) The governing body of a consumer-owned utility that receives or sells directly distributed allowances under this section shall, no later than September 15 of each even-numbered year, submit a report to the Legislative Assembly on the use by the consumer-owned utility of the directly distributed allowances. The report must include, but not be limited to, a description of the uses by the consumer-owned utility of proceeds from the sale of allowances distributed to the consumer-owned utility under this section.

SECTION 16. 2022 emissions baseline for electric system managers.

In determining the baseline of anthropogenic greenhouse gas emissions for 2022 for an electric system manager as required by section 15 (1)(a)(A) of this 2020 Act, the Office of Greenhouse Gas Regulation shall consider:

(1) Anthropogenic greenhouse gas emissions information available for the electric system manager for representative years prior to 2022, as reported under ORS 468A.280;

(2) Hydroelectric power generation variability;

(3) Increases in load requirements anticipated to occur on or before January 1, 2025, due to acquisitions of large industrial customers not previously served by the electric system manager; and

(4) Any other indicators of changes in load requirements on or before January 1, 2025, that are relevant to determining an electric system manager's 2022 baseline anthropogenic greenhouse gas emissions.

SECTION 17. Direct distribution of allowances for natural gas utilities.

(1) Subject to subsections (2) and (3) of this section, the Office of Greenhouse Gas Regulation shall annually allocate allowances for direct distribution at no cost to covered entities that are natural gas utilities, such that the number of allowances directly distributed is
equal to the total of:

(a) The regulated emissions attributable to the provision of natural gas service to the low-income residential sales customers of the natural gas utility, as determined by the office after consultation with the Public Utility Commission;

(b) 60 percent of the weather-normalized anthropogenic greenhouse gas emissions forecast for 2022 to be regulated emissions attributable to natural gas use or combustion by the natural gas sales customers of the natural gas utility that are not trade-exposed natural gas users;

(c) 60 percent of the weather-normalized anthropogenic greenhouse gas emissions forecast for 2022 to be regulated emissions attributable to natural gas use or combustion by the natural gas transportation customers of the natural gas utility that are not trade-exposed natural gas users; and

(d) The regulated emissions attributable to natural gas combustion by trade-exposed natural gas users that receive natural gas on the natural gas utility’s distribution system, as determined by the office after consultation with the commission.

(2) In 2023 and in each following calendar year before 2051, the direct distributions received by a natural gas utility under subsection (1) (b) and (c) of this section shall each decline annually by a constant amount proportionate to the decline in the number of allowances available in annual allowance budgets pursuant to section 5 (1)(b) of this 2020 Act.

(3) Allowances distributed under subsection (1)(a) of this section must be used by the natural gas utility only to fulfill a compliance obligation, with the benefit of the use accruing to the natural gas utility’s low-income residential sales customers in a manner authorized by the commission pursuant to section 55 of this 2020 Act.

(4) The office shall require a natural gas utility to consign all allowances directly distributed under subsection (1)(b) to (d) of this
section to the office to be auctioned pursuant to section 28 of this 2020 Act. Proceeds from the sale of allowances directly distributed under subsection (1)(b) to (d) of this section may be used only in the manner authorized by the commission under section 48 of this 2020 Act.

SECTION 18. Designation of trade-exposed natural gas users. (1) The Office of Greenhouse Gas Regulation shall designate a person as a trade-exposed natural gas user if, as of the operative date of this section and as may be verified by the office, the person receives natural gas through a natural gas utility’s distribution system and uses the natural gas to engage in one or more of the following trade-exposed processes, as identified by industry group and code in the 2017 North American Industry Classification System:

(a) Aerospace Product and Parts Manufacturing, code 3364.
(b) Basic Chemical Manufacturing, code 3251.
(c) Cement and Concrete Product Manufacturing, code 3273.
(d) Converted Paper Product Manufacturing, code 3222.
(e) Dairy Product Manufacturing, code 3115.
(f) Forest Nurseries and Gathering of Forest Products, code 1132.
(g) Foundries, code 3315.
(h) Fruit and Tree Nut Farming, code 1113.
(i) Fruit and Vegetable Preserving and Specialty Food Manufacturing, code 3114.
(j) Glass and Glass Product Manufacturing, code 3272.
(k) Grain and Oilseed Milling, code 3112.
(L) Greenhouse, Nursery, and Floriculture Production, code 1114.
(m) Iron and Steel Mills and Ferroalloy Manufacturing, code 3311.
(n) Lime and Gypsum Product Manufacturing, code 3274.
(o) Miscellaneous Durable Goods Merchant Wholesalers, code 4239.
(p) Motor Vehicle Manufacturing, code 3361.
(q) Nonferrous Metal (except Aluminum) Production and Processing, code 3314.
(r) Nonmetallic Mineral Mining and Quarrying, code 2123.
(s) Other Crop Farming, code 1119.
(t) Other Nonmetallic Mineral Product Manufacturing, code 3279.
(u) Other Wood Product Manufacturing, code 3219.
(v) Plastics Product Manufacturing, code 3261.
(w) Pulp, Paper, and Paperboard Mills, code 3221.
(x) Resin, Synthetic Rubber, and Artificial and Synthetic Fibers and Filaments Manufacturing, code 3252.
(y) Railroad Rolling Stock Manufacturing, code 3365.
(z) Sawmills and Wood Preservation, code 3211.
(aa) Seafood Product Preparation and Packaging, code 3117.
(bb) Semiconductor and Other Electronic Component Manufacturing, code 3344.
(cc) Ship and Boat Building, code 3366.
(dd) Vegetable and Melon Farming, code 1112.
(ee) Veneer, Plywood, and Engineered Wood Product Manufacturing, code 3212.

(2) The Oregon Greenhouse Gas Reduction Board shall adopt by rule a procedure for designating as a trade-exposed natural gas user a person not described in subsection (1) of this section that faces a significant risk of leakage due to the indirect impacts of the Oregon Greenhouse Gas Initiative on natural gas costs. Designation of a person as a trade-exposed natural gas user under the procedure must be consistent with the purpose set forth in section 2 (1)(a) of this 2020 Act.

(3) A person that is a fossil fuel distribution and storage facility or infrastructure or an electric generating unit may not be designated as a trade-exposed natural gas user under subsection (2) of this section.

SECTION 19. Designation of covered entities engaged in emissions-intensive, trade-exposed processes as EITE entities. (1) The Office of
Greenhouse Gas Regulation shall designate a covered entity as an EITE entity if the covered entity is a permitted air contamination source and is primarily engaged, as of the operative date of this section and as may be verified by the office, in the manufacture of goods through one or more of the following emissions-intensive, trade-exposed processes, as identified by industry group and code in the 2017 North American Industry Classification System:

(a) Aerospace Product and Parts Manufacturing, code 3364.
(b) Basic Chemical Manufacturing, code 3251.
(c) Cement and Concrete Product Manufacturing, code 3273.
(d) Converted Paper Product Manufacturing, code 3222.
(e) Foundries, code 3315.
(f) Fruit and Vegetable Preserving and Specialty Food Manufacturing, code 3114.
(g) Glass and Glass Product Manufacturing, code 3272.
(h) Iron and Steel Mills and Ferroalloy Manufacturing, code 3311.
(i) Lime and Gypsum Product Manufacturing, code 3274.
(j) Miscellaneous Durable Goods Merchant Wholesalers, code 4239.
(k) Motor Vehicle Manufacturing, code 3361.
(L) Nonferrous Metal (except Aluminum) Production and Processing, code 3314.
(m) Nonmetallic Mineral Mining and Quarrying, code 2123.
(n) Other Nonmetallic Mineral Product Manufacturing, code 3279.
(o) Plastics Product Manufacturing, code 3261.
(p) Pulp, Paper, and Paperboard Mills, code 3221.
(q) Resin, Synthetic Rubber, and Artificial and Synthetic Fibers and Filaments Manufacturing, code 3252.
(r) Railroad Rolling Stock Manufacturing, code 3365.
(s) Sawmills and Wood Preservation, code 3211.
(t) Semiconductor and Other Electronic Component Manufacturing, code 3344.
(u) Ship and Boat Building, code 3366.
(v) Veneer, Plywood, and Engineered Wood Product Manufacturing, code 3212.

(2)(a) The Oregon Greenhouse Gas Reduction Board shall adopt by rule a procedure for-designating as an EITE entity a covered entity that:
(A) Begins manufacturing a good or goods in this state after the operative date of this section through an emissions-intensive, trade-exposed process listed in subsection (1) of this section; or
(B) Manufactures a good or goods through a process not listed in subsection (1) of this section that the board, by rule, identifies as an emissions-intensive, trade-exposed process.

(b) Designation of a person as an EITE entity under the procedure adopted pursuant to this subsection must be consistent with the purpose set forth in section 2 (1)(a) of this 2020 Act.

(3) Rules adopted under subsection (2) of this section may allow the office to assign a good manufactured by a covered entity designated as an EITE entity pursuant to this section a temporary benchmark, consistent with the processes for calculating benchmarks under section 20 of this 2020 Act, and to adjust the temporary benchmark after the close of the first compliance period for which the EITE entity must fulfill a compliance obligation.

(4) A covered entity that is a fossil fuel distribution and storage facility or infrastructure or an electric generating unit may not be designated as an EITE entity under subsection (2) of this section and may not receive allowances at no cost under section 20 of this 2020 Act.

SECTION 20. Direct distribution of allowances for EITE entities. (1)
As used in this section, “annual benchmarked emissions calculation” means the product of an emissions efficiency benchmark for a good or group of goods multiplied by the EITE entity’s output, during the calendar year for which allowances will be allocated for direct dis-
tribution at no cost to the EITE entity, of the good or group of goods
to which the emissions efficiency benchmark applies.

(2) The annual allocation of allowances for direct distribution at
no cost to an EITE entity shall be a number of allowances equal to the
sum total of the annual benchmarked emissions calculations for the
goods manufactured by the EITE entity.

(3) The Office of Greenhouse Gas Regulation shall establish, by or-
der, the emissions efficiency benchmarks for goods manufactured in
this state by EITE entities.

(4) In establishing the emissions efficiency benchmarks, the office
may:

(a) Establish an emissions efficiency benchmark separately for each
individual good manufactured in this state by an EITE entity; or

(b) Establish a single emissions efficiency benchmark for a group
of goods manufactured in this state by an EITE entity, if the office
determines that the anthropogenic greenhouse gas emissions attrib-
utable to the manufacture of each of the goods in the group:

(A) Are not materially different in quantity; or

(B) Cannot be distinguished as emissions attributable to any one
of the goods in the group.

(5)(a) The office shall establish emissions efficiency benchmarks
based on recent years’ efficiency as provided in this subsection. An
emissions efficiency benchmark established based on recent years’ ef-
ficiency shall be applicable for the period beginning January 1, 2022,
and ending December 31, 2025. To determine each emissions efficiency
benchmark, the office shall:

(A) Calculate the three-year average of the total, expressed in
metric tons of carbon dioxide equivalent, of the anthropogenic
greenhouse gas emissions attributable to the manufacture of the good
or group of goods for which the EITE entity would have been the
regulated covered entity if the Oregon Greenhouse Gas Initiative had
been in effect during the time that the anthropogenic greenhouse gas emissions occurred; and

(B) Divide the number calculated under subparagraph (A) of this paragraph by the three-year average of the total annual output of the good or group of goods in this state by the EITE entity.

(b) In conducting the calculation required by paragraph (a) of this subsection, the office:

(A) Shall use anthropogenic greenhouse gas emissions information and output data from the three most recent years prior to 2022 for which anthropogenic greenhouse gas emissions information is available and verified by the office; and

(B) Shall exclude from the data described in subparagraph (A) of this paragraph the anthropogenic greenhouse gas emissions attributable to natural gas combustion by an EITE entity described in section 24 of this 2020 Act.

(6) An EITE entity may file with the office a written request for a contested case hearing to challenge an order establishing the emissions efficiency benchmarks for goods produced by the EITE entity. The request shall be filed within 30 days after the date the order was entered. If an EITE entity requests a hearing, the hearing shall be conducted in accordance with the provisions applicable to contested case proceedings under ORS chapter 183.

(7) In order to implement this section, the Oregon Greenhouse Gas Reduction Board shall adopt by rule:

(a) A means for attributing an EITE entity’s anthropogenic greenhouse gas emissions to the manufacture of individual goods or groups of goods;

(b) Requirements for EITE entities to provide any pertinent records necessary for the office to verify output data; and

(c) A process for adjusting an allocation of allowances for direct distribution at no cost, if necessary, to reconcile for output variability
or type of good.

(8) The board shall adopt by rule a process for EITE entities to apply to the office for an adjustment to the allocation of allowances for direct distribution at no cost that the EITE entity may receive. The office may grant an adjustment under this subsection only for a significant unanticipated change in the anthropogenic greenhouse gas emissions attributable to the manufacture of a good or group of goods in this state by the EITE entity, based on a finding by the office that the adjustment is necessary to accommodate changes to the manufacturing process that have a material impact on anthropogenic greenhouse gas emissions. Rules adopted under this subsection may provide for the office to contract with an external third-party expert to assist the office in making individual determinations on applications for adjustments.

SECTION 21. Operation of emissions efficiency benchmarks based on best available technology. (1) The amendments to section 20 of this 2020 Act by section 22 of this 2020 Act become operative on January 1, 2026.

(2)(a) Subject to paragraph (b) of this subsection, the Office of Greenhouse Gas Regulation shall first establish, by order, emissions efficiency benchmarks based on best available technology for EITE entities under the amendments to section 20 of this 2020 Act by section 22 of this 2020 Act no later than January 1, 2025.

(b) The office shall first establish emissions efficiency benchmarks based on best available technology on a date prior to January 1, 2025, as mutually agreed upon by the office and an EITE entity, if the office receives a written request from the EITE entity that an early determination of best available technology is necessary to inform any significant new investments in technology by the EITE entity.

(c) An order issued under this subsection may not become effective prior to January 1, 2026.
(3) The Oregon Greenhouse Gas Reduction Board or the office may
adopt or amend rules, issue orders or take any actions before the op-
erative date specified in subsection (1) of this section that are neces-
sary to enable the board or the office, on and after the operative date
specified in subsection (1) of this section, to carry out subsection (2)
of this section and the amendments to section 20 by section 22 of this
2020 Act.

SECTION 22. Section 20 of this 2020 Act is amended to read:

Sec. 20. (1) As used in this section[]:

(a) “Annual benchmarked emissions calculation” means the product of an
emissions efficiency benchmark for a good or group of goods multiplied by
the EITE entity’s output, during the calendar year for which allowances will
be allocated for direct distribution at no cost to the EITE entity, of the good
or group of goods to which the emissions efficiency benchmark applies.

(b) “Best available technology” means the fuels, processes, equip-
ment and technology that will most effectively reduce the regulated
emissions:

(A) For which an EITE entity must meet a compliance obligation;
and

(B) That are associated with the manufacture by an EITE entity
of a good, without changing the characteristics of the good being
manufactured, that is technically feasible, commercially available,
economically viable and compliant with all applicable laws.

(2) The annual allocation of allowances for direct distribution at no cost
to an EITE entity shall be a number of allowances equal to the sum total
of the annual benchmarked emissions calculations for the goods manufac-
tured by the EITE entity.

(3) The Office of Greenhouse Gas Regulation shall establish, by order, the
emissions efficiency benchmarks for goods manufactured in this state by
EITE entities.

(4) In establishing the emissions efficiency benchmarks, the office may:
(a) Establish an emissions efficiency benchmark separately for each individual good manufactured in this state by an EITE entity; or

(b) Establish a single emissions efficiency benchmark for a group of goods manufactured in this state by an EITE entity, if the office determines that the anthropogenic greenhouse gas emissions attributable to the manufacture of each of the goods in the group:

(A) Are not materially different in quantity; or

(B) Cannot be distinguished as emissions attributable to any one of the goods in the group.

(5)(a) The office shall establish emissions efficiency benchmarks based on recent years’ efficiency as provided in this subsection. An emissions efficiency benchmark established based on recent years’ efficiency shall be applicable for the period beginning January 1, 2022, and ending December 31, 2025. To determine each emissions efficiency benchmark, the office shall:

(A) Calculate the three-year average of the total, expressed in metric tons of carbon dioxide equivalent, of the anthropogenic greenhouse gas emissions attributable to the manufacture of the good or group of goods for which the EITE entity would have been the regulated covered entity if the Oregon Greenhouse Gas Initiative had been in effect during the time that the anthropogenic greenhouse gas emissions occurred; and

(B) Divide the number calculated under subparagraph (A) of this paragraph by the three-year average of the total annual output of the good or group of goods in this state by the EITE entity.

(b) In conducting the calculation required by paragraph (a) of this subsection, the office:

(A) Shall use anthropogenic greenhouse gas emissions information and output data from the three most recent years prior to 2022 for which anthropogenic greenhouse gas emissions information is available and verified by the office; and

(B) Shall exclude from the data described in subparagraph (A) of this paragraph the anthropogenic greenhouse gas emissions attributable to natural...
gas combustion by an EITE entity described in section 24 of this 2020 Act.]

(5)(a) The office shall establish emissions efficiency benchmarks based on best available technology as provided in this subsection. The office shall update each emissions efficiency benchmark once every nine years. Each emissions efficiency benchmark must represent the anthropogenic greenhouse gas emissions that would be the resulting regulated emissions attributable to an EITE entity for the manufacture of a good or group of goods in this state, if the EITE entity were to use the best available technology, as of the date that the emissions efficiency benchmark was last updated, that materially contributes to the regulated emissions of the EITE entity.

(b) In determining an emissions efficiency benchmark, the office shall:

(A) Consider any anthropogenic greenhouse gas emissions intensity audit reports specific to the EITE entity submitted under paragraph (c) of this subsection;

(B) Consider the technical feasibility, commercial availability and economic viability of options to reduce anthropogenic greenhouse gas emissions;

(C) Consider the fuels, processes, equipment and technology used by facilities in this state or in other jurisdictions to produce goods of comparable type, quantity and quality;

(D) Consider barriers that would prevent adoption of best available technology by the EITE entity; and

(E) Exclude from any calculation the anthropogenic greenhouse gas emissions attributable to natural gas combustion by an EITE entity described in section 24 of this 2020 Act.

(c) An EITE entity may submit to the office, for consideration in adopting emissions efficiency benchmarks, an anthropogenic greenhouse gas emissions intensity audit report produced by a qualified, independent third-party organization. The audit report must:
(A) Include an analysis of the current fuels, processes, equipment and technology that materially contribute to the regulated emissions of the EITE entity attributable to the manufacture of each good or group of goods by the EITE entity and the resulting emissions intensity per unit of output for each good or group of goods.

(B) Include an analysis of the best available technology to produce the goods manufactured by the EITE entity and the resulting anthropogenic greenhouse gas emissions intensity per unit of output for each good or group of goods if best available technology were used by the EITE entity. The analysis required by this subparagraph must, to the greatest extent practicable, consider the factors described in paragraph (b)(C) and (D) of this subsection.

(C) Based on the analyses required under subparagraphs (A) and (B) of this paragraph, provide an estimate of the anthropogenic greenhouse gas emissions intensity per unit of output to produce the same goods or groups of goods at the same facility if the facility used the best available technology.

(6) An EITE entity may file with the office a written request for a contested case hearing to challenge an order establishing the emissions efficiency benchmarks for goods produced by the EITE entity. The request shall be filed within 30 days after the date the order was entered. If an EITE entity requests a hearing, the hearing shall be conducted in accordance with the provisions applicable to contested case proceedings under ORS chapter 183.

(7) In order to implement this section, the Oregon Greenhouse Gas Reduction Board shall adopt by rule:

(a) A means for attributing an EITE entity’s anthropogenic greenhouse gas emissions to the manufacture of individual goods or groups of goods;

(b) Requirements for EITE entities to provide any pertinent records necessary for the office to verify output data; and

(c) A process for adjusting an allocation of allowances for direct distribu-
ution at no cost, if necessary, to reconcile for output variability or type of
good.

(8) The board shall adopt by rule a process for EITE entities to apply to
the office for an adjustment to the allocation of allowances for direct dis-
tribution at no cost that the EITE entity may receive. The office may grant
an adjustment under this subsection only for a significant unanticipated
change in the anthropogenic greenhouse gas emissions attributable to the
manufacture of a good or group of goods in this state by the EITE entity,
based on a finding by the office that the adjustment is necessary to accom-
modate changes to the manufacturing process that have a material impact
on anthropogenic greenhouse gas emissions. Rules adopted under this sub-
section may provide for the office to contract with an external third-party
expert to assist the office in making individual determinations on applica-
tions for adjustments.

SECTION 23. Benchmark report. No later than September 15, 2030,
the Office of Greenhouse Gas Regulation shall provide a report to the
Legislative Assembly, in the manner provided in ORS 192.245, on the
emissions efficiency benchmarks established pursuant to section 20 of
this 2020 Act. The report may include recommendations for legislation.
The report shall assess:

(1) The anthropogenic greenhouse gas emissions intensity and trade
exposure of covered entities that have been designated as EITE enti-
ties pursuant to section 19 of this 2020 Act;

(2) The anthropogenic greenhouse gas emissions reduction oppor-
tunities available to the covered entities described in subsection (1) of
this section; and

(3) Whether the conclusions of the assessments required under
subsections (1) and (2) of this section warrant an adjustment to the
methods of calculating the emissions efficiency benchmarks estab-
lished pursuant to section 20 of this 2020 Act.

SECTION 24. (1) If an EITE entity purchases natural gas delivered
on infrastructure other than a natural gas utility's local distribution system, in addition to the annual allocation of allowances received under section 20 of this 2020 Act, the Office of Greenhouse Gas Regulation shall annually allocate for direct distribution at no cost to the EITE entity a number of allowances as follows:

(a) In 2022 and each following calendar year before 2025, the direct distribution received by the EITE entity shall be a number of allowances equal to the total of the regulated emissions by the EITE entity attributable to natural gas combustion.

(b)(A) In 2025 and each following calendar year before 2051, and except as provided in subparagraph (B) of this paragraph, the direct distribution received by the EITE entity shall decline annually by a constant amount proportionate to the decline in the number of allowances available in annual allowance budgets pursuant to section 5 (1)(b) of this 2020 Act.

(B) If the EITE entity is in compliance with an approved energy management system audit and implementation plan subject to subsection (3) of this section, the direct distribution received by the EITE entity during the following years shall be as follows:

(i) In 2025 and each year before 2030, the direct distribution shall be a number of allowances equal to the total of the regulated emissions by the EITE entity attributable to natural gas combustion; and

(ii) In 2030 and each year before 2051, the direct distribution shall be a number of allowances equal to 97 percent of the total of the regulated emissions by the EITE entity attributable to natural gas combustion.

(2)(a) An EITE entity described in subsection (1) of this section may, no later than December 31, 2024, and once every five years thereafter, submit to the office a completed energy management system audit and implementation plan for approval.

(b) The office shall approve an energy management system audit
and implementation plan if:

(A) The audit meets the requirements of section 50 (4) of this 2020 Act; and

(B) The implementation plan identifies how the EITE entity will complete all efficiency improvements identified in the audit report that are related to natural gas use and that have a payback period of five years or less by:

(i) Two years after the date of the audit; or

(ii) A reasonable extension date not to exceed four years after the date of the audit, if the office determines that additional time is reasonable and necessary for the EITE entity to complete the efficiency improvements.

(c) In determining the payback period for an efficiency improvement identified in an audit report, the office shall consider any grants or loans for completing the efficiency improvement received by the EITE entity from the Traded Sector Greenhouse Gas Reduction Program Fund established under section 51 of this 2020 Act.

(d) An approved energy management system audit and implementation plan shall be valid for five years.

(3) The office may contract with an independent third party entity to review and approve energy management system audits and implementation plans under this section.

(4) The Oregon Greenhouse Gas Reduction Board shall adopt rules necessary to implement this section, including but not limited to a process for an EITE entity to appeal from the approval or disapproval of an energy management system audit or implementation plan.

SECTION 25. Offsets generally; rules. (1) Offset projects:

(a) Must be located in the United States;

(b) May not be otherwise required by law; and

(c) Must result in greenhouse gas emissions reductions or removals that:
(A) Are real, permanent, quantifiable, verifiable and enforceable; and

(B) Are in addition to greenhouse gas emissions reductions or removals otherwise required by law or legally enforceable mandate and that exceed any other greenhouse gas emissions reductions or removals that would otherwise occur in a conservative business-as-usual scenario.

(2) A total of no more than eight percent of a covered entity’s compliance obligation may be fulfilled by surrendering offset credits. A total of no more than four percent of a covered entity’s compliance obligation may be fulfilled by surrendering offset credits generated by offset projects that do not provide direct environmental benefits in this state.

(3) The Oregon Greenhouse Gas Reduction Board shall adopt rules governing offset projects and the generation, issuance and use of offset credits. The rules must:

(a) Take into consideration standards, rules or protocols for:

(A) Offset projects and the generation, issuance and use of offset credits established by other states, provinces and countries with programs comparable to the Oregon Greenhouse Gas Initiative; and

(B) Voluntary offset projects and the generation, issuance and use of offset credits established by organizations that operate offset credit registries;

(b) Allow for the broadest possible participation by landowners in developing and operating offset projects across the broadest possible variety of types and sizes of lands;

(c) Encourage opportunities for developing offset projects that provide direct environmental benefits in this state;

(d) Encourage offset projects that benefit impacted communities, members of eligible Indian tribes and natural and working lands; and

(e) Address qualifications for persons and agencies that provide
third-party verification and registration of offset projects and offset credits.

(4) The board shall adopt by rule a process for the Office of Greenhouse Gas Regulation to issue early action offset credits for greenhouse gas emissions reductions or removals that occur during the period beginning on January 1, 2020, and ending on January 1, 2022. Rules adopted under this subsection may include:

(a) Designation of offset protocols under which an offset project may qualify for early action offset credits;

(b) Requirements for offset projects to be registered with qualified third-party organizations that operate offset credit registries to receive early action offset credits; and

(c) Requirements for offset credits issued by qualified third-party organizations that operate offset credit registries to be converted to offset credits issued through or acceptable under the Oregon Greenhouse Gas Initiative.

(5) The board shall adopt by rule a process to investigate and invalidate issued offset credits as necessary to uphold the environmental integrity of the Oregon Greenhouse Gas Initiative. Reasons for invalidating issued offset credits may include, but are not limited to:

(a) A misstatement, of more than five percent, of the amount of greenhouse gas emissions reductions or removals attributable to an offset project for which offset credits were issued;

(b) An environmental, health or safety violation by an offset project for which offset credits were issued; or

(c) A determination that offset credits are duplicative of other offset credits issued for the same greenhouse gas emissions reductions or removals by another offset credit issuing body and that the invalidation is necessary to remedy the duplication.

(6) The board shall establish by rule one or more offset integrity accounts. The office shall withhold a percentage of the offset credits
issued by the office for each offset project and deposit the withheld offset credits in an offset integrity account. Uses of offset credits deposited in offset integrity accounts may include, but need not be limited to, using the offset credits to replace offset credits that are invalidated pursuant to rules adopted under subsection (5) of this section.

SECTION 26. Offset protocols. (1) Offset protocols, and any greenhouse gas emissions inventory and monitoring requirements related to the offset protocols, developed pursuant to rules adopted under section 25 of this 2020 Act:

(a) Must be straightforward to implement and administer, for both offset project operators and persons purchasing offset credits;

(b) Must provide flexibility for landowners in the development and operation of offset projects;

(c) Must establish, for each offset protocol, a predetermined crediting period for which an offset project will remain eligible to receive offset credits for greenhouse gas emissions reductions or removals; and

(d) May make use of aggregation or other mechanisms, including cost-effective inventory and monitoring provisions, to increase the development of offset projects by landowners across the broadest possible variety of types and sizes of lands.

(2)(a) The Oregon Greenhouse Gas Reduction Board and the Office of Greenhouse Gas Regulation shall collaborate and consult with the State Forestry Department in developing and monitoring offset protocols related to forestry. Offset protocols related to forestry that are developed pursuant to this subsection:

(A) Must prioritize reforestation, avoided forest conversion and improved forest management.

(B) Must, to the extent practicable, prioritize low-carbon-impact building materials and urban forestry.

[42]
(C) Must have the ability to be administered consistently with the applicable state and local land use laws of Oregon.

(D) May account for differences in forest management practices between private owners of forestland and state or other owners of nonfederal forestlands in establishing the baselines for the generation of offset credits by offset projects on the private, state or other nonfederal forestlands.

(E) May not authorize the generation or issuance of offset credits for greenhouse gas emissions reductions or removals that occur during the period beginning on January 1, 2022, and ending on December 31, 2030, as the result of offset projects on state forestlands, unless as of the effective date of this 2020 Act the state forestlands are:

(i) Trust lands as defined in ORS 273.462;
(ii) Lands in the Elliott State Forest as described in ORS 530.450;
(iii) Common School Forest Lands as described in ORS 530.460; or
(iv) Any other lands placed under the jurisdiction of the State Land Board consistent with Article VIII, section 5, Oregon Constitution.

(b) In developing offset protocols related to forestry, the Oregon Greenhouse Gas Reduction Board, the office and the department shall avoid permanent or temporary net cumulative reductions, attributable to offset projects, in the regional supply of wood fiber harvested from nonfederal forestlands in Oregon that is available to wood products manufacturing facilities in this state. This paragraph does not apply to offset projects located on Indian trust lands or Indian fee lands.

(c) The board and the department shall jointly convene a technical advisory committee to advise the board, the office and the department in developing and monitoring offset protocols related to forestry. The technical advisory committee must include members with expertise in offset protocols related to forestry.

(3) The board and the office shall collaborate and consult with all relevant state agencies, including but not limited to the State De-
partment of Agriculture and the Oregon Watershed Enhancement Board, in developing and monitoring offset protocols related to agriculture and conservation on natural and working lands. In developing offset protocols pursuant to this subsection, the Oregon Greenhouse Gas Reduction Board shall:

(a) Consider developing offset protocols for:

(A) Manure management that reduces methane emissions from agricultural operations;

(B) Avoided grassland conversion; and

(C) Other categories of offset projects that would otherwise result in the reduction of greenhouse gas emissions related to agricultural operations; and

(b) Ensure that the offset protocols have the ability to be administered consistently with the applicable state and local land use laws of Oregon.

(4) In developing any offset protocol related to a matter not addressed by subsections (2) and (3) of this section, the board shall convene a technical advisory committee composed of persons with expertise relevant to the development of the offset protocol.

(5) The office shall regularly review and update offset protocols developed pursuant to rules adopted under section 25 of this 2020 Act. The reviews and updates of offset protocols shall include any updates, as necessary, to the methods or technologies used for measuring and monitoring the greenhouse gas emissions reductions or removals attributable to the offset projects addressed by the offset protocols.

(6) Offset protocols shall be developed and updated by the board pursuant to the rulemaking provisions of ORS chapter 183.

SECTION 27. Offset protocol consultation and reporting. (1) In developing and updating rules and offset protocols pursuant to sections 25 and 26 of this 2020 Act, the Oregon Greenhouse Gas Reduction Board:
(a) Shall consult with and consider the recommendations of:
   (A) The State Department of Agriculture, the State Forestry De-
   partment, the Environmental Justice Task Force, the Oregon
   Watershed Enhancement Board, other relevant state agencies and el-
   igible Indian tribes; and
   (B) Persons and agencies that provide third-party verification and
   registration of offset projects and offset credits; and

(b) May contract with one or more persons or agencies that provide
third-party verification and registration of offset projects and offset
credits to assist in the development of offset protocols.

(2)(a) No later than September 15 of each year, the State Forestry
Department, in collaboration with the Office of Greenhouse Gas Reg-
ulation, shall submit a report to the Legislative Assembly that pro-
vides an analysis of the implementation in Oregon of offset protocols
related to forestry. The report shall:
   (A) Describe the location and scope of offset projects in Oregon
registered under offset protocols related to forestry developed pursuant
to sections 25 and 26 of this 2020 Act for which offset credits have
been issued under the Oregon Greenhouse Gas Initiative, to date, and
the number of offset credits issued;
   (B) Describe forestry carbon offsets marketed, registered, trans-
ferred or sold, to date, by the State Forester under ORS 526.725, 526.780
to 526.789, 530.050 and 530.500;
   (C) Include information and analysis of any cobenefits attributable
   to the forestry offset projects and forestry carbon offsets described
   under subparagraphs (A) and (B) of this paragraph; and
   (D) Identify and address any significant effects attributable to the
forestry offset projects and forestry carbon offsets described in sub-
paragraphs (A) and (B) of this paragraph on the supply of wood fiber
available from nonfederal forestlands to wood products manufacturing
facilities in this state.
(b) The information and analysis required under paragraph (a)(D) of this subsection shall include and consider significant effects attributable to the forestry offset projects and forestry carbon offsets on the supply of wood fiber that are applicable to specific geographic areas of this state, relative to the changes in demand for wood fiber by wood products manufacturing facilities located in those specific geographic areas.

(c) The report required by this subsection may include recommendations by the State Forestry Department on whether a temporary suspension of acceptance of new offset project applications under offset protocols related to forestry developed pursuant to sections 25 and 26 of this 2020 Act is necessary. The purpose of a temporary suspension must be to address any negative effects attributable to forestry offset projects on the supply of wood fiber harvested from nonfederal forestlands that is available to wood products manufacturing facilities in one or more specific geographic areas of this state, relative to the changes in demand for wood fiber in the specific geographic areas. If the department recommends a temporary suspension, the recommendation must also include recommendations for measures to minimize adverse effects on landowners developing offset projects.

SECTION 28. Auctions. (1) Except as provided in subsection (8) of this section, auctions of allowances are open to registered entities.

(2) The Office of Greenhouse Gas Regulation shall hold auctions at least annually.

(3) The office may engage:

(a) A qualified, independent auction administrator to administer auctions; or

(b) A qualified financial services administrator to conduct financial transactions related to the auction.

(4) The office shall issue notice for an upcoming auction prior to the auction.
(5) The office shall:
   (a) Set an auction floor price for 2022 and a schedule for the floor price to increase by a fixed percentage over inflation each calendar year.
   (b) Set an allowance price containment reserve floor price for 2022 and a schedule for the allowance price containment reserve floor price to increase by a fixed percentage over inflation each calendar year.
   (c) Set a hard price ceiling for 2022 and a schedule for the hard price ceiling to increase by a fixed percentage over inflation each calendar year.
   (d) Take actions to minimize the potential for market manipulation and to guard against bidder collusion, including but not limited to specifying as holding limits the maximum number of allowances that may be held by a registered entity at any time.

(6) In setting the auction floor price, allowance price containment reserve floor price and hard price ceiling, the office shall consider prevailing prices for carbon in other jurisdictions.

(7) The proceeds of an auction shall be paid to the office and deposited with the State Treasurer to be credited as follows:
   (a) Auction proceeds from the sale of allowances consigned to the office for auction by a natural gas utility pursuant to section 17 of this 2020 Act shall be credited to the appropriate trust account established by the Public Utility Commission pursuant to section 48 of this 2020 Act; and
   (b) Auction proceeds payable to the state shall be credited to the Auction Proceeds Distribution Fund established under section 29 of this 2020 Act.

(8) Sales of allowances from the allowance price containment reserve shall be conducted separately from the auction of other allowances for the purpose of addressing high costs of compliance instruments. Allowances unsold from the reserve sale must be made
available again at future reserve sales. General market participants may not purchase allowances at reserve sales. The proceeds from any sale of allowances pursuant to this subsection shall be credited to the Auction Proceeds Distribution Fund established under section 29 of this 2020 Act.

(9)(a) If the hard price ceiling for an auction is reached, the office shall offer for sale, at the hard price ceiling, allowances from any reserve described in or established by rule under section 7 of this 2020 Act, as necessary to meet demand from covered entities. If the supplies of all allowances from all reserves are exhausted and additional sales of allowances are necessary for one or more covered entities to fulfill a compliance obligation, the office may sell, at the hard price ceiling, price ceiling allowances in addition to the allowances available in the annual allowance budget.

(b) The proceeds from any sales of allowances at the hard price ceiling shall be paid to the office and deposited with the State Treasurer to be credited as follows:

(A) All moneys that constitute revenues described in Article IX, section 3a, of the Oregon Constitution, shall be credited to the Transportation Decarbonization Investments Account established in section 34 of this 2020 Act;

(B) All moneys that constitute revenues described in Article VIII, section 2 (1)(g), of the Oregon Constitution, shall be credited to the Common School Fund; and

(C) Moneys remaining after meeting the requirements of subparagraphs (A) and (B) of this paragraph shall be credited to the Oregon Greenhouse Gas Initiative Operating Fund established under section 31 of this 2020 Act, to be used only as described in section 31 (4) of this 2020 Act.

(10) The Oregon Greenhouse Gas Reduction Board:

(a) Shall adopt rules for making an unlimited number of allowances
available for auction upon exceedance of the hard price ceiling set by
the office under subsection (5) of this section; and
(b) May adopt rules as necessary to administer auctions.

Proceeds Distribution Fund is established in the State Treasury, sep-
arate and distinct from the General Fund. Moneys in the Auction
Proceeds Distribution Fund is continuously appropriated to the Office
of Greenhouse Gas Regulation for distribution as required by this
section.
(2) The fund shall consist of moneys credited to the fund under
section 28 of this 2020 Act. Interest earned by the fund shall be credited
to the fund.
(3) The office shall certify the amount of moneys deposited in the
fund available for distribution and shall cause the moneys to be dis-
tributed as follows:
(a) All moneys that constitute revenues described in Article IX,
section 3a, of the Oregon Constitution, shall be transferred to the
Transportation Decarbonization Investments Account established in
section 34 of this 2020 Act;
(b) All moneys that constitute revenues described in Article VIII,
section 2 (1)(g), of the Oregon Constitution, shall be transferred to the
Common School Fund;
(c) An amount necessary for administration, other than adminis-
tration paid for by moneys described in paragraphs (a) and (b) of this
subsection, of sections 2, 4 to 32, 38 to 40, 41, 42, 43 and 45 to 53 of this
2020 Act and rules adopted pursuant to sections 2, 4 to 32, 38 to 40, 41,
42, 43 and 45 to 53 of this 2020 Act shall be transferred to the Oregon
Greenhouse Gas Initiative Operating Fund established under section
31 of this 2020 Act; and
(d) Moneys remaining after the transfers under paragraphs (a) to
(c) of this subsection shall be transferred to the Climate Investments
Fund established under section 39 of this 2020 Act.

SECTION 30. Progress report. (1) The Office of Greenhouse Gas Regulation shall, no later than one year after the close of each compliance period, submit a report in the manner provided by ORS 192.245 to the Legislative Assembly. The report shall:
   (a) Detail activity during the most-recently closed compliance period under the Oregon Greenhouse Gas Initiative;
   (b) Include, but need not be limited to, aggregated information on the following for the compliance period:
      (A) The number of allowances bought and sold at each auction held and all auction prices, including the floor and ceiling prices, for the allowances bought and sold at each auction;
      (B) The beginning and ending balances of all auction holding accounts and reserves held by the office; and
      (C) The anthropogenic greenhouse gas emissions reductions achieved during the compliance period;
   (c) Estimate the impacts of the Oregon Greenhouse Gas Initiative on fuel prices and on electricity and natural gas bills in Oregon;
   (d) Analyze the state’s progress in reducing anthropogenic greenhouse gas emissions consistent with ORS 468A.205 and examine trends in anthropogenic greenhouse gas emissions by sector; and
   (e) Evaluate the public health and other cobenefits of greenhouse gas emissions reductions, with a particular emphasis on the cobenefits for impacted communities.
   (2) In addition to the information required by subsection (1) of this section, every second report required by this section shall evaluate the efficacy of the Oregon Greenhouse Gas Initiative and investments of the proceeds from auctions under section 28 of this 2020 Act in carrying out the purposes set forth in section 2 of this 2020 Act.

SECTION 31. Operating fund. (1) The Oregon Greenhouse Gas Initiative Operating Fund is established in the State Treasury, separate
and distinct from the General Fund. Interest earned by the Oregon Greenhouse Gas Initiative Operating Fund shall be credited to the fund. Moneys in the fund are continuously appropriated to the Department of Environmental Quality for use by the Office of Greenhouse Gas Regulation in the performance of the duties, functions and powers vested in the office by law.

(2) The fund shall consist of:

(a) Moneys deposited in the fund pursuant to ORS 468.135 and sections 28 and 29 of this 2020 Act;

(b) Moneys appropriated or otherwise transferred to the fund by the Legislative Assembly; and

(c) Other moneys deposited in the fund from any source.

(3) Civil penalties deposited in the fund under ORS 468.135 shall be deposited in a separate subaccount created in the fund and must be used only for providing technical assistance to covered entities.

(4) The proceeds from sales of allowances at the hard price ceiling pursuant to section 28 (9) of this 2020 Act shall be deposited in a separate subaccount created in the fund and must be used by the office only for the purchase and retirement of offset credits.

SECTION 32. Public records law; application. (1) The Legislative Assembly finds and declares that it is the policy of this state that the Oregon Greenhouse Gas Initiative operate free of abuse and disruptive activity. It is therefore the intent of the Legislative Assembly that the provisions of sections 4 to 32 of this 2020 Act be implemented in a manner necessary to prevent fraud, abuse or market manipulation to the greatest extent possible while upholding the public interest in transparency in public process and government by making certain market activity information available in aggregated form.

(2) The following information obtained by the State of Oregon under sections 4 to 32 of this 2020 Act or rules adopted under sections 4 to 32 of this 2020 Act shall be treated as confidential business informa-
tion, is exempt from disclosure under ORS 192.311 to 192.478 and may
not be disclosed to any person or entity except as provided in sub-
section (3) or (4) of this section:

(a) Individually identifiable information related to a registered
entity’s application to participate, and participation, in auctions held
under section 28 of this 2020 Act, including but not limited to bid ac-
tivity and auction results for the registered entity.

(b) Other individually identifiable information not described in
paragraph (a) of this subsection related to the holding, transfer or
surrender of compliance instruments by registered entities.

(c) Any individually identifiable information on the manufacturing
output of goods, other than emissions data reported under ORS
468A.280, obtained by the Office of Greenhouse Gas Regulation as
necessary to administer and implement sections 18, 19, 20, 23 and 24
of this 2020 Act.

(d) Individually identifiable information obtained by the office from
retail electricity consumers pursuant to a request under section 9 (4)
of this 2020 Act.

(3) Information described in subsection (2) of this section may be
used and disclosed in aggregated form.

(4) This section does not prohibit the disclosure of information be-
tween the office and other agencies of the executive department, as
defined in ORS 174.112, or to persons engaged by the State of Oregon
to provide administrative or technical services to support implement-
tation of sections 4 to 32 or 45 to 53 of this 2020 Act, if the disclosure
is necessary for purposes of the administration and implementation
of sections 4 to 32 or 45 to 53 of this 2020 Act.

(5) Any person to whom information described in subsection (2) of
this section is disclosed under subsection (4) of this section shall treat
the information as confidential business information, exempt from
disclosure under ORS 192.311 to 192.478. Redisclosure of individually
identifiable information outside the office remains subject to the provisions of this section.

INVESTMENT OF STATE PROCEEDS FROM OREGON GREENHOUSE GAS INITIATIVE AUCTIONS (Transportation Decarbonization Investments Account)

SECTION 33. Definitions. As used in sections 33 to 37 of this 2020 Act:

(1) “Building materials” means asphalt, cement, concrete or any other aggregate product, aluminum, steel, iron, coatings for steel and iron, glass, manufactured wood products and copper.

(2) “Contracting agency” has the meaning given that term in ORS 279A.010.

(3) “Local government” means a metropolitan service district, a metropolitan planning organization, a county or a city.

(4) “Metropolitan climate plan” means a plan that implements:

(a) A land use and transportation scenario adopted by a metropolitan service district as required under section 37, chapter 865, Oregon Laws 2009, and that has been approved by the Land Conservation and Development Commission;

(b) A land use and transportation scenario adopted by a metropolitan planning organization in accordance with the guidelines established by the Department of Transportation and the Department of Land Conservation and Development under ORS 184.893, and that has been approved by the Land Conservation and Development Commission; or

(c) A transportation greenhouse gas emissions reduction plan adopted by a county or city located outside an urbanized area covered by a metropolitan service district or a metropolitan planning organization and that has been approved by the Department of Land Con-
(5) “Metropolitan planning organization” has the meaning given that term in ORS 197.629, except that “metropolitan planning organization” does not mean an organization that coordinates transportation planning for an urbanized area that is also subject to the jurisdiction of a metropolitan service district.

(6) “Metropolitan service district” means a metropolitan service district organized under ORS chapter 268.

(7) “Nursery stock” has the meaning given that term in ORS 571.005.

(8) “Oregon Greenhouse Gas Initiative” has the meaning given that term in section 4 of this 2020 Act.

(9) “State contracting agency” has the meaning given that term in ORS 279A.010.

(10) “Subject to a carbon pricing program” means a building materials manufacturer whose emissions from the manufacture of goods:

   (a) Are subject to a tax or governmental regulatory program that has the effect of placing a price on greenhouse gas emissions and that is at least as stringent as the Oregon Greenhouse Gas Initiative, as determined by the Oregon Greenhouse Gas Reduction Board by rule;

   or

   (b) Are directly regulated by the jurisdiction where the manufacturing facility is located for the greenhouse gas emissions attributable to the manufacturing of goods at the facility operated by the manufacturer.

SECTION 34. Transportation Decarbonization Investments Account; rules. (1) The Transportation Decarbonization Investments Account is established as a separate account within the State Highway Fund. The account consists of moneys deposited in the account under sections 28 and 29 of this 2020 Act. Interest earned by the account shall be credited to the account.
(2) Moneys in the account are continuously appropriated to the Department of Transportation:

(a) For any necessary administration by the department of sections 2, 4 to 32, 33 to 37, 41 and 43 of this 2020 Act; and

(b) To be distributed for transportation projects pursuant to sections 33 to 37 of this 2020 Act.

(3) A transportation project may not be funded with moneys distributed from the account unless:

(a) The transportation project furthers one or more of the purposes set forth in section 2 of this 2020 Act; and

(b) The transportation project may be constitutionally funded by revenues described in Article IX, section 3a, of the Oregon Constitution.

(4) Of the moneys available in the account for distribution each biennium:

(a) 20 percent shall be used by the department for transportation projects selected by the Oregon Transportation Commission pursuant to section 35 of this 2020 Act; and

(b) 80 percent shall be distributed by the commission to local governments under section 36 of this 2020 Act for implementation, including planning for implementation, of metropolitan climate plans.

(5) The amount of moneys distributed to plan for implementation of metropolitan climate plans under subsection (4)(b) of this section may not exceed one percent of the amount of moneys deposited in the account each biennium.

(6) Examples of uses of moneys deposited in the account may include, but are not limited to, uses related to:

(a) Enhancing roadway drainage, improving slope stability, investment in the safe routes to schools program established under ORS 184.741, the repower, retrofit or replacement of certain diesel engines, reducing vehicle miles traveled through bike, pedestrian or other
multimodal improvements and traffic signal optimization; and

(b) Increasing the resilience of transportation infrastructure and evacuation routes against the effects of climate change, extreme precipitation, sea level rise and extreme temperatures and wildfires.

(7) Expenditures from the account shall, to the extent feasible and consistent with law, be in addition to and not in replacement of any existing allocation or appropriation for transportation projects.

(8) The commission may adopt rules as necessary for the administration and implementation of sections 33 to 37 of this 2020 Act.

SECTION 35. Selection of transportation projects by Oregon Transportation Commission. (1) The Oregon Transportation Commission shall select the transportation projects to be funded with moneys in the Transportation Decarbonization Investments Account pursuant to section 34 (4)(a) of this 2020 Act.

(2) Prior to selecting transportation projects, the commission shall seek input from the applicable area commission on transportation.

(3) In selecting transportation projects, the Oregon Transportation Commission shall:

(a) Consider whether a proposed transportation project will further the objectives of the statewide transportation strategy on greenhouse gas emissions adopted by the commission pursuant to ORS 184.617;

(b) Expend 90 percent of the moneys available under section 34 (4)(a) of this 2020 Act for transportation projects that serve areas for which a covered entity described in section 5 (2)(d) of this 2020 Act is not the beneficiary of allowances retired under section 13 of this 2020 Act; and

(c) Give priority to proposed transportation projects that will facilitate the planning or development of metropolitan climate plans by local governments that, as of the date of the selection, have not adopted metropolitan climate plans.

SECTION 36. Distribution of moneys to local governments. (1) A local government that, as of the date of the allocation, has adopted a
metropolitan climate plan shall be allocated a share of the moneys described in section 34 (4)(b) of this 2020 Act, to be used for implementation of the adopted plan.

(2) The proportionate share allocated for distribution to each eligible local government shall be determined by the Oregon Transportation Commission based on a formula that:

(a) Must account for population and vehicle miles traveled;

(b) Must result in 90 percent of the moneys available for distribution under section 34 (4)(b) of this 2020 Act being distributed for transportation projects that serve areas for which a covered entity described in section 5 (2)(d) of this 2020 Act is not the beneficiary of allowances retired under section 13 of this 2020 Act; and

(c) May incorporate any other factors relevant to the proportionate amount of greenhouse gas emissions attributable to transportation within the jurisdiction of each local government.

(3) Of the moneys allocated for a metropolitan service district or a metropolitan planning organization under subsection (1) of this section, the commission shall distribute half the moneys to the metropolitan service district or metropolitan planning organization and half the moneys to the counties and cities within the metropolitan service district or metropolitan planning organization. The proportionate share allocated for distribution to each county and city within the metropolitan service district or metropolitan planning organization shall be determined based on the formula provided in subsection (2) of this section.

(4) Moneys received by a local government under this section must be expended in a manner that, to the extent practicable, will yield the greatest reductions in greenhouse gas emissions per dollar spent. In allocating the moneys to specific expenditures:

(a) A metropolitan service district shall consult with a joint policy advisory committee on transportation;
(b) A county or city within a metropolitan service district shall consult with the metropolitan service district; and

(c) A metropolitan planning organization shall consult with the governing bodies of the counties or cities within the boundaries of the metropolitan planning organization.

SECTION 37. Procurement provisions. (1) Notwithstanding provisions of law requiring a contracting agency to award a contract to the lowest responsible bidder or best proposer or provider of a quotation, and except as provided in subsection (3) of this section or as prohibited by federal law, a state contracting agency, when using funds from the Transportation Decarbonization Investments Account established under section 34 of this 2020 Act, shall give a preference of not more than 10 percent to building materials procured from manufacturers subject to a carbon pricing program.

(2) Notwithstanding provisions of law requiring a contracting agency to award a contract to the lowest responsible bidder or best proposer or provider of a quotation, and except as provided in subsection (3) of this section or as prohibited by federal law, a contracting agency other than a state contracting agency, when using funds from the Transportation Decarbonization Investments Account, may give a preference of not more than 10 percent to building materials procured from manufacturers subject to a carbon pricing program.

(3) If the contracting agency finds in a written determination that the building material is not available in the quantity, quality, type or time frame required for the procurement, or if the cost of the building material is greater than 10 percent more than the building material costs from manufacturers not subject to a carbon pricing program, the contracting agency may decline to give the building material preference.

(4) If a transportation project selected by the Oregon Transportation Commission under section 35 of this 2020 Act involves the use of
roadside vegetation, the Department of Transportation shall purchase the roadside vegetation from nursery stock that is grown and propagated entirely within this state. The commission may specify by rule grades, standards, considerations and processes for roadside vegetation expenditures conducted pursuant to this subsection.

(5) This section does not apply to emergency work, minor alterations, ordinary repairs or maintenance work for public improvements or to other construction contracts described in ORS 279C.320 (1).

(Climate Investments Fund)

SECTION 38. Definitions. As used in sections 38 to 40 of this 2020 Act:

(1) “Building materials” means asphalt, cement, concrete or any other aggregate product, aluminum, steel, iron, coatings for steel and iron, glass, manufactured wood products and copper.

(2) “Contracting agency” has the meaning given that term in ORS 279A.010.

(3) “Eligible Indian Tribe” has the meaning given that term in section 4 of this 2020 Act.

(4) “Impacted community” has the meaning given that term in section 4 of this 2020 Act.

(5) “Natural and working lands” has the meaning given that term in section 4 of this 2020 Act.

(6) “Oregon Greenhouse Gas Initiative” has the meaning given that term in section 4 of this 2020 Act.

(7) “State contracting agency” has the meaning given that term in ORS 279A.010.

(8) “Subject to a carbon pricing program” means a building materials manufacturer whose emissions from the manufacture of goods:

(a) Are subject to a tax or governmental regulatory program that
has the effect of placing a price on greenhouse gas emissions and that
is at least as stringent as the Oregon Greenhouse Gas Initiative, as
determined by the Oregon Greenhouse Gas Reduction Board by rule;
or
(b) Are directly regulated by the jurisdiction where the manufac-
turing facility is located for the greenhouse gas emissions attributable
to the manufacturing of goods at the facility operated by the man-
ufacturer.

SECTION 39. Climate Investments Fund. (1) The Climate Invest-
ments Fund is established in the State Treasury, separate and distinct
from the General Fund. The Climate Investments Fund shall consist
of moneys deposited in the fund under sections 28 and 29 of this 2020
Act. Interest earned by the fund shall be credited to the fund.

(2) Moneys in the fund are continuously appropriated to the Office
of Greenhouse Gas Regulation to be distributed by the Oregon
Greenhouse Gas Reduction Board for use for programs, projects and
activities that further one or more of the purposes set forth in section
2 of this 2020 Act.

(3) Subject to subsection (2) of this section, the board shall distrib-
ute the moneys deposited in the fund each biennium as follows:
(a) 10 percent shall be distributed for uses that directly benefit eli-
gible Indian tribes;
(b) 25 percent shall be distributed to the Oregon Watershed En-
hancement Board for uses that benefit natural and working lands;
(c) 25 percent shall be distributed to the State Forestry Department
for wildfire mitigation efforts, including but not limited to projects
under the Good Neighbor Authority Agreement, as that term is de-
finied in ORS 526.275, and as informed by the recommendations of any
council formed by the Governor to address wildfire response;
(d) 20 percent shall be distributed to local governments, as that
term is defined in ORS 174.116, for programs, projects and activities
that further one or more of the purposes set forth in section 2 of this 2020 Act, with a priority given to programs, projects and activities that reduce greenhouse gas emissions; and

(e) 20 percent shall be distributed to agencies of state government for programs, projects and activities that further one or more of the purposes set forth in section 2 of this 2020 Act, with a priority given to programs, projects and activities that reduce greenhouse gas emissions.

(4) In addition to and not in lieu of the requirements set forth in subsection (3) of this section, the Oregon Greenhouse Gas Reduction Board shall endeavor to distribute the majority of the moneys deposited in the fund each biennium for uses that benefit impacted communities.

(5) Distributions from the fund shall, to the maximum extent feasible and consistent with law, be in addition to and not in replacement of any existing allocations or appropriations for programs, projects and activities.

SECTION 40. Procurement preferences. (1) Notwithstanding provisions of law requiring a contracting agency to award a contract to the lowest responsible bidder or best proposer or provider of a quotation, and except as provided in subsection (3) of this section or as prohibited by federal law, a state contracting agency, when using funds from the Climate Investments Fund established under section 39 of this 2020 Act, shall give a preference of not more than 10 percent to building materials procured from manufacturers subject to a carbon pricing program.

(2) Notwithstanding provisions of law requiring a contracting agency to award a contract to the lowest responsible bidder or best proposer or provider of a quotation, and except as provided in subsection (3) of this section or as prohibited by federal law, a contracting agency other than a state contracting agency, when using funds from
the Climate Investments Fund, may give a preference of not more than 10 percent to building materials procured from manufacturers subject to a carbon pricing program.

(3) If the contracting agency finds in a written determination that the building material is not available in the quantity, quality, type or time frame required for the procurement, or if the building material cost is greater than 10 percent more than the building material costs from manufacturers not subject to a carbon pricing program, the contracting agency may decline to give the building material preference.

(Labor and Contracting Provisions)

SECTION 41. (1) If a construction project or a transportation project receives more than $50,000 in funding from moneys in the Climate Investments Fund established under section 39 of this 2020 Act or the Transportation Decarbonization Investments Account established under section 34 of this 2020 Act, the primary contractor participating in the construction project:

(a) Shall pay the prevailing rate of wage for an hour’s labor in the same trade or occupation in the locality where the labor is performed;

(b) Shall offer health care and retirement benefits to the employees performing the labor on the construction project;

(c) Shall participate in an apprenticeship program registered with the State Apprenticeship and Training Council;

(d) May not be a contractor listed by the Commissioner of the Bureau of Labor and Industries under ORS 279C.860 as ineligible to receive a contract or subcontract for public works;

(e) Must demonstrate a history of material compliance with the rules and other requirements of the Construction Contractors Board and of the Workers’ Compensation Division, the Building Codes Divi-
sion and the Occupational Safety and Health Division of the Depart-
ment of Consumer and Business Services; and

(f) Must demonstrate a history of compliance with federal and state
wage and hour laws.

(2) A farm labor contractor, as defined in ORS 658.405, may not re-
ceive moneys distributed from the Climate Investments Fund or the
Transportation Decarbonization Investments Account unless the farm
labor contractor is in compliance with all licensing and any other re-
quirements or regulations imposed upon farm labor contractors pur-
suant to ORS 658.405 to 658.511.

(3)(a) The Oregon Department of Administrative Services, in con-
sultation with the Attorney General, shall adopt model rules that
specify labor, workforce and contracting procedures for state agencies
to use in administering funds for construction projects that receive
more than $50,000 in funding from moneys in the Climate Investments
Fund or the Transportation Decarbonization Investments Account.
The department shall adopt the rules in accordance with ORS chapter
183.

(b) Model rules adopted under this subsection shall require the use
of a project labor agreement for construction projects that receive
more than $200,000 in funding from moneys in the Climate Investments
Fund or the Transportation Decarbonization Investments Account.
For all other construction projects funded as described in paragraph
(a) of this subsection, the model rules shall:

(A) Establish measurable, enforceable goals for the training and
hiring of persons who are members of impacted communities, as de-
dined in section 4 of this 2020 Act, and for contracting with businesses
that are owned or operated by members of impacted communities; and

(B) Establish wage, benefit and labor relations standards consistent
with the provisions of this section.

(c) The model rules shall promote best practices in procurement
and contracting.

(d)(A) The model rules shall require that, in each contract awarded by a state agency for a construction project funded as described in paragraph (a) of this subsection, cement, concrete, steel, iron, coatings for steel and iron and manufactured products that the contractor purchases for the project and that become part of a permanent structure must be produced in the United States.

(B) The requirement in subparagraph (A) of this paragraph shall not apply if the administering agency finds that:

(i) The requirement is inconsistent with the public interest;

(ii) Cement, concrete, steel, iron, coatings for steel and iron and manufactured products required for the project are not produced in the United States in sufficient and reasonably available quantities and with satisfactory quality; or

(iii) The requirement set forth in subparagraph (A) of this paragraph will increase the costs of the project, exclusive of labor costs involved in final assembly for manufactured products, by 25 percent or more.

(C) Notwithstanding a finding by the administering agency under subparagraph (B) of this paragraph, a contractor shall spend at least 75 percent of the total amount the contractor spends in connection with the construction project on cement, concrete, steel, iron, coatings for steel and iron and manufactured products that become part of a permanent structure on purchasing cement, concrete, steel, iron, coatings for steel and iron and manufactured products that are produced in the United States.

(e) Before adopting or amending a rule under this subsection, the department shall consult with representatives of labor, contractors and other knowledgeable persons.

(4) Except as provided in subsection (5) of this section, a state agency charged with administering funds for construction projects
that receive more than $50,000 in funding from moneys in the Climate Investments Fund or the Transportation Decarbonization Investments Account may not adopt the administering agency’s own rules for labor and workforce procedures related to administering funds allocated from the Climate Investments Fund or the Transportation Decarbonization Investments Account and shall be subject to the model rules adopted by the Oregon Department of Administrative Services under subsection (3) of this section.

(5) The Department of Transportation may adopt the department’s own rules specifying labor, workforce and contracting procedures for use in administering funds for transportation projects that receive more than $50,000 in funding from moneys in the Transportation Decarbonization Investments Account. Rules adopted by the department pursuant to this subsection must meet the requirements of subsection (3) of this section.

(Common School Fund)

SECTION 42. Moneys deposited in the Common School Fund under sections 28 and 29 of this 2020 Act are continuously appropriated to the Department of State Lands to be used in a manner that:

(1) Is consistent with the requirements of the Oregon Constitution; and

(2) Furthers one or more of the purposes set forth in section 2 of this 2020 Act.

(Biennial Expenditure Reporting and Auditing)

SECTION 43. (1) All agencies of the executive department as defined in ORS 174.112, counties, cities and all other public and private entities receiving moneys from the Climate Investments Fund shall annually
report to the Office of Greenhouse Gas Regulation on the expenditure of the moneys received and the results of the expenditures. No later than January 1 of each even-numbered year, the office shall deliver a biennial report, in the manner provided in ORS 192.245, to the Governor and the Legislative Assembly describing:

(a) The investments from the Climate Investments Fund;
(b) Whether the investments met the requirements of section 39 of this 2020 Act; and
(c) The effectiveness of those investments in furthering the purposes set forth in section 2 of this 2020 Act.

(2) All agencies of the executive department, metropolitan service districts, metropolitan planning organizations, counties, cities and all other public entities receiving moneys from the Transportation Decarbonization Investments Account shall annually report to the Department of Transportation on the expenditure of the moneys received and the results of the expenditures. No later than January 1 of each even-numbered year, the department shall deliver a biennial report, in the manner provided in ORS 192.245, to the Oregon Transportation Commission, the Governor and the Legislative Assembly describing:

(a) The transportation projects funded by moneys from the Transportation Decarbonization Investments Account;
(b) How the transportation projects met the requirements of section 34 of this 2020 Act; and
(c) The effectiveness of the transportation projects in furthering the purposes set forth in section 2 of this 2020 Act.

(3) Notwithstanding sections 33 to 37 and 39 of this 2020 Act, any agency of the executive department, metropolitan service district, metropolitan planning organization, county, city or other public or private entity failing to file a report under this section may not receive any payments from the Climate Investments Fund or the Transporta-
tion Decarbonization Investments Account until the report is filed.

(4)(a) The office and the department jointly shall select an independent third-party organization to prepare a biennial compliance audit of:

(A) All programs, projects or activities funded by moneys from the Climate Investments Fund; and

(B) All transportation projects funded by moneys from the Transportation Decarbonization Investments Account.

(b) The office and the department shall provide for the audit report prepared by the independent third-party organization under this subsection to be transmitted, together with the reports required under subsections (1) and (2) of this section, to the Oregon Transportation Commission, the Governor and the Legislative Assembly.

PROVISIONS RELATED TO THE PUBLIC UTILITY COMMISSION

SECTION 44. Sections 45 to 53, 55 and 56 of this 2020 Act are added to and made a part of ORS chapter 757.

SECTION 45. Definitions. As used in sections 45 to 53 of this 2020 Act:

(1) “Allowance” has the meaning given that term in section 4 of this 2020 Act.

(2) “Electric company” has the meaning given that term in ORS 757.600.

(3) “Natural gas utility” means a natural gas utility regulated by the Public Utility Commission under ORS chapter 757.

(4) “Oregon Greenhouse Gas Initiative” has the meaning given that term in section 4 of this 2020 Act.

(5) “Trade-exposed natural gas user” has the meaning given that term in section 4 of this 2020 Act.

SECTION 46. Use of certain allowance sale proceeds by electric
companies. (1) If, rather than surrendering the allowances to fulfill its compliance obligation under the Oregon Greenhouse Gas Initiative, an electric company sells allowances that were directly distributed at no cost to the electric company under section 14 of this 2020 Act, the Public Utility Commission shall require the proceeds received by the electric company through the sale:

(a) To be spent by the electric company for the exclusive benefit of retail customers that are supplied electricity by the electric company; and

(b) To be used only for activities that serve to reduce greenhouse gas emissions or provide assistance to the electric company’s retail customers, in furtherance of the purposes set forth in section 2 of this 2020 Act.

(2) Subject to subsection (1) of this section, an electric company shall prioritize the use of proceeds received by the electric company from the sale of allowances that were directly distributed at no cost to the electric company for:

(a) Providing weatherization, energy efficiency improvements, bill assistance or rate assistance to the electric company’s low-income residential customers;

(b) Accelerated transportation electrification;

(c) Investments and activities that serve to reduce greenhouse gas emissions through actions such as energy efficiency improvements, voltage optimization, portfolio optimization and renewable energy procurement; and

(d) Facilitating integration and utilization of variable energy resources through investments in programs and technologies such as demand response, smart grid communication and control systems, grid-connected end uses and energy storage.

(3) An electric company that receives allowances directly distributed at no cost under section 14 of this 2020 Act shall develop a plan
for the use of the allowances and file the plan with the commission. The plan must be revised and updated on a schedule established by the commission by rule. At a minimum, a plan must contain:

(a) A strategy for the use of proceeds received by the electric company from the sale of the allowances in compliance with this section; and

(b) A description of any previous uses of proceeds received by the electric company from the sale of the allowances.

(4) The commission shall, pursuant to ORS 756.040 and after consultation with the Housing and Community Services Department, adopt rules for the implementation and enforcement of this section.

SECTION 47. An electric company shall develop and file with the Public Utility Commission an initial plan under section 46 of this 2020 Act no later than December 31, 2022.

SECTION 48. Trust accounts. (1)(a) The Public Utility Commission, as trustee, shall establish a separate trust account with the State Treasurer for the benefit of each natural gas utility regulated under the Oregon Greenhouse Gas Initiative. Moneys in each trust account shall consist of proceeds due to the natural gas utility from the sale at auction of allowances consigned to the state under section 17 of this 2020 Act. The State Treasurer may invest moneys deposited in the trust accounts as provided in ORS 293.701 to 293.857. Interest earned by a trust account must be credited to the account.

(b) Upon request by a natural gas utility, the commission shall require the State Treasurer to transfer from the natural gas utility’s trust account to the natural gas utility amounts necessary to pay for programs or activities found to be consistent with the plan required under subsection (2) of this section.

(c) Upon making the determinations required by subsections (3) and (4) of this section, the commission shall direct the State Treasurer to transfer amounts from a natural gas utility’s trust account to the

[69]
natural gas utility or a designee of the natural gas utility necessary
for use consistent with subsections (3) and (4) of this section.

(2) A natural gas utility shall develop a plan for use of moneys in
the trust account for the benefit of the natural gas utility’s sales
customers. The natural gas utility shall file the plan for acknowledg-
ment with the commission as part of each of the natural gas utility’s
integrated resource plan filings, as further specified by the commission
by rule. A plan must:

(a) Identify a portfolio of approaches in furtherance of the purposes
set forth in section 2 of this 2020 Act;

(b) Provide that no less than 25 percent of the proceeds from the
sale of allowances directly distributed to the natural gas utilities pur-
suant to section 17 (1)(b) of this 2020 Act be used for nonvolumetric
bill credits or other rate relief for residential, commercial and indus-
trial sales customers; and

(c) Address the impacts of the regulated emissions attributable to
the natural gas utility with due consideration of the risks associated
with climate change and the need for urgent action to address
greenhouse gas emissions reductions, through one or more of the fol-
lowing approaches:

(A) Implementing programs, activities or technologies designed to
reduce greenhouse gas emissions from sales customers, including
programs for low and moderate income residential sales customers;

(B) Developing renewable natural gas or renewable hydrogen
infrastructure and the provision of renewable natural gas or renewable
hydrogen to the natural gas utility’s sales customers;

(C) Providing renewable thermal resources for sales customers;

(D) Providing natural gas or renewable natural gas to vehicles and
the necessary related infrastructure in the utility’s service territory
as consistent with section 56 of this 2020 Act;

(E) Implementing pilot projects or research, development and dem-
onstration activities to determine the cost and viability of activities
described in subparagraphs (A) to (D) of this paragraph; or
(F) Contributing to a state grant or loan program for financing
projects or upgrades to reduce greenhouse gas emissions for industrial
or commercial sales customers.
(3)(a) Subject to paragraph (b) of this subsection, the commission
shall determine the amounts of the proceeds from the sale of allow-
ances directly distributed to natural gas utilities pursuant to section
17 (1)(c) of this 2020 Act to be used for each of the following purposes:
(A) Providing nonvolumetric bill credits or other rate relief for na-
tural gas transportation customers of the natural gas utility;
(B) Implementing programs, activities or technologies, which may
include cost-effective projects for switching to the use of lower-
carbon-emitting fuels, designed to reduce greenhouse gas emissions
attributable to commercial and industrial natural gas transportation
customers; and
(C) Contributing to a state grant or loan program for financing
projects or upgrades, which may include cost-effective projects for
switching to the use of lower-carbon-emitting fuels, to reduce
greenhouse gas emissions for natural gas transportation customers.
(b) No less than 25 percent of the proceeds described in this sub-
section must be used for rate relief as described in paragraph (a)(A)
of this subsection. The commission shall set the level of rate relief as
part of the tariff between the transportation customer and the natural
gas utility. In setting the level of rate relief, the commission shall
consider:
(A) The availability of reasonable opportunities for natural gas
transportation customers of the natural gas utility to reduce
greenhouse gas emissions, including but not limited to opportunities
for investments in energy efficiency; and
(B) Competitive considerations related to natural gas service
options.

(4) The commission shall determine the amounts of the proceeds from the sale of allowances directly distributed to natural gas utilities pursuant to section 17 (1)(d) of this 2020 Act to be used for the benefit of trade-exposed natural gas users consistent with section 50 of this 2020 Act.

(5)(a) The proceeds described in subsections (2) and (3) of this section may not be used for the benefit of natural gas transportation customers that are also trade-exposed natural gas users.

(b) A natural gas utility, upon approval by the commission, may select one or more third parties to implement a program described in subsection (2)(c)(A) or (3)(a)(B) of this section.

(6) The commission may adopt rules for the implementation and enforcement of this section and section 50 of this 2020 Act, including but not limited to a process for trade-exposed natural gas users to appeal from the approval or disapproval of an energy management system audit or implementation plan under section 50 of this 2020 Act.

SECTION 49. A natural gas utility shall develop and file with the Public Utility Commission an initial plan under section 48 (2) of this 2020 Act no later than June 30, 2022.

SECTION 50. (1) In 2022 and each following calendar year before 2025, a trade-exposed natural gas user shall receive rate relief in each year equal to the amount of revenue generated by the sale at auction of the allowances allocated to the natural gas utility on behalf of that user under section 17 (1)(d) of this 2020 Act for that year.

(2)(a) In 2025 and each following calendar year before 2051, and except as provided in paragraph (b) of this subsection, the amount of rate relief received by a trade-exposed natural gas user shall decline annually by a constant amount proportionate to the decline in the number of allowances available in annual allowance budgets pursuant to section 5 (1)(b) of this 2020 Act.
(b) If a trade-exposed natural gas user is in compliance with an approved energy management system audit and implementation plan subject to subsection (3) of this section, the trade-exposed natural gas user shall receive rate relief during the following years in the following amounts:

(A) In 2025 and each year before 2030, the rate relief shall be equal to the amount of revenue generated by the sale at auction of the allowances allocated to the natural gas utility on behalf of that user under section 17 (1)(d) of this 2020 Act for that year; and

(B) In 2030 and each year before 2051, the rate relief shall be equal to 97 percent of the amount of revenue generated by the sale at auction of the allowances allocated to the natural gas utility on behalf of that user under section 17 (1)(d) of this 2020 Act for that year.

(3)(a) A trade-exposed natural gas user may, no later than December 31, 2024, and once every five years thereafter, submit to the Public Utility Commission a completed energy management system audit and implementation plan for approval.

(b) The commission shall approve an energy management system audit and implementation plan if:

(A) The audit meets the requirements of subsection (4) of this section; and

(B) The implementation plan identifies how the trade-exposed natural gas user will complete all efficiency improvements identified in the audit report that are related to natural gas use and that have a payback period of five years or less by:

(i) Two years after the date of the audit; or

(ii) A reasonable extension date not to exceed four years after the date of the audit, if the commission determines that additional time is reasonable and necessary for the trade-exposed natural gas user to complete the efficiency improvements.

(c) In determining the payback period for an efficiency improve-
ment identified in an audit report, the commission shall consider any grants or loans for completing the efficiency improvement received by the trade-exposed natural gas user from the Traded Sector Greenhouse Gas Reduction Program Fund established under section 51 of this 2020 Act.

(d) An approved energy management system audit and implementation plan shall be valid for five years.

(4) An energy management system audit must adhere to established federal or international standards for developing plans identifying energy efficiency opportunities and related best practices for commercial, industrial and institutional facilities, as the commission may further identify by rule, in consultation with the Office of Greenhouse Gas Regulation. The elements of an audit shall include but need not be limited to:

(a) A visual inspection of the relevant source or sources of greenhouse gas emissions for the facility subject to the audit;

(b) An evaluation of the operating characteristics of the emission sources, operation and maintenance procedures at the facility and unusual operating constraints;

(c) An inventory of the major onsite energy use systems at the facility;

(d) A review of the architectural and engineering plans for the facility, the facility's operation and maintenance procedures and logs, and the fuel usage of the facility;

(e) A review of the facility's energy management program and recommendations for improvements to the program;

(f) A review of opportunities for the facility to switch to the use of fuels that are less greenhouse gas emissions intensive;

(g) A list of energy conservation measures that are within the facility's control to implement;

(h) An evaluation of the energy savings potential of implementing
the energy conservation measures listed under paragraph (g) of this subsection; and

(i) A comprehensive audit report detailing ways to improve the efficiency of the facility, the cost of any specific improvements identified in the report, the benefits of the identified improvements and the time frame for recouping the investments in the identified improvements.

(5) Beginning in 2030, the commission shall annually direct any proceeds described in section 48 (4) of this 2020 Act that are not used for rate relief under subsection (2) of this section to be deposited in the Traded Sector Greenhouse Gas Reduction Program Fund.

(6) The commission may contract with an independent third-party entity to review and approve energy management system audits and implementation plans under this section.

SECTION 51. (1) The Traded Sector Greenhouse Gas Reduction Program Fund is established in the State Treasury, separate and distinct from the General Fund. Interest earned by the Traded Sector Greenhouse Gas Reduction Program Fund shall be credited to the fund. Moneys in the fund are continuously appropriated to the Public Utility Commission for the purpose of making grants and loans under subsection (3) of this section.

(2) The fund shall consist of:

(a) Moneys deposited in the fund pursuant to section 50 of this 2020 Act;

(b) Moneys appropriated or otherwise transferred to the fund by the Legislative Assembly; and

(c) Other moneys deposited in the fund from any source.

(3) The commission shall adopt by rule a program for making grants and loans from moneys deposited in the fund available to trade-exposed natural gas users and EITE entities described in section 24 of this 2020 Act. Grants and loans made under the program may be used for financing projects or upgrades, which may include cost-
effective projects for switching to the use of lower-carbon-emitting fuels, that will result in reductions in greenhouse gas emissions.

(4) The commission may contract with an independent third-party entity to administer the program adopted by rule under this section.

SECTION 52. No later than September 15 of each even-numbered year, the Public Utility Commission shall, in the manner provided by ORS 192.245, provide a report to the Legislative Assembly and to the Office of Greenhouse Gas Regulation on:

(1) How electric companies have made use of allowances that were directly distributed at no cost to each electric company, including a description of how any proceeds received by the electric company from the sale of the allowances were used; and

(2) How natural gas utilities and any designees of the natural gas utilities have expended proceeds from the sale of allowances consigned to the office for auction by the natural gas utilities pursuant to section 17 of this 2020 Act.

SECTION 53. The Public Utility Commission shall establish processes and mechanisms to ensure timely cost recovery for prudent and reasonable costs incurred by public utilities associated with compliance with the Oregon Greenhouse Gas Initiative. The processes and mechanisms shall be established to address situations in which compliance with the Oregon Greenhouse Gas Initiative results in public utilities incurring costs for which cost recovery mechanisms otherwise authorized by law are not adequate.

SECTION 54. ORS 757.259 is amended to read:

757.259. (1) In addition to powers otherwise vested in the Public Utility Commission, and subject to the limitations contained in this section, under amortization schedules set by the commission, a rate or rate schedule:

(a) May reflect:

(A) Amounts lawfully imposed retroactively by order of another governmental agency; or
(B) Amounts deferred under subsection (2) of this section.

(b) Shall reflect amounts deferred under subsection (3) of this section if the public utility so requests.

(2) Upon application of a utility or ratepayer or upon the commission’s own motion and after public notice, opportunity for comment and a hearing if any party requests a hearing, the commission by order may authorize deferral of the following amounts for later incorporation in rates:

(a) Amounts incurred by a utility resulting from changes in the wholesale price of natural gas or electricity approved by the Federal Energy Regulatory Commission;

(b) Balances resulting from the administration of Section 5(c) of the Pacific Northwest Electric Power Planning and Conservation Act of 1980;

(c) Direct or indirect costs arising from any purchase made by a public utility from the Bonneville Power Administration pursuant to ORS 757.663, provided that such costs shall be recovered only from residential and small-farm retail electricity consumers;

(d) Amounts accruing under a plan for the protection of short-term earnings under ORS 757.262 (2); or

(e) Identifiable utility [expenses] costs or revenues, including the cost of capital, the recovery or refund of which the commission finds should be deferred in order to minimize the frequency of rate changes or the fluctuation of rate levels or to match appropriately the costs borne by and benefits received by ratepayers.

(3) Upon request of the public utility, the commission by order shall allow deferral of amounts provided as financial assistance under an agreement entered into under ORS 757.072 for later incorporation in rates.

(4) The commission may authorize deferrals under subsection (2) of this section beginning with the date of application, together with interest established by the commission. A deferral may be authorized for a period not to exceed 12 months beginning on or after the date of application. However, amounts deferred under subsection (2)(c) and (d) or (3) of this section are not
subject to subsection (5), (6), (7), (8) or (10) of this section, but are subject
to such limitations and requirements that the commission may prescribe and
that are consistent with the provisions of this section.

(5) Unless subject to an automatic adjustment clause under ORS 757.210
(1), amounts described in this section shall be allowed in rates only to the
extent authorized by the commission in a proceeding under ORS 757.210 to
change rates and upon review of the utility’s earnings at the time of appli-
cation to amortize the deferral. The commission may require that amorti-
zeation of deferred amounts be subject to refund. The commission’s final
determination on the amount of deferrals allowable in the rates of the utility
is subject to a finding by the commission that the amount was prudently
incurred by the utility.

(6) Except as provided in subsections (7), (8) and (10) of this section, the
overall average rate impact of the amortizations authorized under this sec-
tion in any one year may not exceed three percent of the utility’s gross
revenues for the preceding calendar year.

(7) The commission may allow an overall average rate impact greater than
that specified in subsection (6) of this section for natural gas commodity and
pipeline transportation costs incurred by a natural gas utility if the com-
mission finds that allowing a higher amortization rate is reasonable under
the circumstances.

(8) The commission may authorize amortizations for an electric utility
under this section with an overall average rate impact not to exceed six
percent of the electric utility’s gross revenues for the preceding calendar
year. If the commission allows an overall average rate impact greater than
that specified in subsection (6) of this section, the commission shall estimate
the electric utility’s cost of capital for the deferral period and may also
consider estimated changes in the electric utility’s costs and revenues during
the deferral period for the purpose of reviewing the earnings of the electric
utility under the provisions of subsection (5) of this section.

(9) The commission may impose requirements similar to those described
in subsection (8) of this section for the amortization of other deferrals under this section, but may not impose such requirements for deferrals under subsection (2)(c) or (d) or (3) of this section.

(10) The commission may authorize amortization of a deferred amount for an electric utility under this section with an overall average rate impact greater than that allowed by subsections (6) and (8) of this section if:

(a) The deferral was directly related to extraordinary power supply expenses incurred during 2001;

(b) The amount to be deferred was greater than 40 percent of the revenue received by the electric utility in 2001 from Oregon customers; and

(c) The commission determines that the higher rate impact is reasonable under the circumstances.

(11) If the commission authorizes amortization of a deferred amount under subsection (10) of this section, an electric utility customer that uses more than one average megawatt of electricity at any site in the immediately preceding calendar year may prepay the customer’s share of the deferred amount. The commission shall adopt rules governing the manner in which:

(a) The customer’s share of the deferred amount is calculated; and

(b) The customer’s rates are to be adjusted to reflect the prepayment of the deferred amount.

(12) The provisions of this section do not apply to a telecommunications utility.

SECTION 55. The Public Utility Commission may, in such manner as the commission considers proper, allow a rate or rate schedule of a public utility to include differential rates or to reflect amounts for programs that enable the public utility to assist low-income residential customers. Rates or rate schedules allowed under this section must minimize shifting costs to ratepayers that do not qualify for low-income assistance.

SECTION 56. (1) As used in this section:

(a) “Electric company” has the meaning given that term in ORS
(b) “Natural gas utility” means a natural gas utility regulated by the Public Utility Commission under ORS chapter 757.

(2) The Public Utility Commission may allow an electric company or natural gas utility to recover costs from all consumers for prudent investments in or expenses for infrastructure measures that support the adoption of alternative forms of transportation vehicles if the investments are consistent with and meet the requirements of subsection (3) of this section. An investment described in this section by an electric company may involve investments behind the customer meter.

(3) An investment in infrastructure measures that support the adoption of alternative forms of transportation vehicles is a utility service and a benefit to utility ratepayers if:

(a) The infrastructure measures will support the adoption of alternative forms of transportation vehicles that are powered by electricity, compressed natural gas or hydrogen; and

(b) The investment can be reasonably anticipated to:

(A) Cost-effectively reduce transportation sector greenhouse gas emissions over time; and

(B) Benefit the electric company’s or natural gas utility’s customers in ways that may include, but need not be limited to:

(i) Distribution or transmission management benefits;

(ii) System efficiencies or other economic values inuring to the benefit of ratepayers over the long term;

(iii) Revenues to electric companies from electric vehicle charging to offset the electric company’s fixed costs that may otherwise be charged to customers; or

(iv) Increased ratepayer choice by providing greater deployment of a variety of fueling technologies to increase availability and access to publicly available fueling stations for alternative forms of transporta-
tion vehicles.

GREENHOUSE GAS EMISSIONS REGISTRATION AND REPORTING

SECTION 57. ORS 468A.280 is amended to read:

468A.280. [(1) In addition to any registration and reporting that may be required under ORS 468A.050, the Environmental Quality Commission by rule may require registration and reporting by:]

(1) As used in this section, “greenhouse gas” has the meaning given that term in section 4 of this 2020 Act.

(2) The Environmental Quality Commission by rule may require registration and reporting of information necessary to determine greenhouse gas emissions by:

(a) A person in control of an air contamination source of any class for which registration and reporting is required under ORS 468A.050.

[(a)] (b) [Any] A person who imports, sells, allocates or distributes electricity for use in this state [electricity, the generation of which emits greenhouse gases].

[(b)] (c) [Any] A person who imports, sells or distributes for use in this state [fossil] fuel that generates greenhouse gases when combusted.

(3) A person required to register and report under subsection (2) of this section shall register with the Department of Environmental Quality and make reports containing information that the commission by rule may require that is relevant to determining and verifying greenhouse gas emissions. The commission may by rule require the person to provide an audit by an independent and disinterested third party to verify that the greenhouse gas emissions information reported by the person is true and accurate.

[(2)] (4) Rules adopted by the commission under this section for electricity that is imported, sold, allocated or distributed for use in this state may require reporting of information necessary to determine greenhouse gas emis-
sions from generating facilities used to produce the electricity and related
electricity transmission line losses.

[(3)(a)] (5)(a) The commission shall allow consumer-owned utilities, as
defined in ORS 757.270, to comply with reporting requirements imposed under
this section by the submission of a report prepared by a third party. A report
submitted under this paragraph may include information for more than one
consumer-owned utility, but must include all information required by the
commission for each individual utility.

(b) For the purpose of determining greenhouse gas emissions related to
electricity purchased from the Bonneville Power Administration by a
consumer-owned utility, as defined in ORS 757.270, the commission may re-
quire only that the utility report:

(A) The number of megawatt-hours of electricity purchased by the utility
from the Bonneville Power Administration, segregated by the types of con-
tracts entered into by the utility with the Bonneville Power Administration;
and

(B) The percentage of each fuel or energy type used to produce electricity
purchased under each type of contract.

[(4)(a)] (6)(a) Rules adopted by the commission pursuant to this section
for electricity that is purchased, imported, sold, allocated or distributed for
use in this state by an electric company, as defined in ORS 757.600, must be
limited to the reporting of:

(A) The generating facility fuel type and greenhouse gas emissions
emitted from generating facilities owned or operated by the electric company;

(B) The number of megawatt-hours of electricity generated by the
electric company for use in this state;

[(B)] (C) Greenhouse gas emissions emitted from transmission equipment
owned or operated by the electric company;

[(C)] (D) The number of megawatt-hours of electricity purchased by the
electric company for use in this state, including information, if known, on:

(i) The seller of the electricity to the electric company; and
(ii) The original generating facility fuel type or types; and

[(D)] (E) An estimate of the amount of greenhouse gas emissions, using

default greenhouse gas emissions factors established by the commission by

rule,] attributable to:

(i) Electricity purchases made by a particular seller to the electric com-

pany;

(ii) Electricity purchases from an unknown origin or from a seller who

is unable to identify the original generating facility fuel type or types;

[(iii) Electricity purchases for which a renewable energy certificate under

ORS 469A.130 has been issued but subsequently transferred or sold to a person

other than the electric company;]

[(iv)] (iii) Electricity transmitted for others by the electric company; and

[(v)] (iv) Total energy losses from electricity transmission and distrib-

ution equipment owned or operated by the electric company.

(b) Pursuant to paragraph (a) of this subsection, a [multijurisdictional]

multistate jurisdictional electric company may rely upon a cost allocation

methodology approved by the Public Utility Commission for reporting emis-

sions allocated in this state.

[(5)] (7) Rules adopted by the commission under this section for [fossil]

fuel that is imported, sold or distributed for use in this state may require

reporting of the type and quantity of the fuel and any additional information

necessary to determine the [carbon content] greenhouse gas emissions as-

sociated with the use or combustion of the fuel. [For the purpose of de-

termining greenhouse gas emissions related to liquefied petroleum gas, the

commission shall allow reporting using publications or submission of data by

the American Petroleum Institute but may require reporting of such other in-

formation necessary to achieve the purposes of the rules adopted by the com-

mission under this section.]

[(6)] (8) To an extent that is consistent with the purposes of the rules

adopted by the commission under this section, the commission shall minimize

the burden of the reporting required under this section by:
(a) Allowing concurrent reporting of information that is also reported to another state agency;

(b) Allowing electronic reporting;

(c) Allowing use of good engineering practice calculations in reports, or of emission factors published by the United States Environmental Protection Agency;

(d) Establishing thresholds for the amount of specific greenhouse gases that may be emitted or generated without reporting;

(e) Requiring reporting by the fewest number of persons in a fuel distribution system that will allow the commission to acquire the information needed by the commission; or

(f) Other appropriate means and procedures determined by the commission.

[(7) As used in this section, “greenhouse gas” has the meaning given that term in ORS 468A.210.]

(9) The commission may adjust by rule the registration and reporting requirements under subsection (2) of this section if necessary to accommodate participation in an energy imbalance market by persons that import, sell, allocate or distribute electricity, or as necessary to otherwise address developments in electricity markets.

(10) The department may require a person for which registration and reporting is required under subsection (2) of this section to provide any pertinent records related to verification of greenhouse gas emissions in order to determine compliance with and to enforce this section and rules adopted pursuant to this section.

(11) If a person required to register and report under subsection (2) of this section fails to submit a report under this section, the department may develop an assigned emissions level for the person if necessary for the purpose of regulating persons under sections 4 to 32 of this 2020 Act.

(12)(a) By rule, the commission may establish a schedule of fees for
registration and reporting under this section. Before establishing fees under this subsection, the commission shall consider the total fees for each person subject to registration and reporting under this section.

(b) The commission shall limit the fees established under this subsection to the anticipated cost of developing, implementing and analyzing data collected under greenhouse gas emissions registration and reporting programs.

(13) Emissions data submitted to the department under this section is public information and may not be designated as confidential for purposes of disclosure under ORS 192.311 to 192.478.

ENERGY FACILITY CARBON DIOXIDE EMISSIONS STANDARDS
(Repeal of Carbon Dioxide Emissions Standards)

SECTION 58. ORS 469.503 is amended to read:

469.503. In order to issue a site certificate, the Energy Facility Siting Council shall determine that the preponderance of the evidence on the record supports the following conclusions:

(1) The facility complies with the applicable standards adopted by the council pursuant to ORS 469.501 or the overall public benefits of the facility outweigh any adverse effects on a resource or interest protected by the applicable standards the facility does not meet.

[(2) If the energy facility is a fossil-fueled power plant, the energy facility complies with any applicable carbon dioxide emissions standard adopted by the council or enacted by statute. Base load gas plants shall comply with the standard set forth in subsection (2)(a) of this section. Other fossil-fueled power plants shall comply with any applicable standard adopted by the council by rule pursuant to subsection (2)(b) of this section. Subsections (2)(c) and (d) of this section prescribe the means by which an applicant may comply with the applicable standard.]

[(a) The net carbon dioxide emissions rate of the proposed base load gas]
plant shall not exceed 0.70 pounds of carbon dioxide emissions per kilowatt hour of net electric power output, with carbon dioxide emissions and net electric power output measured on a new and clean basis. Notwithstanding the foregoing, the council may by rule modify the carbon dioxide emissions standard for base load gas plants if the council finds that the most efficient standalone combined cycle, combustion turbine, natural gas-fired energy facility that is commercially demonstrated and operating in the United States has a net heat rate of less than 7,200 Btu per kilowatt hour higher heating value adjusted to ISO conditions. In modifying the carbon dioxide emission standard, the council shall determine the rate of carbon dioxide emissions per kilowatt hour of net electric output of such energy facility, adjusted to ISO conditions, and reset the carbon dioxide emissions standard at 17 percent below this rate.

[(b) The council shall adopt carbon dioxide emissions standards for other types of fossil-fueled power plants. Such carbon dioxide emissions standards shall be promulgated by rule. In adopting or amending such carbon dioxide emissions standards, the council shall consider and balance at least the following principles, the findings on which shall be contained in the rulemaking record:]  

[(A) Promote facility fuel efficiency;]  
[(B) Promote efficiency in the resource mix;]  
[(C) Reduce net carbon dioxide emissions;]  
[(D) Promote cogeneration that reduces net carbon dioxide emissions;]  
[(E) Promote innovative technologies and creative approaches to mitigating, reducing or avoiding carbon dioxide emissions;]  
[(F) Minimize transaction costs;]  
[(G) Include an alternative process that separates decisions on the form and implementation of offsets from the final decision on granting a site certificate;]  
[(H) Allow either the applicant or third parties to implement offsets;]  
[(I) Be attainable and economically achievable for various types of power
plants;]
[(J) Promote public participation in the selection and review of offsets;]
[(K) Promote prompt implementation of offset projects;]
[(L) Provide for monitoring and evaluation of the performance of offsets; and]
[(M) Promote reliability of the regional electric system.]
[(c) The council shall determine whether the applicable carbon dioxide emissions standard is met by first determining the gross carbon dioxide emissions that are reasonably likely to result from the operation of the proposed energy facility. Such determination shall be based on the proposed design of the energy facility. The council shall adopt site certificate conditions to ensure that the predicted carbon dioxide emissions are not exceeded on a new and clean basis. For any remaining emissions reduction necessary to meet the applicable standard, the applicant may elect to use any of subparagraphs (A) to (D) of this paragraph, or any combination thereof. The council shall determine the amount of carbon dioxide or other greenhouse gas emissions reduction that is reasonably likely to result from the applicant’s offsets and whether the resulting net carbon dioxide emissions meet the applicable carbon dioxide emissions standard. For purposes of determining the net carbon dioxide emissions, the council shall by rule establish the global warming potential of each greenhouse gas based on a generally accepted scientific method, and convert any greenhouse gas emissions to a carbon dioxide equivalent. Unless otherwise provided by the council by rule, the global warming potential of methane is 23 times that of carbon dioxide, and the global warming potential of nitrous oxide is 296 times that of carbon dioxide. If the council or a court on judicial review concludes that the applicant has not demonstrated compliance with the applicable carbon dioxide emissions standard under subparagraphs (A), (B) or (D) of this paragraph, or any combination thereof, and the applicant has agreed to meet the requirements of subparagraph (C) of this paragraph for any deficiency, the council or a court shall find compliance based on such agreement.]
(A) The facility will sequentially produce electrical and thermal energy from the same fuel source, and the thermal energy will be used to displace another source of carbon dioxide emissions that would have otherwise continued to occur, in which case the council shall adopt site certificate conditions ensuring that the carbon dioxide emissions reduction will be achieved.

(B) The applicant or a third party will implement particular offsets, in which case the council may adopt site certificate conditions ensuring that the proposed offsets are implemented but shall not require that predicted levels of avoidance, displacement or sequestration of greenhouse gas emissions be achieved. The council shall determine the quantity of greenhouse gas emissions reduction that is reasonably likely to result from each of the proposed offsets based on the criteria in sub-subparagraphs (i) to (iii) of this subparagraph. In making this determination, the council shall not allow credit for offsets that have already been allocated or awarded credit for greenhouse gas emissions reduction in another regulatory setting. In addition, the fact that an applicant or other parties involved with an offset may derive benefits from the offset other than the reduction of greenhouse gas emissions is not, by itself, a basis for withholding credit for an offset.

(i) The degree of certainty that the predicted quantity of greenhouse gas emissions reduction will be achieved by the offset;

(ii) The ability of the council to determine the actual quantity of greenhouse gas emissions reduction resulting from the offset, taking into consideration any proposed measurement, monitoring and evaluation of mitigation measure performance; and

(iii) The extent to which the reduction of greenhouse gas emissions would occur in the absence of the offsets.

(C) The applicant or a third party agrees to provide funds in an amount deemed sufficient to produce the reduction in greenhouse gas emissions necessary to meet the applicable carbon dioxide emissions standard, in which case the funds shall be used as specified in paragraph (d) of this subsection. Unless modified by the council as provided below, the payment of 57 cents shall be
deemed to result in a reduction of one ton of carbon dioxide emissions. The
council shall determine the offset funds using the monetary offset rate and the
level of emissions reduction required to meet the applicable standard. If a site
certificate is approved based on this subparagraph, the council may not adjust
the amount of such offset funds based on the actual performance of offsets.
After three years from June 26, 1997, the council may by rule increase or de-
crease the monetary offset rate of 57 cents per ton of carbon dioxide emissions.
Any change to the monetary offset rate shall be based on empirical evidence
of the cost of offsets and the council’s finding that the standard will be eco-
nomically achievable with the modified rate for natural gas-fired power plants.
Following the initial three-year period, the council may increase or decrease
the monetary offset rate no more than 50 percent in any two-year period.]
[(D) Any other means that the council adopts by rule for demonstrating
compliance with any applicable carbon dioxide emissions standard.]
[(d) If the applicant elects to meet the applicable carbon dioxide emissions
standard in whole or in part under paragraph (c)(C) of this subsection, the
applicant shall identify the qualified organization. The applicant may identify
an organization that has applied for, but has not received, an exemption from
federal income taxation, but the council may not find that the organization is
a qualified organization unless the organization is exempt from federal taxa-
tion under section 501(c)(3) of the Internal Revenue Code as amended and in
effect on December 31, 1996. The site certificate holder shall provide a bond
or comparable security in a form reasonably acceptable to the council to ensure
the payment of the offset funds and the amount required under subparagraph
(A)(ii) of this paragraph. Such security shall be provided by the date specified
in the site certificate, which shall be no later than the commencement of con-
struction of the facility. The site certificate shall require that the offset funds
be disbursed as specified in subparagraph (A) of this paragraph, unless the
council finds that no qualified organization exists, in which case the site cer-
tificate shall require that the offset funds be disbursed as specified in sub-
paragraph (B) of this paragraph.]
[(A) The site certificate holder shall disburse the offset funds and any other funds required by sub-subparagraph (ii) of this subparagraph to the qualified organization as follows:]

[(i) When the site certificate holder receives written notice from the qualified organization certifying that the qualified organization is contractually obligated to pay any funds to implement offsets using the offset funds, the site certificate holder shall make the requested amount available to the qualified organization unless the total of the amount requested and any amounts previously requested exceeds the offset funds, in which case only the remaining amount of the offset funds shall be made available. The qualified organization shall use at least 80 percent of the offset funds for contracts to implement offsets. The qualified organization shall assess offsets for their potential to qualify in, generate credits in or reduce obligations in other regulatory settings. The qualified organization may use up to 20 percent of the offset funds for monitoring, evaluation, administration and enforcement of contracts to implement offsets.]

[(ii) At the request of the qualified organization and in addition to the offset funds, the site certificate holder shall pay the qualified organization an amount equal to 10 percent of the first $500,000 of the offset funds and 4.286 percent of any offset funds in excess of $500,000. This amount shall not be less than $50,000 unless a lesser amount is specified in the site certificate. This amount compensates the qualified organization for its costs of selecting offsets and contracting for the implementation of offsets.]

[(iii) Notwithstanding any provision to the contrary, a site certificate holder subject to this subparagraph shall have no obligation with regard to offsets, the offset funds or the funds required by sub-subparagraph (ii) of this subparagraph other than to make available to the qualified organization the total amount required under paragraph (c) of this subsection and sub-subparagraph (ii) of this subparagraph, nor shall any nonperformance, negligence or misconduct on the part of the qualified organization be a basis for revocation of the site certificate or any other enforcement action by the council with respect
(B) If the council finds there is no qualified organization, the site certificate holder shall select one or more offsets to be implemented pursuant to criteria established by the council. The site certificate holder shall give written notice of its selections to the council and to any person requesting notice. On petition by the State Department of Energy, or by any person adversely affected or aggrieved by the site certificate holder's selection of offsets, or on the council's own motion, the council may review such selection. The petition must be received by the council within 30 days of the date the notice of selection is placed in the United States mail, with first-class postage prepaid. The council shall approve the site certificate holder's selection unless it finds that the selection is not consistent with criteria established by the council. The site certificate holder shall contract to implement the selected offsets within 18 months after commencing construction of the facility unless good cause is shown requiring additional time. The contracts shall obligate the expenditure of at least 85 percent of the offset funds for the implementation of offsets. No more than 15 percent of the offset funds may be spent on monitoring, evaluation and enforcement of the contract to implement the selected offsets. The council's criteria for selection of offsets shall be based on the criteria set forth in paragraphs (b)(C) and (c)(B) of this subsection and may also consider the costs of particular types of offsets in relation to the expected benefits of such offsets. The council's criteria shall not require the site certificate holder to select particular offsets, and shall allow the site certificate holder a reasonable range of choices in selecting offsets. In addition, notwithstanding any other provision of this section, the site certificate holder's financial liability for implementation, monitoring, evaluation and enforcement of offsets pursuant to this subsection shall be limited to the amount of any offset funds not already contractually obligated. Nonperformance, negligence or misconduct by the entity or entities implementing, monitoring or evaluating the selected offset shall not be a basis for revocation of the site certificate or any other enforcement action by the council with respect to the site certificate holder.]

[91]
[(C) Every qualified organization that has received funds under this paragraph shall, at five-year intervals beginning on the date of receipt of such funds, provide the council with the information the council requests about the qualified organization's performance. The council shall evaluate the information requested and, based on such information, shall make any recommendations to the Legislative Assembly that the council deems appropriate.]

[(e) As used in this subsection:]

[(A) “Adjusted to ISO conditions” means carbon dioxide emissions and net electric power output as determined at 59 degrees Fahrenheit, 14.7 pounds per square inch atmospheric pressure and 60 percent humidity.] [(B) “Base load gas plant” means a generating facility that is fueled by natural gas, except for periods during which an alternative fuel may be used and when such alternative fuel use shall not exceed 10 percent of expected fuel use in Btu, higher heating value, on an average annual basis, and where the applicant requests and the council adopts no condition in the site certificate for the generating facility that would limit hours of operation other than restrictions on the use of alternative fuel. The council shall assume a 100 percent capacity factor for such plants and a 30-year life for the plants for purposes of determining gross carbon dioxide emissions.]

[(C) “Carbon dioxide equivalent” means the global warming potential of a greenhouse gas reflected in units of carbon dioxide.] [(D) “Fossil-fueled power plant” means a generating facility that produces electric power from natural gas, petroleum, coal or any form of solid, liquid or gaseous fuel derived from such material.] [(E) “Generating facility” means those energy facilities that are defined in ORS 469.300 (11)(a)(A), (B) and (D).] [(F) “Global warming potential” means the determination of the atmospheric warming resulting from the release of a unit mass of a particular greenhouse gas in relation to the warming resulting from the release of the equivalent mass of carbon dioxide.] [(G) “Greenhouse gas” means carbon dioxide, methane and nitrous oxide.]
(H) “Gross carbon dioxide emissions” means the predicted carbon dioxide emissions of the proposed energy facility measured on a new and clean basis.

(I) “Net carbon dioxide emissions” means gross carbon dioxide emissions of the proposed energy facility, less carbon dioxide or other greenhouse gas emissions avoided, displaced or sequestered by any combination of cogeneration or offsets.

(J) “New and clean basis” means the average carbon dioxide emissions rate per hour and net electric power output of the energy facility, without degradation, as determined by a 100-hour test at full power completed during the first 12 months of commercial operation of the energy facility, with the results adjusted for the average annual site condition for temperature, barometric pressure and relative humidity and use of alternative fuels, and using a rate of 117 pounds of carbon dioxide per million Btu of natural gas fuel and a rate of 161 pounds of carbon dioxide per million Btu of distillate fuel, if such fuel use is proposed by the applicant. The council may by rule adjust the rate of pounds of carbon dioxide per million Btu for natural gas or distillate fuel. The council may by rule set carbon dioxide emissions rates for other fuels.

(K) “Nongenerating facility” means those energy facilities that are defined in ORS 469.300 (11)(a)(C) and (E) to (I).

(L) “Offset” means an action that will be implemented by the applicant, a third party or through the qualified organization to avoid, sequester or displace emissions.

(M) “Offset funds” means the amount of funds determined by the council to satisfy the applicable carbon dioxide emissions standard pursuant to paragraph (c)(C) of this subsection.

(N) “Qualified organization” means an entity that:

(i) Is exempt from federal taxation under section 501(c)(3) of the Internal Revenue Code as amended and in effect on December 31, 1996;

(ii) Either is incorporated in the State of Oregon or is a foreign corporation authorized to do business in the State of Oregon,
[(iii) Has in effect articles of incorporation that require that offset funds received pursuant to this section are used for offsets that require that decisions on the use of the offset funds are made by a decision-making body composed of seven voting members of which three are appointed by the council, three are Oregon residents appointed by the Bullitt Foundation or an alternative environmental nonprofit organization named by the body, and one is appointed by the applicants for site certificates that are subject to paragraph (d) of this subsection and the holders of such site certificates, and that require nonvoting membership on the body for holders of site certificates that have provided funds not yet disbursed under paragraph (d)(A) of this subsection;]

[(iv) Has made available on an annual basis, beginning after the first year of operation, a signed opinion of an independent certified public accountant stating that the qualified organization’s use of funds pursuant to this statute conforms with generally accepted accounting procedures except that the qualified organization shall have one year to conform with generally accepted accounting principles in the event of a nonconforming audit;]

[(v) Has to the extent applicable, except for good cause, entered into contracts obligating at least 60 percent of the offset funds to implement offsets within two years after the commencement of construction of the facility; and]

[(vi) Has to the extent applicable, except for good cause, complied with paragraph (d)(A)(i) of this subsection.]

[(3)] (2) Except as provided in ORS 469.504 for land use compliance and except for those statutes and rules for which the decision on compliance has been delegated by the federal government to a state agency other than the council, the facility complies with all other Oregon statutes and administrative rules identified in the project order, as amended, as applicable to the issuance of a site certificate for the proposed facility. If compliance with applicable Oregon statutes and administrative rules, other than those involving federally delegated programs, would result in conflicting conditions in the site certificate, the council may resolve the conflict consistent with the public interest. A resolution may not result in the waiver of any appli-
cable state statute.

[(4)] (3) The facility complies with the statewide planning goals adopted by the Land Conservation and Development Commission.

SECTION 59. ORS 526.786 is amended to read:

526.786. (1) The State Board of Forestry may develop administrative rules that define principles and standards relating to the creation, measurement, accounting, marketing, verifying, registering, transferring and selling of forestry carbon offsets from nonfederal forestlands.

(2) Rules adopted by the board under this section shall set standards to ensure that in order to be marketed, registered, transferred or sold, a forestry carbon offset must be created as a result of forest management activities that:

(a) Have the effect of increasing carbon storage on forestlands as measured by a forestry carbon offset accounting system;

(b) Would not otherwise occur but for the carbon storage objective; and

(c) Provide environmental, social and economic benefits for Oregon and its citizens, including but not limited to, protection or enhancement of long term timber supplies, native fish and wildlife habitat and water quality.

(3) Rules adopted by the board under this section shall establish principles to ensure that the forestry carbon offset accounting system shall:

(a) Account for relevant sources of carbon dioxide emission debits and credits for carbon storage or sequestration;

(b) Account for the duration and permanence of the carbon dioxide storage or emission reductions;

(c) Include provisions for establishing the appropriate baseline for projects, practices, rotation ages, harvest schedules and ownership from which measured carbon dioxide emission debits, and credits for carbon storage or sequestration are made;

(d) Account for other relevant and measurable greenhouse gas consequences, specifically credits and debits expressed as a carbon dioxide emissions equivalent, when establishing baselines or otherwise as appropriate;
(e) Account for the specific forest management practices used on-site and include provisions for monitoring carbon dioxide emission debits and credits for carbon storage or sequestration, from the implementation of specific practices;

(f) Account for continuing carbon dioxide emission debits, and credits for carbon storage or sequestration, based on the end product use of harvested biomass;

(g) Account for environmental, social and economic benefits of forestry carbon offsets and ensure that practices with unsustainable, long term consequences are not used to create forestry carbon offsets;

(h) Allow for public access to information in monitoring reports; and

(i) Encourage third-party verification of forestry carbon offsets.

(4) Rules adopted by the board under this section may address qualifications for persons and agencies that provide third-party verification and registration of forestry carbon offsets.

(5) Rules adopted by the board under this section shall be developed with the assistance of an advisory committee appointed by the board. The advisory committee shall consist of at least nine persons and shall contain:

(a) Persons from businesses, governmental agencies and nongovernmental organizations with knowledge and experience in the accounting of greenhouse gas emissions, sequestration and storage;

(b) At least one person from a nongovernmental forestry conservation organization;

(c) At least one nonindustrial private forest landowner or a representative of an organization that represents nonindustrial private forest landowners;

(d) One representative of the State Department of Energy;

(e) One representative of the State Department of Fish and Wildlife, or a designee of the State Department of Fish and Wildlife;

(f) One representative of the Department of Environmental Quality, or a designee of the Department of Environmental Quality;

(g) At least one representative from a qualified organization, as defined
in ORS 469.503; and
(h) At least one representative from the State Forestry Department who
shall serve as the secretary to the advisory committee.

**SECTION 60.** ORS 469.501 is amended to read:

469.501. (1) The Energy Facility Siting Council shall adopt standards for
the siting, construction, operation and retirement of facilities. The standards
may address but need not be limited to the following subjects:

(a) The organizational, managerial and technical expertise of the appli-
cant to construct and operate the proposed facility.

(b) Seismic hazards.

c) Areas designated for protection by the state or federal government,
including but not limited to monuments, wilderness areas, wildlife refuges,
scenic waterways and similar areas.

d) The financial ability and qualifications of the applicant.

(e) Effects of the facility, taking into account mitigation, on fish and
wildlife, including threatened and endangered fish, wildlife or plant species.

(f) Impacts of the facility on historic, cultural or archaeological resources
listed on, or determined by the State Historic Preservation Officer to be el-
gible for listing on, the National Register of Historic Places or the Oregon
State Register of Historic Properties.

(g) Protection of public health and safety, including necessary safety de-

(h) The accumulation, storage, disposal and transportation of nuclear
waste.

(i) Impacts of the facility on recreation, scenic and aesthetic values.

(j) Reduction of solid waste and wastewater generation to the extent
reasonably practicable.

(k) Ability of the communities in the affected area to provide sewers and
sewage treatment, water, storm water drainage, solid waste management,
housing, traffic safety, police and fire protection, health care and schools.

(L) The need for proposed nongenerating facilities [as defined in ORS
469.503], consistent with the state energy policy set forth in ORS 469.010 and 469.310. The council may consider least-cost plans when adopting a need standard or in determining whether an applicable need standard has been met. The council shall not adopt a standard requiring a showing of need or cost-effectiveness for generating facilities [as defined in ORS 469.503].

(m) Compliance with the statewide planning goals adopted by the Land Conservation and Development Commission as specified by ORS 469.503.

(n) Soil protection.

[(o) For energy facilities that emit carbon dioxide, the impacts of those emissions on climate change. For fossil-fueled power plants, as defined in ORS 469.503, the council shall apply a standard as provided for by ORS 469.503 (2).]

(2) The council may adopt exemptions from any need standard adopted under subsection (1)(L) of this section if the exemption is consistent with the state’s energy policy set forth in ORS 469.010 and 469.310.

(3)(a) The council may issue a site certificate for a facility that does not meet one or more of the applicable standards adopted under subsection (1) of this section if the council determines that the overall public benefits of the facility outweigh any adverse effects on a resource or interest protected by the applicable standards the facility does not meet.

(b) The council by rule shall specify the criteria by which the council makes the determination described in paragraph (a) of this subsection.

(4) Notwithstanding subsection (1) of this section, the council may not impose any standard developed under subsection (1)(b), (f), (j) or (k) of this section to approve or deny an application for an energy facility producing power from wind, solar or geothermal energy. However, the council may, to the extent it determines appropriate, apply any standards adopted under subsection (1)(b), (f), (j) or (k) of this section to impose conditions on any site certificate issued for any energy facility.

(Transitional Provisions)

(2) Any provision in a site certificate or amended site certificate for a generating facility, as defined in ORS 469.300, issued before January 1, 2022, requiring the holder to demonstrate the need for the facility shall cease to be enforceable on January 1, 2022.

(3) Any site certificate amendment approved by the council on or after January 1, 2022, shall remove from the site certificate being amended all conditions and provisions rendered unenforceable by subsections (1) and (2) of this section. Notwithstanding ORS 469.405 or any council rule, the contested case hearing on a site certificate amendment subject to this subsection may not include a hearing on amendments necessary to comply with this subsection. The provisions of the council’s order relevant to compliance with this subsection are not subject to judicial review.

(4) Any provision in a site certificate or amended site certificate that requires the offset of estimated future excess carbon dioxide emissions emitted on or after the effective date of this 2020 Act based on a report of actual plant operations shall cease to be enforceable January 1, 2021.

SECTION 62. The Energy Facility Siting Council shall, no later than January 1, 2023, complete rulemaking to amend or repeal any rules adopted by the council relating to the application of a carbon dioxide emissions standard to generating facilities or nongenerating facilities, as those terms are defined in ORS 469.300, necessary to bring the rules of the council into compliance with the amendments to ORS 469.501
and 469.503 by sections 59 and 60 of this 2020 Act and the provisions
of section 61 of this 2020 Act.

SECTION 63. (1) As used in this section and section 64 of this 2020
Act, “qualified organization” has the meaning given that term in ORS

(2) On or after the operative date of this section and the amend-
ments to ORS 469.503 by section 58 of this 2020 Act and in accordance
with the provisions of ORS 469.503 (2)(d) (2019 Edition), a qualified or-
ganization that, before the operative date of this section and the
amendments to ORS 469.503 by section 58 of this 2020 Act, received
payment of offset funds pursuant to ORS 469.503 (2)(c)(C) (2019 Edi-
tion):

(a) Shall use at least 80 percent of the offset funds for contracts to
implement offsets and assess offsets for their potential to qualify in,
generate credits in or reduce obligations in other regulatory settings;
(b) May use up to 20 percent of the offset funds for monitoring,
evaluating, administering and enforcing contracts to implement off-
ssets; and
(c) Shall, at five-year intervals beginning on the date of the receipt
of the offset funds and ending the year after the year that the qualified
organization in no longer involved in the investment of offset funds
received pursuant to ORS 469.503 (2)(c)(C) (2019 Edition), provide the
Energy Facility Siting Council with the information the council re-
quests about the qualified organization’s performance. The council
shall evaluate the information requested and, based on the informa-
tion, shall make any recommendations to the Legislative Assembly
that the council deems appropriate.

SECTION 64. Section 63 of this 2020 Act is repealed on the date that
the Legislative Counsel receives written notice from the Energy Fa-
cility Siting Council that the council has confirmed that all qualified
organizations that received payment of offset funds pursuant to ORS
469.503 (2)(c)(C) (2019 Edition) have ceased to be involved in the investment of the offset funds.

(Repeal)

SECTION 65. ORS 469.409 is repealed.

(Conforming Amendments)

SECTION 66. ORS 469.300 is amended to read:

469.300. As used in ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992, unless the context requires otherwise:

(1) “Applicant” means any person who makes application for a site certificate in the manner provided in ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992.

(2) “Application” means a request for approval of a particular site or sites for the construction and operation of an energy facility or the construction and operation of an additional energy facility upon a site for which a certificate has already been issued, filed in accordance with the procedures established pursuant to ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992.

(3) “Associated transmission lines” means new transmission lines constructed to connect an energy facility to the first point of junction of such transmission line or lines with either a power distribution system or an interconnected primary transmission system or both or to the Northwest Power Grid.

(4) “Average electric generating capacity” means the peak generating capacity of the facility divided by one of the following factors:

(a) For wind facilities, 3.00;

(b) For geothermal energy facilities, 1.11; or

(c) For all other energy facilities, 1.00.
“Combustion turbine power plant” means a thermal power plant consisting of one or more fuel-fired combustion turbines and any associated waste heat combined cycle generators.

“Construction” means work performed on a site, excluding surveying, exploration or other activities to define or characterize the site, the cost of which exceeds $250,000.

“Council” means the Energy Facility Siting Council established under ORS 469.450.

“Department” means the State Department of Energy created under ORS 469.030.

“Director” means the Director of the State Department of Energy appointed under ORS 469.040.

“Electric utility” means persons, regulated electrical companies, people’s utility districts, joint operating agencies, electric cooperatives, municipalities or any combination thereof, engaged in or authorized to engage in the business of generating, supplying, transmitting or distributing electric energy.

“Energy facility” means any of the following:

(A) An electric power generating plant with a nominal electric generating capacity of 25 megawatts or more, including but not limited to:

(i) Thermal power;

(ii) Combustion turbine power plant; or

(iii) Solar thermal power plant.

(B) A nuclear installation as defined in this section.

(C) A high voltage transmission line of more than 10 miles in length with a capacity of 230,000 volts or more to be constructed in more than one city or county in this state, but excluding:

(i) Lines proposed for construction entirely within 500 feet of an existing corridor occupied by high voltage transmission lines with a capacity of 230,000 volts or more;

(ii) Lines of 57,000 volts or more that are rebuilt and upgraded to 230,000 volts or more.
volts along the same right of way; and

(iii) Associated transmission lines.

(D) A solar photovoltaic power generation facility using more than:

(i) 160 acres located on high-value farmland as defined in ORS 195.300;
(ii) 1,280 acres located on land that is predominantly cultivated or that, if not cultivated, is predominantly composed of soils that are in capability classes I to IV, as specified by the National Cooperative Soil Survey operated by the Natural Resources Conservation Service of the United States Department of Agriculture; or
(iii) 1,920 acres located on any other land.

(E) A pipeline that is:

(i) At least six inches in diameter, and five or more miles in length, used for the transportation of crude petroleum or a derivative thereof, liquefied natural gas, a geothermal energy form in a liquid state or other fossil energy resource, excluding a pipeline conveying natural or synthetic gas;
(ii) At least 16 inches in diameter, and five or more miles in length, used for the transportation of natural or synthetic gas, but excluding:
   (I) A pipeline proposed for construction of which less than five miles of the pipeline is more than 50 feet from a public road, as defined in ORS 368.001; or
   (II) A parallel or upgraded pipeline up to 24 inches in diameter that is constructed within the same right of way as an existing 16-inch or larger pipeline that has a site certificate, if all studies and necessary mitigation conducted for the existing site certificate meet or are updated to meet current site certificate standards; or
   (iii) At least 16 inches in diameter and five or more miles in length used to carry a geothermal energy form in a gaseous state but excluding a pipeline used to distribute heat within a geothermal heating district established under ORS chapter 523.
(F) A synthetic fuel plant which converts a natural resource including, but not limited to, coal or oil to a gas, liquid or solid product intended to
be used as a fuel and capable of being burned to produce the equivalent of two billion Btu of heat a day.

(G) A plant which converts biomass to a gas, liquid or solid product, or combination of such products, intended to be used as a fuel and if any one of such products is capable of being burned to produce the equivalent of six billion Btu of heat a day.

(H) A storage facility for liquefied natural gas constructed after September 29, 1991, that is designed to hold at least 70,000 gallons.

(I) A surface facility related to an underground gas storage reservoir that, at design injection or withdrawal rates, will receive or deliver more than 50 million cubic feet of natural or synthetic gas per day, or require more than 4,000 horsepower of natural gas compression to operate, but excluding:

(i) The underground storage reservoir;

(ii) The injection, withdrawal or monitoring wells and individual wellhead equipment; and

(iii) An underground gas storage reservoir into which gas is injected solely for testing or reservoir maintenance purposes or to facilitate the secondary recovery of oil or other hydrocarbons.

(J) An electric power generating plant with an average electric generating capacity of 50 megawatts or more if the power is produced from geothermal or wind energy at a single energy facility or within a single energy generation area.

(b) “Energy facility” does not include a hydroelectric facility or an energy facility under paragraph (a)(A)(iii) or (D) of this subsection that is established on the site of a decommissioned United States Air Force facility that has adequate transmission capacity to serve the energy facility.

(12) “Energy generation area” means an area within which the effects of two or more small generating plants may accumulate so the small generating plants have effects of a magnitude similar to a single generating plant of 35 megawatts average electric generating capacity or more. An “energy generation area” for facilities using a geothermal resource and covered by a unit
agreement, as provided in ORS 522.405 to 522.545 or by federal law, shall be defined in that unit agreement. If no such unit agreement exists, an energy generation area for facilities using a geothermal resource shall be the area that is within two miles, measured from the electrical generating equipment of the facility, of an existing or proposed geothermal electric power generating plant, not including the site of any other such plant not owned or controlled by the same person.

(13) “Extraordinary nuclear occurrence” means any event causing a discharge or dispersal of source material, special nuclear material or by-product material as those terms are defined in ORS 453.605, from its intended place of confinement off-site, or causing radiation levels off-site, that the United States Nuclear Regulatory Commission or its successor determines to be substantial and to have resulted in or to be likely to result in substantial damages to persons or property off-site.

(14) “Facility” means an energy facility together with any related or supporting facilities.

(15) “Generating facility” means those energy facilities that are defined in subsection (11)(a)(A), (B) and (D) of this section.

[(15)] (16) “Geothermal reservoir” means an aquifer or aquifers containing a common geothermal fluid.

[(16)] (17) “Local government” means a city or county.

[(17)] (18) “Nominal electric generating capacity” means the maximum net electric power output of an energy facility based on the average temperature, barometric pressure and relative humidity at the site during the times of the year when the facility is intended to operate.

(19) “Nongenerating facility” means those energy facilities that are defined in subsection (11)(a)(C) and (E) to (I) of this section.

[(18)] (20) “Nuclear incident” means any occurrence, including an extraordinary nuclear occurrence, that results in bodily injury, sickness, disease, death, loss of or damage to property or loss of use of property due to the radioactive, toxic, explosive or other hazardous properties of source ma-
terial, special nuclear material or by-product material as those terms are
defined in ORS 453.605.

[(19) (21)] “Nuclear installation” means any power reactor, nuclear fuel
fabrication plant, nuclear fuel reprocessing plant, waste disposal facility for
radioactive waste, and any facility handling that quantity of fissionable ma-
terials sufficient to form a critical mass. “Nuclear installation” does not in-
clude any such facilities that are part of a thermal power plant.

[(20) (22)] “Nuclear power plant” means an electrical or any other facility
using nuclear energy with a nominal electric generating capacity of 25
megawatts or more, for generation and distribution of electricity, and asso-
ciated transmission lines.

[(21) (23)] “Person” means an individual, partnership, joint venture, pri-
ivate or public corporation, association, firm, public service company, poli-
tical subdivision, municipal corporation, government agency, people’s utility
district, or any other entity, public or private, however organized.

[(22) (24)] “Project order” means the order, including any amendments,
issued by the State Department of Energy under ORS 469.330.

[(23)(a)] (25)(a) “Radioactive waste” means all material which is dis-
carded, unwanted or has no present lawful economic use, and contains mined
or refined naturally occurring isotopes, accelerator produced isotopes and
by-product material, source material or special nuclear material as those
terms are defined in ORS 453.605. The term does not include those radioac-
tive materials identified in OAR 345-50-020, 345-50-025 and 345-50-035, adopted
by the council on December 12, 1978, and revised periodically for the purpose
of adding additional isotopes which are not referred to in OAR 345-50 as
presenting no significant danger to the public health and safety.

(b) Notwithstanding paragraph (a) of this subsection, “radioactive
waste” does not include uranium mine overburden or uranium mill tailings,
mill wastes or mill by-product materials as those terms are defined in Title

[(24) (26)] “Related or supporting facilities” means any structure, pro-
posed by the applicant, to be constructed or substantially modified in connection with the construction of an energy facility, including associated transmission lines, reservoirs, storage facilities, intake structures, road and rail access, pipelines, barge basins, office or public buildings, and commercial and industrial structures. “Related or supporting facilities” does not include geothermal or underground gas storage reservoirs, production, injection or monitoring wells or wellhead equipment or pumps.

[(25)] (27) “Site” means any proposed location of an energy facility and related or supporting facilities.

[(26)] (28) “Site certificate” means the binding agreement between the State of Oregon and the applicant, authorizing the applicant to construct and operate a facility on an approved site, incorporating all conditions imposed by the council on the applicant.

[(27)] (29) “Thermal power plant” means an electrical facility using any source of thermal energy with a nominal electric generating capacity of 25 megawatts or more, for generation and distribution of electricity, and associated transmission lines, including but not limited to a nuclear-fueled, geothermal-fueled or fossil-fueled power plant, but not including a portable power plant the principal use of which is to supply power in emergencies. “Thermal power plant” includes a nuclear-fueled thermal power plant that has ceased to operate.

[(28)] (30) “Transportation” means the transport within the borders of the State of Oregon of radioactive material destined for or derived from any location.

[(29)] (31) “Underground gas storage reservoir” means any subsurface sand, strata, formation, aquifer, cavern or void, whether natural or artificially created, suitable for the injection, storage and withdrawal of natural gas or other gaseous substances. “Underground gas storage reservoir” includes a pool as defined in ORS 520.005.

[(30)] (32) “Utility” includes:

(a) A person, a regulated electrical company, a people’s utility district, a
joint operating agency, an electric cooperative, municipality or any combination thereof, engaged in or authorized to engage in the business of generating, transmitting or distributing electric energy;

(b) A person or public agency generating electric energy from an energy facility for its own consumption; and

c) A person engaged in this state in the transmission or distribution of natural or synthetic gas.

[(31)] [(33)] “Waste disposal facility” means a geographical site in or upon which radioactive waste is held or placed but does not include a site at which radioactive waste used or generated pursuant to a license granted under ORS 453.635 is stored temporarily, a site of a thermal power plant used for the temporary storage of radioactive waste from that plant for which a site certificate has been issued pursuant to this chapter or a site used for temporary storage of radioactive waste from a reactor operated by a college, university or graduate center for research purposes and not connected to the Northwest Power Grid. As used in this subsection, “temporary storage” includes storage of radioactive waste on the site of a nuclear-fueled thermal power plant for which a site certificate has been issued until a permanent storage site is available by the federal government.

SECTION 67. ORS 469.310 is amended to read:

469.310. In the interests of the public health and the welfare of the people of this state, it is the declared public policy of this state that the siting, construction and operation of energy facilities shall be accomplished in a manner consistent with protection of the public health and safety and in compliance with the energy policy and air, water, solid waste, land use and other environmental protection policies of this state. It is, therefore, the purpose of ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992 to exercise the jurisdiction of the State of Oregon to the maximum extent permitted by the United States Constitution and to establish in cooperation with the federal government a comprehensive system for the siting, monitoring and regulating of the location, construction and operation of all en-
ergy facilities in this state. It is furthermore the policy of this state, notwithstanding ORS 469.010 (2)(f) and the definition of cost-effective in ORS 469.020, that the need for new generating facilities, as defined in ORS 469.503, is sufficiently addressed by reliance on competition in the market rather than by consideration of cost-effectiveness and shall not be a matter requiring determination by the Energy Facility Siting Council in the siting of a generating facility, as defined in ORS 469.503.

**SECTION 68.** ORS 469.373 is amended to read:

469.373. (1) Notwithstanding the expedited review process established pursuant to ORS 469.370, an applicant may apply under the provisions of this section for expedited review of an application for a site certificate for an energy facility if the energy facility:

(a) Is a combustion turbine energy facility fueled by natural gas or is a reciprocating engine fueled by natural gas, including an energy facility that uses petroleum distillate fuels for backup power generation;

(b) Is a permitted or conditional use allowed under an applicable local acknowledged comprehensive plan, land use regulation or federal land use plan, and is located:

(A) At or adjacent to an existing energy facility; or

(B)(i) At, adjacent to or in close proximity to an existing industrial use; and

(ii) In an area currently zoned or designated for industrial use;

(c)(A) Requires no more than three miles of associated transmission lines or three miles of new natural gas pipelines outside of existing rights of way for transmission lines or natural gas pipelines; or

(B) Imposes, in the determination of the Energy Facility Siting Council, no significant impact in the locating of associated transmission lines or new natural gas pipelines outside of existing rights of way;

(d) Requires no new water right or water right transfer; and

[(e) Provides funds to a qualified organization in an amount determined by the council to be sufficient to produce any required reduction in emissions]
as specified in ORS 469.503 (2)(c)(C) and in rules adopted under ORS 469.503 for the total carbon dioxide emissions produced by the energy facility for the life of the energy facility; and]

[(f)(A) (e)(A) Discharges process wastewater to a wastewater treatment facility that has an existing National Pollutant Discharge Elimination System permit, can obtain an industrial pretreatment permit, if needed, within the expedited review process time frame and has written confirmation from the wastewater facility permit holder that the additional wastewater load will be accommodated by the facility without resulting in a significant thermal increase in the facility effluent or without requiring any changes to the wastewater facility National Pollutant Discharge Elimination System permit;

(B) Plans to discharge process wastewater to a wastewater treatment facility owned by a municipal corporation that will accommodate the wastewater from the energy facility and supplies evidence from the municipal corporation that:

(i) The municipal corporation has included, or intends to include, the process wastewater load from the energy facility in an application for a National Pollutant Discharge Elimination System permit; and

(ii) All conditions required of the energy facility to allow the discharge of process wastewater from the energy facility will be satisfied; or

(C) Obtains a National Pollutant Discharge Elimination System or water pollution control facility permit for process wastewater disposal, supplies evidence to support a finding that the discharge can likely be permitted within the expedited review process time frame and that the discharge will not require:

(i) A new National Pollutant Discharge Elimination System permit, except for a storm water general permit for construction activities; or

(ii) A change in any effluent limit or discharge location under an existing National Pollutant Discharge Elimination System or water pollution control facility permit.
(2) An applicant seeking expedited review under this section shall submit documentation to the State Department of Energy, prior to the submission of an application for a site certificate, that demonstrates that the energy facility meets the qualifications set forth in subsection (1) of this section. The department shall determine, within 14 days of receipt of the documentation, on a preliminary, nonbinding basis, whether the energy facility qualifies for expedited review.

(3) If the department determines that the energy facility preliminarily qualifies for expedited review, the applicant may submit an application for expedited review. Within 30 days after the date that the application for expedited review is submitted, the department shall determine whether the application is complete. If the department determines that the application is complete, the application shall be deemed filed on the date that the department sends the applicant notice of its determination. If the department determines that the application is not complete, the department shall notify the applicant of the deficiencies in the application and shall deem the application filed on the date that the department determines that the application is complete. The department or the council may request additional information from the applicant at any time.

(4) The State Department of Energy shall send a copy of a filed application to the Department of Environmental Quality, the Water Resources Department, the State Department of Fish and Wildlife, the State Department of Geology and Mineral Industries, the State Department of Agriculture, the Department of Land Conservation and Development, the Public Utility Commission and any other state agency, city, county or political subdivision of the state that has regulatory or advisory responsibility with respect to the proposed energy facility. The State Department of Energy shall send with the copy of the filed application a notice specifying that:

(a) In the event the council issues a site certificate for the energy facility, the site certificate will bind the state and all counties, cities and political subdivisions in the state as to the approval of the site, the construction of
the energy facility and the operation of the energy facility, and that after
the issuance of a site certificate, all permits, licenses and certificates ad-
dressed in the site certificate must be issued as required by ORS 469.401 (3);
and
(b) The comments and recommendations of state agencies, counties, cities
and political subdivisions concerning whether the proposed energy facility
complies with any statute, rule or local ordinance that the state agency,
county, city or political subdivision would normally administer in determin-
ing whether a permit, license or certificate required for the construction or
operation of the energy facility should be approved will be considered only
if the comments and recommendations are received by the department within
a reasonable time after the date the application and notice of the application
are sent by the department.
(5) Within 90 days after the date that the application was filed, the de-
partment shall issue a draft proposed order setting forth:
(a) A description of the proposed energy facility;
(b) A list of the permits, licenses and certificates that are addressed in
the application and that are required for the construction or operation of the
proposed energy facility;
(c) A list of the statutes, rules and local ordinances that are the standards
and criteria for approval of any permit, license or certificate addressed in
the application and that are required for the construction or operation of the
proposed energy facility; and
(d) Proposed findings specifying how the proposed energy facility complies
with the applicable standards and criteria for approval of a site certificate.
(6) The council shall review the application for site certification in the
manner set forth in subsections (7) to (10) of this section and shall issue a
site certificate for the facility if the council determines that the facility,
with any required conditions to the site certificate, will comply with:
(a) The requirements for expedited review as specified in this section;
(b) The standards adopted by the council pursuant to ORS 469.501 (1)(a),
(c) to (e), (g), (h) and (L) to [(o)] (n);

(c) The requirements of ORS 469.503 [(3)] (2); and

(d) The requirements of ORS 469.504 (1)(b).

(7) Following submission of an application for a site certificate, the council shall hold a public informational meeting on the application. Following the issuance of the proposed order, the council shall hold at least one public hearing on the application. The public hearing shall be held in the area affected by the energy facility. The council shall mail notice of the hearing at least 20 days prior to the hearing. The notice shall comply with the notice requirements of ORS 197.763 (2) and shall include, but need not be limited to, the following:

(a) A description of the energy facility and the general location of the energy facility;

(b) The name of a department representative to contact and the telephone number at which people may obtain additional information;

(c) A statement that copies of the application and proposed order are available for inspection at no cost and will be provided at reasonable cost; and

(d) A statement that the record for public comment on the application will close at the conclusion of the hearing and that failure to raise an issue in person or in writing prior to the close of the record, with sufficient specificity to afford the decision maker an opportunity to respond to the issue, will preclude consideration of the issue, by the council or by a court on judicial review of the council’s decision.

(8) Prior to the conclusion of the hearing, the applicant may request an opportunity to present additional written evidence, arguments or testimony regarding the application. In the alternative, prior to the conclusion of the hearing, the applicant may request a contested case hearing on the application. If the applicant requests an opportunity to present written evidence, arguments or testimony, the council shall leave the record open for that purpose only for a period not to exceed 14 days after the date of the hearing.
Following the close of the record, the department shall prepare a draft final order for the council. If the applicant requests a contested case hearing, the council may grant the request if the applicant has shown good cause for a contested case hearing. If a request for a contested case hearing is granted, subsections (9) to (11) of this section do not apply, and the application shall be considered under the same contested case procedures used for a nonexpedited application for a site certificate.

(9) The council shall make its decision based on the record and the draft final order prepared by the department. The council shall, within six months of the date that the application is deemed filed:
   (a) Grant the application;
   (b) Grant the application with conditions;
   (c) Deny the application; or
   (d) Return the application to the site certification process required by ORS 469.320.

(10) If the application is granted, the council shall issue a site certificate pursuant to ORS 469.401 and 469.402. Notwithstanding subsection (6) of this section, the council may impose conditions based on standards adopted under ORS 469.501 (1)(b), (f) and (i) to (k), but may not deny an application based on those standards.

(11) Judicial review of the approval or rejection of a site certificate by the council under this section shall be as provided in ORS 469.403.

SECTION 69. ORS 469.405 is amended to read:

469.405. (1) A site certificate may be amended with the approval of the Energy Facility Siting Council. The council may establish by rule the type of amendment that must be considered in a contested case proceeding. Judicial review of an amendment to a site certificate shall be as provided in ORS 469.403.

(2) Notwithstanding ORS 34.020 or 197.825, or any other provision of law, the land use approval by an affected local government of a proposed amendment to a facility and the recommendation of the special advisory group of
applicable substantive criteria shall be subject to judicial review only as provided in ORS 469.403. If the applicant elects to show compliance with the statewide planning goals by demonstrating that the facility has received local land use approval, the provisions of this section shall apply only to proposed projects for which the land use approval by the local government occurs after the date an application for amendment is submitted to the State Department of Energy.

(3) An amendment to a site certificate is not required for a pipeline less than 16 inches in diameter and less than five miles in length that is proposed to be constructed to test or maintain an underground gas storage reservoir. If the proposed pipeline will connect to a council certified surface facility related to an underground gas storage reservoir or to a council certified gas pipeline, whether the proposed pipeline is to be located inside or outside the site of a council certified facility, the certificate holder must obtain, prior to construction, the approval of the department for the construction, operation and retirement of the proposed pipeline. The department shall approve such a proposed pipeline if the pipeline meets applicable council substantive standards. Notwithstanding ORS 469.503 [(3)] (2), the department may not review the proposed pipeline for compliance with other state standards. Notwithstanding ORS 469.503 [(4)] (3), or any council rule addressing compliance with land use standards, the department shall not review such a proposed pipeline for compliance with land use requirements. Notwithstanding ORS 469.401 (3), the approval by the department of such pipeline shall not bind any state or local agency. The council may adopt appropriate procedural rules for the department review. The department shall issue an order approving or rejecting the proposed pipeline. Judicial review of a department order under this section shall be as provided in ORS 469.403.

SECTION 70. ORS 469.407 is amended to read:

469.407. (1) A recipient may by amendment of its application for a site certificate or by amendment of its site certificate increase the capacity of the facility if the Energy Facility Siting Council finds that:
(a) The facility will satisfy the conditions of the 500-megawatt exemption, unless modified by the council;

(b) The enlarged facility does not exceed 500 megawatts and meets the applicable carbon dioxide standard provided for in ORS 469.503 (2) (2019 Edition) for any increase in capacity beyond the capacity of the 500-megawatt exemption; and

(c) The enlarged facility meets all other applicable council standards.

(2) A recipient is deemed to meet any applicable need standard and carbon dioxide emissions standard for the nominal generating capacity of the 500-megawatt exemption provided that the recipient satisfies the conditions of the 500-megawatt exemption, unless the council modifies the conditions.

(3) As used in this section:

(a) “Recipient” means any base load gas plant, as defined in ORS 469.503 (2019 Edition), determined by the council to have the lowest net monetized air emissions among the applicants participating in a contested case proceeding.

(b) “500-megawatt exemption” means the council order in which a recipient was determined to have the lowest net monetized air emissions.

SECTION 71. ORS 469.504 is amended to read:

469.504. (1) A proposed facility shall be found in compliance with the statewide planning goals under ORS 469.503 [(4)] (3) if:

(a) The facility has received local land use approval under the acknowledged comprehensive plan and land use regulations of the affected local government; or

(b) The Energy Facility Siting Council determines that:

(A) The facility complies with applicable substantive criteria from the affected local government’s acknowledged comprehensive plan and land use regulations that are required by the statewide planning goals and in effect on the date the application is submitted, and with any Land Conservation and Development Commission administrative rules and goals and any land use statutes that apply directly to the facility under ORS 197.646;
(B) For an energy facility or a related or supporting facility that must be evaluated against the applicable substantive criteria pursuant to subsection (5) of this section, that the proposed facility does not comply with one or more of the applicable substantive criteria but does otherwise comply with the applicable statewide planning goals, or that an exception to any applicable statewide planning goal is justified under subsection (2) of this section; or

(C) For a facility that the council elects to evaluate against the statewide planning goals pursuant to subsection (5) of this section, that the proposed facility complies with the applicable statewide planning goals or that an exception to any applicable statewide planning goal is justified under subsection (2) of this section.

(2) The council may find goal compliance for a facility that does not otherwise comply with one or more statewide planning goals by taking an exception to the applicable goal. Notwithstanding the requirements of ORS 197.732, the statewide planning goal pertaining to the exception process or any rules of the Land Conservation and Development Commission pertaining to an exception process goal, the council may take an exception to a goal if the council finds:

(a) The land subject to the exception is physically developed to the extent that the land is no longer available for uses allowed by the applicable goal;

(b) The land subject to the exception is irrevocably committed as described by the rules of the Land Conservation and Development Commission to uses not allowed by the applicable goal because existing adjacent uses and other relevant factors make uses allowed by the applicable goal impracticable; or

(c) The following standards are met:

(A) Reasons justify why the state policy embodied in the applicable goal should not apply;

(B) The significant environmental, economic, social and energy consequences anticipated as a result of the proposed facility have been identified
and adverse impacts will be mitigated in accordance with rules of the council
applicable to the siting of the proposed facility; and

(C) The proposed facility is compatible with other adjacent uses or will
be made compatible through measures designed to reduce adverse impacts.

(3) If compliance with applicable substantive local criteria and applicable
statutes and state administrative rules would result in conflicting conditions
in the site certificate or amended site certificate, the council shall resolve
the conflict consistent with the public interest. A resolution may not result
in a waiver of any applicable state statute.

(4) An applicant for a site certificate shall elect whether to demonstrate
compliance with the statewide planning goals under subsection (1)(a) or (b)
of this section. The applicant shall make the election on or before the date
specified by the council by rule.

(5) Upon request by the State Department of Energy, the special advisory
group established under ORS 469.480 shall recommend to the council, within
the time stated in the request, the applicable substantive criteria under
subsection (1)(b)(A) of this section. If the special advisory group does not
recommend applicable substantive criteria within the time established in the
department’s request, the council may either determine and apply the appli-
cable substantive criteria under subsection (1)(b) of this section or determine
compliance with the statewide planning goals under subsection (1)(b)(B) or
(C) of this section. If the special advisory group recommends applicable
substantive criteria for an energy facility described in ORS 469.300 or a re-
lated or supporting facility that does not pass through more than one local
government jurisdiction or more than three zones in any one jurisdiction, the
council shall apply the criteria recommended by the special advisory group.
If the special advisory group recommends applicable substantive criteria for
an energy facility as defined in ORS 469.300 (11)(a)(C) to (E) or a related or
supporting facility that passes through more than one jurisdiction or more
than three zones in any one jurisdiction, the council shall review the re-
commended criteria and determine whether to evaluate the proposed facility
against the applicable substantive criteria recommended by the special advisory group, against the statewide planning goals or against a combination of the applicable substantive criteria and statewide planning goals. In making its determination, the council shall consult with the special advisory group and shall consider:

(a) The number of jurisdictions and zones in question;
(b) The degree to which the applicable substantive criteria reflect local government consideration of energy facilities in the planning process; and
(c) The level of consistency of the applicable substantive criteria from the various zones and jurisdictions.

(6) The council is not subject to ORS 197.180 and a state agency may not require an applicant for a site certificate to comply with any rules or programs adopted under ORS 197.180.

(7) On or before its next periodic review, each affected local government shall amend its comprehensive plan and land use regulations as necessary to reflect the decision of the council pertaining to a site certificate or amended site certificate.

(8) Notwithstanding ORS 34.020 or 197.825 or any other provision of law, the affected local government’s land use approval of a proposed facility under subsection (1)(a) of this section and the special advisory group’s recommendation of applicable substantive criteria under subsection (5) of this section shall be subject to judicial review only as provided in ORS 469.403. If the applicant elects to comply with subsection (1)(a) of this section, the provisions of this subsection shall apply only to proposed projects for which the land use approval of the local government occurs after the date a notice of intent or an application for expedited processing is submitted to the State Department of Energy.

(9) The State Department of Energy, in cooperation with other state agencies, shall provide, to the extent possible, technical assistance and information about the siting process to local governments that request such assistance or that anticipate having a facility proposed in their jurisdiction.
SECTION 72. ORS 469.505 is amended to read:

469.505. (1) In making a determination regarding compliance with statutes, rules and ordinances administered by another agency or compliance with requirements of ORS 469.300 to 469.563 and 469.590 to 469.619 where another agency has special expertise, consultation with the other agency shall occur during the notice of intent and site certificate application process. Any permit application for which the permitting decision has been delegated by the federal government to a state agency other than the Energy Facility Siting Council shall be reviewed, whenever feasible, simultaneously with the council’s review of the site certificate application. Any hearings required on such permit applications shall be consolidated, whenever feasible, with hearings under ORS 469.300 to 469.563 and 469.590 to 469.619.

(2) Before resolving any conflicting conditions in site certificates or amended site certificates under ORS 469.503 [(3)] (2) and 469.504, the council shall notify and consult with the agencies and local governments responsible for administering the statutes, administrative rules or substantive local criteria that result in the conflicting conditions regarding potential conflict resolution.

REGULATION OF LANDFILL METHANE EMISSIONS

SECTION 73. Section 74 of this 2020 Act is added to and made a part of ORS chapter 468A.

SECTION 74. (1) As used in this section:

(a) “Anthropogenic greenhouse gas emissions” has the meaning given that term in section 4 of this 2020 Act.

(b) “Carbon dioxide equivalent” has the meaning given that term in section 4 of this 2020 Act.

(c) “Hazardous waste” has the meaning given that term in ORS 466.005.

(d) “Land disposal site” has the meaning given that term in ORS
459.005.

(e) “Landfill” has the meaning given that term in ORS 459.005.

(f) “Solid waste” has the meaning given that term in ORS 459.005.

(2) It is the intent of the Legislative Assembly that the standards and requirements adopted by rule under this section be at least as stringent as the most stringent standards and requirements for reducing methane gas emissions from landfills adopted among the states having a boundary with Oregon.

(3) The Environmental Quality Commission shall adopt by rule standards and requirements for reducing methane gas emissions from landfills.

(4) The following landfills are exempt from standards and requirements adopted by rule under this section:

(a) Landfills that emit less than 25,000 metric tons of carbon dioxide equivalent in anthropogenic greenhouse gas emissions annually, as reported under ORS 468A.280.

(b) Landfills that receive only hazardous waste.

(c) Landfills that receive only waste from building demolition or construction.

(d) Land disposal sites that are closed as of the effective date of this 2020 Act and are no longer receiving solid waste, are maintained in compliance with ORS 459.268 and have less than 450,000 metric tons of waste in place.

(5) Rules adopted under this section shall include but need not be limited to:

(a) Reporting requirements related to waste in place, calculated landfill gas heat input capacity, and landfill surface emissions monitoring.

(b) Methane gas collection and control system requirements for landfills with reported calculated landfill gas heat input capacity exceeding 3 million British thermal units per hour.
(c) Standards and requirements for methane surface emissions, monitoring and corrective actions.

(d) Alternative compliance measures and methods that may be applied for certain landfills on a case-by-case basis.

(e) Standards and requirements for records retention, landfill closure notification, methane gas collection and control device removal or modification and annual operating reports.

SECTION 75. The Environmental Quality Commission shall adopt rules under section 74 of this 2020 Act in time for the rules to become operative no later than July 1, 2022.

REGULATION OF HYDROFLUOROCARBONS

SECTION 76. Section 77 of this 2020 Act is added to and made a part of ORS chapter 468.

SECTION 77. (1) As used in this section:

(a) “Class I substance” means a substance listed as a Class I substance in:

(A) 42 U.S.C. 7671a(a), as that section read on November 15, 1990; or

(B) Appendix A of 40 C.F.R. part 82, subpart A, as that appendix read on January 3, 2017.

(b) “Class II substance” means a substance listed as a Class II substance in:

(A) 42 U.S.C. 7671a(b), as that section read on November 15, 1990; or

(B) Appendix B of 40 C.F.R. part 82, subpart A, as that appendix read on January 3, 2017.

(c) “Greenhouse gas” has the meaning given that term in section 4 of this 2020 Act.

(d) “Hydrofluorocarbons” means a class of greenhouse gases that
are saturated organic compounds containing hydrogen, fluorine and carbon.

(e) “Retrofit” has the meaning given that term as defined in 40 C.F.R. 82.154, as that section read on January 3, 2017.

(f)(A) “Substitute” includes a chemical, product substitute or alternative manufacturing process, whether existing or new, that is used to perform a function previously performed by a class I substance or class II substance and any substitute subsequently adopted to perform that function, including, but not limited to, hydrofluorocarbons.

(B) “Substitute” does not include 2-BTP or any compound as applied to its use in aerospace fire extinguishing systems.

(2)(a) The Environmental Quality Commission shall adopt rules prohibiting the sale, lease, rent, installation, or other actions causing equipment or products to enter into commerce in Oregon if that equipment or product consists of, uses, or will use a substitute, as set forth in appendices U and V of 40 C.F.R. part 82, subpart G, as those laws read on January 3, 2017, for the applications or end uses restricted by appendix U or V of 40 C.F.R. part 82, subpart G, as those laws read on January 3, 2017. Except where existing equipment is retrofit, nothing in this section requires a person that acquired a restricted product or equipment prior to the effective date of the restrictions in rules adopted pursuant to this section to cease use of that product or equipment.

(b) The commission may adopt additional prohibitions of the sale, lease, rent or installation of, or of other actions that cause equipment or products to enter into commerce in Oregon that contain hydrofluorocarbons or other substitutes if the commission determines that the equipment or products pose a risk to human health or the environment and that a substitute is currently or potentially available.

(4) Rules adopted by the commission under this section:

(a) May require regular reporting by manufacturers, importers and
distributors of equipment and products containing hydrofluorocarbons or other substitutes.

(b) May require the labeling and disclosure of equipment and products containing hydrofluorocarbons or other substitutes.

(c) May include rules necessary for the administration, implementation, and enforcement of this section.

(5) Where feasible and appropriate, the commission shall endeavor to adopt rules under this section that are consistent with the regulatory standards, exemptions, reporting obligations, disclosure requirements and other compliance requirements of other states or the federal government, if those jurisdictions have adopted restrictions on the use of hydrofluorocarbons and other substitutes.

SECTION 78. Section 79 of this 2020 Act is added to and made a part of ORS chapter 455.

SECTION 79. The Department of Consumer and Business Services shall adopt rules to amend the state building code as necessary to align the requirements for the use of certain equipment or products with the prohibitions and requirements for the use of hydrofluorocarbons or other substitutes in those equipment or products as adopted by rule by the Environmental Quality Commission under section 77 of this 2020 Act.

OREGON GLOBAL WARMING COMMISSION ABOLISHED

SECTION 80. (1) The Oregon Global Warming Commission is abolished. On the operative date of this section, the tenure of office of the members of the Oregon Global Warming Commission ceases.

(Amendments to Statutes)

SECTION 81. ORS 352.823 is amended to read:

352.823. (1) The Oregon Climate Change Research Institute is established at Oregon State University. In administering the institute, Oregon State University may seek the cooperation of other public universities listed in ORS 352.002.

(2) The purpose of the Oregon Climate Change Research Institute is to:

(a) Facilitate research by faculty at public universities listed in ORS 352.002 on climate change and its effects on natural and human systems in Oregon;

(b) Serve as a clearinghouse for climate change information;

(c) Provide climate change information to the public in integrated and accessible formats; and

[(d) Support the Oregon Global Warming Commission in developing strategies to prepare for and to mitigate the effects of climate change on natural and human systems; and]

[(e)] (d) Provide technical assistance to local governments to assist them in developing climate change policies, practices and programs.

(3) The Oregon Climate Change Research Institute shall assess, at least once each biennium, the state of climate change science, including biological, physical and social science, as it relates to Oregon and the likely effects of climate change on the state. The institute shall submit the assessment to the Legislative Assembly in the manner provided in ORS 192.245 and to the Governor.

(4) State agencies may contract with the Oregon Climate Change Research Institute to fulfill agency needs regarding the collection, storage, integration, analysis, dissemination and monitoring of climate change information, research and training.

SECTION 82. ORS 468A.265 is amended to read:

468A.265. As used in ORS 468A.265 to 468A.277:
(1) “Biodiesel” means a motor vehicle fuel consisting of mono-alkyl esters of long chain fatty acids derived from vegetable oils, animal fats or other nonpetroleum resources, not including palm oil.

(2) “Clean fuels program” means the program adopted by rule by the Environmental Quality Commission under ORS 468A.266 (1)(b).

(3) “Compliance period” means the calendar year during which a regulated party must demonstrate compliance with the low carbon fuel standards through participation in the clean fuels program.

(4) “Credit” means a unit of measure generated when a fuel with a carbon intensity that is less than the applicable low carbon fuel standard is produced, imported or dispensed for use in Oregon, such that one credit is equal to one metric ton of carbon dioxide equivalent.

(5) “Credit aggregator” means a person who voluntarily registers to participate in the clean fuels program to facilitate credit generation on behalf of a credit generator and to trade credits with regulated parties, credit generators and other credit aggregators.

(6) “Credit generator” means a person eligible to generate credits by providing fuels for use in Oregon with carbon intensities less than the applicable low carbon fuel standard.

(7) “Deferral” means a delay or change in the applicability of a scheduled applicable low carbon fuel standard for a period of time, accomplished pursuant to an order issued under ORS 468A.273 or 468A.274.

(8) “Deficit” means a unit of measure generated when a fuel with a carbon intensity that is more than the applicable low carbon fuel standard is produced, imported or dispensed for use in Oregon, such that one deficit is equal to one metric ton of carbon dioxide equivalent.

(9) “Greenhouse gas” [has the meaning given that term in ORS 468A.210] includes, but is not limited to, carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons, sulfur hexafluoride and nitrogen trifluoride.

(10) “Low carbon fuel standard” means a standard adopted by the com-
mission by rule under ORS 468A.266 for the reduction of greenhouse gas emissions, on average, per unit of fuel energy.

(11) “Motor vehicle” has the meaning given that term in ORS 801.360.

(12) “Regulated party” means a person responsible for complying with the low carbon fuel standards.

(13) “Small deficit” means a net deficit balance at the end of a compliance period, after retirement of all credits held by a regulated party, that does not exceed a percentage set by the commission by rule of the total number of deficits that the regulated party generated for a compliance period and that may not be greater than 10 percent of the total number of deficits that the regulated party generated for a compliance period.

SECTION 83. ORS 468A.279 is amended to read:

468A.279. (1) As used in this section:

(a) “Greenhouse gas” has the meaning given that term in ORS 468A.265.

(b) “Motor vehicle” has the meaning given that term in ORS 801.360.

(2) The Environmental Quality Commission may adopt by rule standards and requirements described in this section to reduce greenhouse gas emissions.

(3)(a) The commission may adopt requirements to prevent the tampering, alteration and modification of the original design or performance of motor vehicle pollution control systems.

(b) Before adopting requirements under this section, the commission shall consider the antitampering requirements and exemptions of the State of California.

(4) The commission may adopt requirements for motor vehicle service providers to check and inflate tire pressure according to the tire manufacturer’s or motor vehicle manufacturer’s recommended specifications, provided that the requirements:

(a) Do not apply when the primary purpose of the motor vehicle service is fueling vehicles; and
(b) Do not require motor vehicle service providers to purchase equipment to check and inflate tire pressure.

(5) The commission may adopt restrictions on engine use by commercial ships while at port, and requirements that ports provide alternatives to engine use such as electric power, provided that:

(a) Engine use shall be allowed when necessary to power mechanical or electrical operations if alternatives are not reasonably available;

(b) Engine use shall be allowed when necessary for reasonable periods due to emergencies and other considerations as determined by the commission; and

(c) The requirements must be developed in consultation with representatives of Oregon ports and take into account operational considerations, operational agreements, international protocols and limitations, the ability to fund the purchase and use of electric power equipment and the potential effect of the requirements on competition with other ports.

(6) In adopting rules under this section, the commission shall evaluate:

(a) Safety, feasibility, net reduction of greenhouse gas emissions and cost-effectiveness;

(b) Potential adverse impacts to public health and the environment, including but not limited to air quality, water quality and the generation and disposal of waste in this state;

(c) Flexible implementation approaches to minimize compliance costs; and

(d) Technical and economic studies of comparable greenhouse gas emissions reduction measures implemented in other states and any other studies as determined by the commission.

(7) The provisions of this section do not apply to:

(a) Motor vehicles registered as farm vehicles under the provisions of ORS 805.300.

(b) Farm tractors, as defined in ORS 801.265.

(c) Implements of husbandry, as defined in ORS 801.310.

(d) Motor trucks, as defined in ORS 801.355, used primarily to transport
SECTION 84. ORS 757.528 is amended to read:

757.528. (1) Unless modified by rule by the State Department of Energy as provided in this section, the greenhouse gas emissions standard that applies to consumer-owned utilities is 1,100 pounds of greenhouse gases per megawatt-hour for a generating facility.

(2) Unless modified pursuant to subsection (4) of this section, the greenhouse gas emissions standard includes only carbon dioxide emissions.

(3) For purposes of applying the emissions standard to cogeneration facilities, the department shall establish an output-based methodology to ensure that the calculation of emissions of greenhouse gases for cogeneration facilities recognizes the total usable energy output of the process and includes all greenhouse gases emitted by the facility in the production of both electrical and thermal energy.

(4) The department shall review the greenhouse gas emissions standard established under this section no more than once every three years. After public notice and hearing, and consultation with the Public Utility Commission, the department may:

(a) Modify the emissions standard to include other greenhouse gases as defined in ORS 468A.210 468A.265, with the other greenhouse gases expressed as their carbon dioxide equivalent; and

(b) Modify the emissions standard based upon current information on the rate of greenhouse gas emissions from a commercially available combined-cycle natural gas generating facility that:

(A) Employs a combination of one or more gas turbines and one or more steam turbines and produces electricity in the steam turbines from waste heat produced by the gas turbines;

(B) Has a heat rate at high elevation within the boundaries of the Western Electricity Coordinating Council; and

(C) Has a heat rate at ambient temperatures when operating during the hottest day of the year.
In modifying the greenhouse gas emissions standard, the department shall:

(a) Use an output-based methodology to ensure that the calculation of greenhouse gas emissions through cogeneration recognizes the total usable energy output of the process and includes all greenhouse gases emitted by the generating facility in the production of both electrical and thermal energy; and

(b) Consider the effects of the emissions standard on system reliability and overall costs to electricity consumers.

If upon a review conducted pursuant to subsection (4) of this section, the department determines that a mandatory greenhouse gas emissions limit has been established pursuant to state or federal law, the department shall issue a report to the appropriate legislative committees of the Legislative Assembly stating which portions, if any, of the greenhouse gas emissions standard are no longer necessary as a matter of state law.

REQUIREMENTS FOR ETHANOL CONTENT IN GASOLINE

SECTION 85. ORS 646.913 is amended to read:

646.913. (1) Except as provided in subsection (4) of this section, a wholesale dealer, retail dealer or nonretail dealer may not sell gasoline or offer gasoline for sale unless the gasoline contains at least 10 percent denatured fuel ethanol by volume. Gasoline that contains anhydrous ethanol in concentrations between 9.2 percent and 10 percent by volume complies with the requirement set forth in this subsection.

(2) The State Department of Agriculture shall adopt standards for gasoline blended with ethanol that is sold in this state. The standards that the department adopts shall require that the gasoline blended with ethanol:

(a) Contains ethanol that is derived from agricultural or woody waste or residue;

(b) Complies with the volatility requirements specified in 40 C.F.R. part [130]
(c) Complies with ASTM International specification D 4814, Standard Specification for Automotive Spark-Ignition Engine Fuel;

(d) Is not blended with casinghead gasoline, absorption gasoline, drip gasoline or natural gasoline after the gasoline has been sold, transferred or otherwise removed from a refinery or terminal; and

(3) The department may review specifications adopted by ASTM International, or equivalent organizations, and federal regulations and revise the standards adopted under this section as necessary.

(4) A wholesale dealer, retail dealer or nonretail dealer may sell or offer for sale gasoline that is not blended with ethanol if the gasoline has an octane rating, as defined in ORS 646.945, of 91 or above or if the gasoline is for use in:

(a) An aircraft:

(A) With a supplemental type certificate approved by the Federal Aviation Administration that allows the aircraft to use gasoline that is intended for use in motor vehicles; or

(B) Issued a type certificate by an aircraft engine manufacturer that allows the aircraft to use gasoline that is intended for use in motor vehicles;

(b) An aircraft that has been issued an experimental certificate, as described in 14 C.F.R. 21.191, by the Federal Aviation Administration and for which the manufacturer's specifications require the use of gasoline that is intended for use in motor vehicles;

(c) A light-sport aircraft, as defined in 14 C.F.R. 1.1, for which the manufacturer's specifications require the use of gasoline that is intended for use in motor vehicles;

(d) A vintage aircraft, as defined by the Oregon Department of Aviation
by rule, for which the manufacturer’s specifications require the use of gaso-
line that is intended for use in motor vehicles;
(e) An antique vehicle, as defined in ORS 801.125;
(f) A Class I all-terrain vehicle, as defined in ORS 801.190;
(g) A Class III all-terrain vehicle, as defined in ORS 801.194;
(h) A Class IV all-terrain vehicle, as defined in ORS 801.194 (2);
(i) A racing activity vehicle, as defined in ORS 801.404;
(j) A snowmobile, as defined in ORS 801.490;
(k) Tools, including but not limited to lawn mowers, leaf blowers and
chain saws; or
(L) A watercraft.

LIGHT BULB ENERGY EFFICIENCY STANDARDS

SECTION 86. (1) As used in this section:
(a) “General service lamp” includes general service incandescent
lamps, compact fluorescent lamps, general service light-emitting diode
lamps, organic light-emitting diode lamps and any other lamps that
are used to satisfy lighting applications traditionally served by general
service incandescent lamps.
(b) “High CRI fluorescent lamp” means a fluorescent lamp with a
color rendering index of 87 or greater and that is not a compact flu-
orescent lamp.
(2) A person may not sell or offer for sale in this state a new gen-
eral service lamp manufactured on or after January 1, 2020, unless the
efficiency of the new general service lamp meets or exceeds 45 lumens
per watt, when tested in accordance with the applicable federal test
procedures for general service lamps prescribed in 10 C.F.R. 430.23 in
effect as of January 3, 2017.
(3)(a) Subject to paragraph (b) of this subsection, a person may not
sell or offer for sale a new high CRI fluorescent lamp unless the effi-
ciency of the new high CRI fluorescent lamp meets or exceeds the eff-
iciency standards set forth in 10 C.F.R. 430.32(n)(4) in effect as of
January 3, 2017, as measured in accordance with the test methods
prescribed in 10 C.F.R. 430.23 (appendix R to subpart B of part 430) in
effect as of January 3, 2017.

(b) Paragraph (a) of this subsection applies to high CRI fluorescent
lamps manufactured on or after January 1, 2023, or an earlier appli-
cability date, not to precede January 1, 2022, as established by the
State Department of Energy by rule. The department may not adopt
by rule an earlier applicability date unless an adjoining state adopts
an efficiency standard for high CRI fluorescent lamps that is compa-
rable to the standard described in paragraph (a) of this subsection and
that becomes applicable before January 1, 2023.

(4) The department may by rule adjust the definition of “general
service lamp” or “high CRI fluorescent lamp” or may by rule adjust
the minimum efficiency standards described in subsections (2) and (3)
of this section if the department determines that the adjustments are
necessary to coordinate to the greatest extent practicable with the
efficiency standards for general service lamps and high CRI fluores-
cent lamps of adjoining states that have adopted comparable efficiency
standards.

EXPEDITED JUDICIAL REVIEW TO SUPREME COURT;
EXPIRATION

SECTION 87. (1) It is the intent of the Legislative Assembly that
the provisions of this 2020 Act relating to the receipt of moneys by the
state through the sale of allowances by auction under section 28 of this
2020 Act do not render this 2020 Act a bill for raising revenue subject
to the provisions of Article IV, sections 18 and 25 (2), of the Oregon
Constitution.
(2) Original jurisdiction to determine whether this 2020 Act is a bill for raising revenue subject to the provisions of Article IV, sections 18 and 25 (2), of the Oregon Constitution, is conferred on the Supreme Court.

(3)(a) Any person interested in or affected or aggrieved by, or who will be affected or aggrieved by, section 28 of this 2020 Act may petition for judicial review under this section. A petition for review must be filed within 60 days after the effective date of this 2020 Act.

(b) The petition must state facts showing how the petitioner is or will be interested, affected or aggrieved and the grounds upon which the petition is based.

(4) The petitioner shall serve a copy of the petition by registered or certified mail upon the Department of Environmental Quality, the Administrator of the Office of Greenhouse Gas Regulation, the Attorney General and the Governor.

(5) Proceedings for review under this section shall be given priority over all other matters before the Supreme Court.

(6) In the event that the Supreme Court determines that there are factual issues in the petition, the Supreme Court may appoint a special master to hear evidence and to prepare recommended findings of fact.

SECTION 88. (1) Original jurisdiction to determine whether auctions conducted under section 28 of this 2020 Act impose a tax from which the revenues are subject to the provisions of Article IX, section 3a, of the Oregon Constitution, is conferred on the Supreme Court.

(2)(a) Any person interested in or affected or aggrieved by, or who will be affected or aggrieved by, section 28 of this 2020 Act may petition for judicial review under this section. A petition for review must be filed within 60 days after the effective date of this 2020 Act.

(b) The petition must state facts showing how the petitioner is or will be interested, affected or aggrieved and the grounds upon which the petition is based.
(3) The petitioner shall serve a copy of the petition by registered or certified mail upon the Department of Environmental Quality, the Administrator of the Office of Greenhouse Gas Regulation, the Attorney General and the Governor.

(4) Proceedings for review under this section shall be given priority over all other matters before the Supreme Court.

(5) In the event that the Supreme Court determines that there are factual issues in the petition, the Supreme Court may appoint a special master to hear evidence and to prepare recommended findings of fact.

SECTION 89. If section 28 of this 2020 Act is judicially declared by the Supreme Court to not impose a tax from which the revenues are subject to the provisions of Article IX, section 3a, of the Oregon Constitution, then it is the intent of the Legislative Assembly that, after the date of the judicial declaration, the Legislative Assembly will:

(1) Identify specific opportunities for using state proceeds from auctions conducted under section 28 of this 2020 Act each biennium to reduce greenhouse gas emissions associated with transportation through investments in transportation electrification, compressed natural gas and hydrogen fuel cell vehicles and infrastructure, and low-emission and zero-emission transit vehicles;

(2) Identify specific opportunities for using state proceeds from auctions conducted under section 28 of this 2020 Act each biennium to reduce greenhouse gas emissions through the replacement of medium-duty trucks and heavy-duty trucks powered by diesel engines or the repower or retrofit of diesel engines that power medium-duty trucks and heavy-duty trucks;

(3) Identify specific opportunities for using state proceeds from auctions conducted under section 28 of this 2020 Act each biennium to reduce greenhouse gas emissions related to agriculture, with priority given to the replacement, repower or retrofit of nonroad equipment to reduce emissions that present serious risks to farmworker health;
and

(4) Modify the distributions of state proceeds from auctions as provided in sections 28, 29, 33 to 37 and 38 to 40 of this 2020 Act, and repeal or amend any other statutes or session laws, as deemed necessary to:

(a) Address the judicial declaration by the Supreme Court that section 28 of this 2020 Act does not impose a tax that is subject to the provisions of Article IX, section 3a, of the Oregon Constitution; and

(b) Implement the opportunities identified pursuant to subsections (1) to (3) of this section.

SECTION 90. Section 89 of this 2020 Act becomes operative on January 2 of the year following the date on which section 28 of this 2020 Act is judicially declared by the Supreme Court to not impose a tax from which the revenues are subject to the provisions of Article IX, section 3a, of the Oregon Constitution.

SECTION 91. Sections 89 and 90 of this 2020 Act are repealed on the earlier of:

(1) The date on which section 28 of this 2020 Act is judicially declared by the Supreme Court to impose a tax from which the revenues are subject to the provisions of Article IX, section 3a, of the Oregon Constitution; or

(2) January 2, 2028.

SECTION 92. (1) Original jurisdiction to determine whether auctions conducted under section 28 of this 2020 Act impose a tax or excise from which the proceeds are subject to the provisions of Article VIII, section 2 (1)(g), of the Oregon Constitution, is conferred on the Supreme Court.

(2)(a) Any person interested in or affected or aggrieved by, or who will be affected or aggrieved by, section 28 of this 2020 Act may petition for judicial review under this section. A petition for review must be filed within 60 days after the effective date of this 2020 Act.

(b) The petition must state facts showing how the petitioner is or
will be interested, affected or aggrieved and the grounds upon which
the petition is based.

(3) The petitioner shall serve a copy of the petition by registered
or certified mail upon the Department of Environmental Quality, the
Administrator of the Office of Greenhouse Gas Regulation, the Attor-
ney General and the Governor.

(4) Proceedings for review under this section shall be given priority
over all other matters before the Supreme Court.

(5) In the event that the Supreme Court determines that there are
factual issues in the petition, the Supreme Court may appoint a special
master to hear evidence and to prepare recommended findings of fact.

REPORTS AND REVIEWS

SECTION 93. (1) The Legislative Revenue Officer, in consultation
with the Department of Transportation and any other appropriate
state agencies, shall conduct the following economic modeling and
analyses related to the impacts of regulating anthropogenic
greenhouse gas emissions attributable to the combustion of motor
vehicle fuel used to propel motor vehicles in this state:

(a) Economic modeling of the increases in fuel prices to operate
light vehicles and heavy vehicles in this state, in 2024 and each fol-
lowing calendar year before 2036, due to regulation of motor vehicle
fuel producers and importers under both the Oregon Greenhouse Gas
Initiative established under sections 4 to 32 of this 2020 Act and the
clean fuels program adopted by rule under ORS 468A.266.

(b) Economic modeling of the increases in costs to procure and
build public infrastructure including streets, roads, bridges and high-
ways due to regulation of motor vehicle fuel producers and importers
under both the Oregon Greenhouse Gas Initiative established under
sections 4 to 32 of this 2020 Act and the clean fuels program adopted
by rule under ORS 468A.266.

(c) An analysis of the pace of the following changes within the Oregon transportation sector that would be necessary to allow for the State of Oregon to achieve the greenhouse gas emissions reduction goals set forth in ORS 468A.205, and an analysis of the costs to consumers in accomplishing those changes:

(A) Transportation electrification;
(B) Adoption of alternative fuel and high efficiency vehicles; and
(C) Reductions in vehicle miles traveled.

(d) An analysis of the permissible uses of moneys deposited in the Transportation Decarbonization Investments Account established in section 34 of this 2020 Act.

(e) An analysis of alternatives to the current system of taxing highway use through motor vehicle fuel taxes.

(f) An analysis of the potential for the geographic implementation of a carbon price for motor vehicle fuels, as provided in section 13 of this 2020 Act, to influence:

(A) Choices by the sellers of motor vehicle fuel at retail regarding where to locate retail facilities in response to the Oregon Greenhouse Gas Initiative; or

(B) Choices by retail motor vehicle fuel customers in response to the Oregon Greenhouse Gas Initiative regarding where to purchase motor vehicle fuel.

(2) On or before September 15, 2022, and in the manner provided by ORS 192.245, the Legislative Revenue Officer shall provide a report detailing the results of the economic modeling and analyses required by this section to a committee of the Legislative Assembly related to the environment and to the Joint Committee on Transportation.

SECTION 94. Section 75, chapter 750, Oregon Laws 2017, is amended to read:

Sec. 75. (1) The Oregon Transportation Commission shall conduct a
biennial study.

(2)(a) The purpose of the study is to determine:

[(a)] (A) The proportionate share that users of vehicles that are powered by different means should pay for the costs of maintenance, operation and improvement of the highways in this state; and

[(b)] (B) Whether users of vehicles that are powered by different means are paying that share.

[(2)] (b) If the commission determines that users are not paying a proportionate share, then the commission may include in the report recommendations for legislation.

[(3)] (c) This [section] subsection applies to users paying the vehicle registration fee under ORS 803.420 (6)(a).

(3) In addition to addressing the purpose set forth in subsection (2) of this section, the study shall examine the effects of the Oregon Greenhouse Gas Initiative established under sections 4 to 32 of this 2020 Act on accelerating the transition in this state to high efficiency vehicles and engines and alternative fuels, and the impacts of those changes on the long-term funding sources for paying the costs of maintenance, operation and improvement of the highways in this state.

(4) The commission shall report the results of the study to the Road User Fee Task Force established under ORS 184.843, the Joint Committee on Transportation established under [section 26 of this 2017 Act] ORS 171.858 and a committee of the Legislative Assembly related to the environment, in the manner provided by ORS 192.245, no later than September 15, [2023] of each odd-numbered year, beginning in 2025.

SECTION 95. Section 76, chapter 750, Oregon Laws 2017, is amended to read:

Sec. 76. Section 75, chapter 750, Oregon Laws 2017, [of this 2017 Act] is repealed on January 2, [2024] 2030.

SECTION 96. (1) The Oregon Greenhouse Gas Reduction Board shall
develop a Just Transition Plan for providing assistance to households, businesses and workers impacted by climate change or climate change policies. The board shall develop the plan in consultation with the Higher Education Coordinating Commission, the State Workforce and Talent Development Board, the Employment Department and any other state agencies. The plan shall set forth recommendations, which may include recommendations for legislation, for distributing moneys deposited in the Climate Investments Fund established in section 39 of this 2020 Act for the following purposes:

(a) To support economic diversification, job creation, job training and other employment services; and
(b) To fund programs and activities that provide financial support for workers dislocated or adversely affected by climate change or climate change policies.

(2) The plan shall include:

(a) Recommendations for implementing a Just Transition Program;
(b) Recommendations regarding the level of funding necessary to carry out activities pursuant to the Just Transition Program; and
(c) Recommendations regarding the maintenance and use of any funds dedicated to implementation of the Just Transition Program, including but not limited to recommendations regarding the development of reserves to be used for the replacement of wages or benefits for workers dislocated or adversely affected by climate change or climate change policies.

(3) The Oregon Greenhouse Gas Reduction Board shall seek to develop the plan in a manner that is consistent with and complementary to other local, state and federal programs, policies and incentives that serve to carry out the recommendations set forth in the plan, including but not limited to activities undertaken by the Higher Education Coordinating Commission under ORS 660.318. The plan may include, but need not be limited to, a plan for a competitive grant program.
(4) The board shall submit the plan, in the manner provided by ORS 192.245, to a committee of the Legislative Assembly related to the environment no later than September 15, 2025.

OREGON GREENHOUSE GAS REDUCTION BOARD,
OFFICE OF GREENHOUSE GAS REGULATION ESTABLISHED

(Oregon Greenhouse Gas Reduction Board)

SECTION 97. (1) The Oregon Greenhouse Gas Reduction Board is established within the Department of Environmental Quality.

(2) The following shall serve as nonvoting members of the board:

(a) One member jointly appointed by the President of the Senate and the Speaker of the House of Representatives who is a member of either the Senate or the House of Representatives and who is also a member of the Republican party and serves as a member of a committee of the Legislative Assembly related to climate;

(b) One member jointly appointed by the President of the Senate and the Speaker of the House of Representatives who is a member of either the Senate or the House of Representatives and who is also a member of the Democratic party and serves as a member of a committee of the Legislative Assembly related to climate;

(c) One member who represents the Oregon Climate Change Research Institute;

(d) The chairperson of the Environmental Justice Task Force;

(e) The Director of Agriculture;

(f) The Director of the Department of Environmental Quality;

(g) A member of the Public Utility Commission;

(h) The Director of Transportation;

(i) The Director of the Department of Land Conservation and Development;
(j) The Water Resources Director;
(k) The Director of the State Department of Energy;
(L) The Director of the Oregon Health Authority;
(m) The State Forester;
(n) The Director of the Department of Consumer and Business Services;
(o) A representative of eligible Indian tribes, as that term in defined in section 4 of this 2020 Act; and

(3) The Governor shall appoint seven voting members to the board, subject to confirmation by the Senate as provided in ORS 171.562 and 171.565. Members of the board appointed under this subsection must be residents of this state well informed on energy and climate issues and shall include the following:
(a) Two members who have expertise in the energy sector, one of whom has expertise in renewable energy;
(b) One member who has expertise in climate change mitigation;
(c) One member who is an economist or who has expertise in finance;
(d) One member who has expertise in industrial energy use and who represents the interests of the business community;
(e) One member who has expertise in transportation; and
(f) One member who has expertise in offset projects on forestlands or agricultural lands.

(4) The Administrator of the Office of Greenhouse Gas Regulation and the Office of Greenhouse Gas Regulation shall provide clerical, technical and management personnel to serve the board. Other agencies shall provide support as requested by the office or the board.

SECTION 98. (1) The term of office of each voting member appointed to the Oregon Greenhouse Gas Reduction Board is four years, but the members of the board may be removed by the Governor. Be-
fore the expiration of the term of a voting member, the Governor shall appoint a successor to assume the duties of the voting member on July 1 of the next following year.

(2) A voting member is eligible for reappointment, but no voting member appointed by the Governor under section 97 of this 2020 Act may serve more than two consecutive terms. In case of a vacancy for any cause, the Governor shall make an appointment to become immediately effective for the unexpired term.

(3) The Governor shall select one of the voting members as chairperson, for a term and with duties and powers necessary for the performance of the functions of the chairperson as the board determines.

(4) A majority of the voting members of the board constitutes a quorum for the transaction of business.

(5) The board shall meet at least once during each calendar quarter at a time and place determined by the chairperson. The board shall endeavor to hold meetings at various locations throughout this state. The board may hold additional meetings at times and places determined by the chairperson, or as requested by a majority of the voting members.

(6)(a) Members of the board who are not members of the Legislative Assembly are not entitled to compensation but may be reimbursed from funds available to the board for actual and necessary travel and other expenses the members incur in the performance of the members’ official duties in the manner and amount provided in ORS 292.495.

(b) Members of the board who are members of the Legislative Assembly shall be entitled to payment of per diem and expense reimbursement under ORS 171.072, payable from funds appropriated to the Legislative Assembly.

SECTION 99. Notwithstanding the term of office specified by section 98 of this 2020 Act, of the voting members first appointed by the Governor to the Oregon Greenhouse Gas Reduction Board:
(1) Two shall serve for terms ending July 1, 2021.
(2) Two shall serve for terms ending July 1, 2022.
(3) Two shall serve for terms ending July 1, 2023.
(4) One shall serve for a term ending July 1, 2024.

SECTION 100. (1) No voting member of the Oregon Greenhouse Gas Reduction Board shall:
(a) Hold any office or position under any political committee or party;
(b) Hold any pecuniary interest in any business entity conducting operations which if conducted in this state would be subject to the board’s regulatory jurisdiction; or
(c) Hold any pecuniary interest in, have any contract of employment with, or have any substantial voluntary transactions with any business subject to the board's regulatory jurisdiction.
(2) The prohibitions of subsection (1)(b) and (c) of this section apply to the spouse and minor children of each board member.
(3) If the Governor determines that any board member has engaged in an activity prohibited by subsection (1) of this section, or that a board member’s spouse or a minor child has done any act prohibited by subsection (2) of this section, the Governor shall remove the board member pursuant to section 98 of this 2020 Act.
(4) Subsection (3) of this section does not apply to a board member if the board member or the board member’s spouse or a minor child acquires any pecuniary interest prohibited by subsection (1) or (2) of this section, advises the Governor of such acquisition and causes divestiture of such interest within the time specified by the Governor.

SECTION 101. ORS 468.015 is amended to read:
468.015. (1) Except as provided in subsection (2) of this section, it is the function of the Environmental Quality Commission to establish the policies for the operation of the Department of Environmental Quality in a manner consistent with the policies and purposes of ORS 448.305, 454.010 to
454.040, 454.205 to 454.255, 454.505 to 454.535, 454.605 to 454.755 and ORS chapters 468, 468A and 468B. In addition, the commission shall perform any other duty vested in it by law.

(2) It is the function of the Oregon Greenhouse Gas Reduction Board to establish the policies for the operation of the Office of Greenhouse Gas Regulation established under section 104 of this 2020 Act in a manner consistent with the policies and purposes of sections 2 and 4 to 32, 38 to 40, 43, 97 to 100 and 102 to 105 of this 2020 Act. Where a conflict between rules adopted by the commission and rules adopted by the board exists, the conflict shall be resolved in favor of the public interest, as determined by the commission in consultation with the board.

SECTION 102. (1) The Oregon Greenhouse Gas Reduction Board shall:

(a) In accordance with the applicable provisions of ORS chapter 183, adopt standards and rules to perform the functions vested by law in the board including but not limited to the adoption of standards and rules for implementation of the Oregon Greenhouse Gas Initiative under sections 4 to 32 of this 2020 Act;

(b) Provide oversight to and advise the Office of Greenhouse Gas Regulation in implementing, administering and enforcing the programs and activities of the office;

(c) Identify the highest and best opportunities for investments of state proceeds from the sale of allowances under section 28 of this 2020 Act in actions that carry out the purposes of the Oregon Greenhouse Gas Initiative as set forth in section 2 of this 2020 Act;

(d) Identify and provide recommendations to the Governor and the Legislative Assembly on ways to coordinate state and local efforts to reduce greenhouse gas emissions in Oregon consistent with the greenhouse gas emissions reduction goals established by ORS 468A.205 and the purposes of the Oregon Greenhouse Gas Initiative as set forth
in section 2 of this 2020 Act and recommend efforts to help Oregon prepare for the effects of climate change;

(e) Work with state and local governments, the State Department of Energy, the Department of Education, the Higher Education Coordinating Commission and businesses to develop and implement an outreach strategy to educate Oregonians about the scientific aspects and economic impacts of climate change and to inform Oregonians of ways to reduce greenhouse gas emissions and ways to prepare for the effects of climate change; and

(f) Carry out any other duties, functions and powers vested in the board by law.

(2) In conducting the duties set forth in subsection (1) of this section, the board shall take into consideration best available science.

(3)(a) In furtherance of the greenhouse gas emissions reduction goals established by ORS 468A.205, the board may:

(A) Recommend statutory and administrative changes, policy measures and other recommendations to be carried out by state and local governments, businesses, nonprofit organizations or residents; or

(B) Recommend to the Governor the formation of citizen advisory groups to explore particular areas of concern with regard to the reduction of greenhouse gas emissions and the effects of climate change.

(b) In developing recommendations under this subsection, the board shall consider economic, environmental, health and social costs, and the risks and benefits of alternative strategies, including least-cost options. The board shall solicit and consider public comment relating to statutory, administrative or policy recommendations. Recommendations developed under this subsection may include, but need not be limited to:

(A) Recommendations regarding changes to the treatment of hydroelectric facilities under the renewable portfolio standards described
in ORS 469A.052; and

(B) Recommendations for addressing greenhouse gas emissions from the use of propane in this state.

(4) The board shall hold public hearings and provide an opportunity for public comment in carrying out the board's activities under this section.

SECTION 103. Methodology for designating impacted communities.

(1) The Oregon Greenhouse Gas Reduction Board, by rule and in consultation with the Portland State University Population Research Center, the Oregon Health Authority and other relevant state agencies and local agencies and officials, shall designate as impacted communities those communities in Oregon at risk of being disproportionately impacted by climate change. In carrying out this section, the board shall identify impacted communities based on a methodology that takes into consideration geographic, socioeconomic, historic disadvantage, public health and environmental hazard criteria. Impacted communities may include, but are not limited to:

(a) Rural communities.

(b) Coastal communities.

(c) Areas with above-average concentrations of low-income households, historically disadvantaged households, high unemployment, high linguistic isolation, low levels of homeownership, high rent burden, sensitive populations or residents with low levels of educational attainment.

(d) Areas disproportionately affected by environmental pollution and other hazards that can lead to negative public health effects, exposure or environmental degradation.

(2) The methodology required by this section must give greater weight to those criteria that the board determines are the most accurate measurements of vulnerability to the impacts of climate change and ocean acidification.
(Office of Greenhouse Gas Regulation)

SECTION 104. Office of Greenhouse Gas Regulation. (1) There is established within the Department of Environmental Quality and under the Oregon Greenhouse Gas Reduction Board the Office of Greenhouse Gas Regulation.

(2) The office shall:

(a) Administer the Oregon Greenhouse Gas Initiative established under sections 4 to 32 of this 2020 Act; and

(b) Carry out the duties, functions and powers vested in the office by law.

(3) The office may advise, consult and cooperate with other agencies of the state, political subdivisions, other states, eligible Indian tribes as defined in section 4 of this 2020 Act or the federal government, with respect to any proceedings and all matters pertaining to the reduction of greenhouse gas emissions levels in Oregon.

(Administrator of the Office of Greenhouse Gas Regulation)

SECTION 105. Administrator. (1) The Office of Greenhouse Gas Regulation is under the supervision and control of an administrator who, subject to the direction of the Oregon Greenhouse Gas Reduction Board, is responsible for the performance of the duties, functions and powers of the office.

(2) The Governor shall appoint the Administrator of the Office of Greenhouse Gas Regulation, subject to confirmation by the Senate in the manner prescribed in ORS 171.562 and 171.565. The administrator

[148]
holds office at the pleasure of the Governor.

(3) The administrator shall be paid a salary as provided by law or, if not so provided, as prescribed by the Governor.

(4) Subject to the approval of the Governor, the administrator may organize and reorganize the administrative structure of the office as the administrator considers appropriate to properly conduct the work of the office.

(5) Subject to any applicable provisions of ORS chapter 240, the administrator shall appoint all subordinate officers and employees of the office, including specialists and consultants, prescribe their duties and fix their compensation. The office may purchase materials and supplies and enter into contracts necessary to exercise and carry out the duties, functions and powers of the office.

SECTION 106. ORS 244.050 is amended to read:

244.050. (1) On or before April 15 of each year the following persons shall file with the Oregon Government Ethics Commission a verified statement of economic interest as required under this chapter:

(a) The Governor, Secretary of State, State Treasurer, Attorney General, Commissioner of the Bureau of Labor and Industries, district attorneys and members of the Legislative Assembly.

(b) Any judicial officer, including justices of the peace and municipal judges, except any pro tem judicial officer who does not otherwise serve as a judicial officer.

(c) Any candidate for a public office designated in paragraph (a) or (b) of this subsection.

(d) The Deputy Attorney General.

(e) The Deputy Secretary of State.

(f) The Legislative Administrator, the Legislative Counsel, the Legislative Fiscal Officer, the Legislative Policy and Research Director, the Secretary of the Senate, the Chief Clerk of the House of Representatives and the Legislative Equity Officer.
(g) The president and vice presidents, or their administrative equivalents, in each public university listed in ORS 352.002.

(h) The following state officers:

(A) Adjutant General.

(B) Director of Agriculture.

(C) Manager of State Accident Insurance Fund Corporation.

(D) Water Resources Director.

(E) Director of Department of Environmental Quality.

(F) Director of Oregon Department of Administrative Services.

(G) State Fish and Wildlife Director.

(H) State Forester.

(I) State Geologist.

(J) Director of Human Services.

(K) Director of the Department of Consumer and Business Services.

(L) Director of the Department of State Lands.

(M) State Librarian.

(N) Administrator of Oregon Liquor Control Commission.

(O) Superintendent of State Police.

(P) Director of the Public Employees Retirement System.

(Q) Director of Department of Revenue.

(R) Director of Transportation.

(S) Public Utility Commissioner.

(T) Director of Veterans’ Affairs.

(U) Executive director of Oregon Government Ethics Commission.

(V) Director of the State Department of Energy.

(W) Director and each assistant director of the Oregon State Lottery.

(X) Director of the Department of Corrections.

(Y) Director of the Oregon Department of Aviation.

(Z) Executive director of the Oregon Criminal Justice Commission.

(AA) Director of the Oregon Business Development Department.

(BB) Director of the Office of Emergency Management.
(CC) Director of the Employment Department.

(DD) Chief of staff for the Governor.

(EE) Director of the Housing and Community Services Department.

(FF) State Court Administrator.

(GG) Director of the Department of Land Conservation and Development.

(HH) Board chairperson of the Land Use Board of Appeals.

(II) State Marine Director.

(JJ) Executive director of the Oregon Racing Commission.

(KK) State Parks and Recreation Director.

(LL) Public defense services executive director.

(MM) Chairperson of the Public Employees’ Benefit Board.

(NN) Director of the Department of Public Safety Standards and Training.

(OO) Executive director of the Higher Education Coordinating Commission.

(PP) Executive director of the Oregon Watershed Enhancement Board.

(QQ) Director of the Oregon Youth Authority.

(RR) Director of the Oregon Health Authority.

(SS) Deputy Superintendent of Public Instruction.

(i) The First Partner, the legal counsel, the deputy legal counsel and all policy advisors within the Governor’s office.

(j) Every elected city or county official.

(k) Every member of a city or county planning, zoning or development commission.

(L) The chief executive officer of a city or county who performs the duties of manager or principal administrator of the city or county.

(m) Members of local government boundary commissions formed under ORS 199.410 to 199.519.

(n) Every member of a governing body of a metropolitan service district and the auditor and executive officer thereof.

(o) Each member of the board of directors of the State Accident Insurance
(p) The chief administrative officer and the financial officer of each common and union high school district, education service district and community college district.

(q) Every member of the following state boards and commissions:

(A) Governing board of the State Department of Geology and Mineral Industries.
(B) Oregon Business Development Commission.
(C) State Board of Education.
(D) Environmental Quality Commission.
(E) Fish and Wildlife Commission of the State of Oregon.
(F) State Board of Forestry.
(G) Oregon Government Ethics Commission.
(H) Oregon Health Policy Board.
(I) Oregon Investment Council.
(K) Oregon Liquor Control Commission.
(L) Oregon Short Term Fund Board.
(M) State Marine Board.
(N) Mass transit district boards.
(O) Energy Facility Siting Council.
(P) Board of Commissioners of the Port of Portland.
(Q) Employment Relations Board.
(R) Public Employees Retirement Board.
(S) Oregon Racing Commission.
(T) Oregon Transportation Commission.
(U) Water Resources Commission.
(V) Workers’ Compensation Board.
(W) Oregon Facilities Authority.
(X) Oregon State Lottery Commission.
(Z) Columbia River Gorge Commission.

(AA) Oregon Health and Science University Board of Directors.

(BB) Capitol Planning Commission.

(CC) Higher Education Coordinating Commission.

(DD) Oregon Growth Board.

(EE) Early Learning Council.

(FF) Oregon Greenhouse Gas Reduction Board.

(r) The following officers of the State Treasurer:

(A) Deputy State Treasurer.

(B) Chief of staff for the office of the State Treasurer.

(C) Director of the Investment Division.

(s) Every member of the board of commissioners of a port governed by ORS 777.005 to 777.725 or 777.915 to 777.953.

(t) Every member of the board of directors of an authority created under ORS 441.525 to 441.595.

(u) Every member of a governing board of a public university listed in ORS 352.002.

(v) Every member of the board of directors of an authority created under ORS 465.600 to 465.621.

(2) By April 15 next after the date an appointment takes effect, every appointed public official on a board or commission listed in subsection (1) of this section shall file with the Oregon Government Ethics Commission a statement of economic interest as required under ORS 244.060, 244.070 and 244.090.

(3) By April 15 next after the filing deadline for the primary election, each candidate described in subsection (1) of this section shall file with the commission a statement of economic interest as required under ORS 244.060, 244.070 and 244.090.

(4) Not later than the 40th day before the date of the statewide general election, each candidate described in subsection (1) of this section who will appear on the statewide general election ballot and who was not required to
file a statement of economic interest under subsections (1) to (3) of this section shall file with the commission a statement of economic interest as required under ORS 244.060, 244.070 and 244.090.

(5) Subsections (1) to (3) of this section apply only to persons who are incumbent, elected or appointed public officials as of April 15 and to persons who are candidates on April 15.

(6) If a statement required to be filed under this section has not been received by the commission within five days after the date the statement is due, the commission shall notify the public official or candidate and give the public official or candidate not less than 15 days to comply with the requirements of this section. If the public official or candidate fails to comply by the date set by the commission, the commission may impose a civil penalty as provided in ORS 244.350.

SECTION 107. ORS 468.135 is amended to read:

468.135. (1) Any civil penalty under ORS 468.140 shall be imposed in the manner provided in ORS 183.745.

(2) Except as provided in subsection (3) of this section, all penalties recovered under ORS 468.140 shall be paid into the State Treasury and credited to the General Fund, or in the event the penalty is recovered by a regional air quality control authority, it shall be paid into the county treasury of the county in which the violation occurred.

(3) Penalties recovered under ORS 468.140 for a violation of sections 4 to 32 of this 2020 Act or rules adopted pursuant to sections 4 to 32 of this 2020 Act shall be deposited in the Oregon Greenhouse Gas Initiative Operating Fund established under section 31 of this 2020 Act to be used only as provided in section 31 (3) of this 2020 Act.

APPROPRIATIONS

SECTION 108. (1) In addition to and not in lieu of any other appropriation, there is appropriated to the Department of Environmental
Quality, for the biennium ending June 30, 2021, out of the General Fund, the amount of ________ for carrying out the provisions of this 2020 Act.

(2) In addition to and not in lieu of any other appropriation, there is appropriated to the Public Utility Commission, for the biennium ending June 30, 2021, out of the General Fund, the amount of $50 million for deposit in the Traded Sector Greenhouse Gas Reduction Program Fund established under section 51 of this 2020 Act.

OPERATIVE DATE

SECTION 109. (1) Sections 2, 3, 4 to 32, 33 to 37, 38 to 40, 41, 42, 43, 44 of this 2020 Act and the amendments to ORS 468.135 by section 107 of this 2020 Act become operative on January 1, 2022.

(2) The Oregon Greenhouse Gas Reduction Board, The Office of Greenhouse Gas Regulation, the Public Utility Commission, the Department of Transportation and the Governor may adopt rules, issue orders or take any actions before the operative date specified in subsection (1) of this section that are necessary to enable the board, the office, the commission, the department and the Governor, on and after the operative date specified in subsection (1) of this section, to carry out the provisions of sections 2, 3, 4 to 32, 33 to 37, 38 to 40, 41, 42, 43, 44 of this 2020 Act and the amendments to ORS 468.135 by section 107 of this 2020 Act.

(3) (a) If, in adopting rules, issuing orders or taking any actions before the operative date specified in subsection (1) of this section as authorized by subsection (2) of this section, information is obtained by the State of Oregon that is information described in section 32 (2) of this 2020 Act, the information shall be treated as confidential business information, is exempt from disclosure under ORS 192.311 to 192.478 and may not be disclosed to any person or entity except as
provided in paragraphs (b) and (c) of this subsection.

(b) Information described in this subsection may be used and disclosed in aggregated form.

(c) This subsection does not prohibit the disclosure of information between the Office of Greenhouse Gas Regulation and other agencies of the executive department, as defined in ORS 174.112, or to persons engaged by the State of Oregon to provide administrative or technical services to support the implementation of sections 4 to 32 of this 2020 Act if the disclosure is necessary for purposes of adopting rules, issuing orders or taking any actions before the operative date specified in subsection (1) of this section to carry out the provisions of sections 2, 3, 4 to 32, 33 to 37, 38 to 40, 41, 42, 43, 44 of this 2020 Act and the amendments to ORS 468.135 by section 107 of this 2020 Act.

CAPTIONS

SECTION 110. The unit and section captions used in this 2020 Act are provided only for the convenience of the reader and do not become part of the statutory law of this state or express any legislative intent in the enactment of this 2020 Act.

EMERGENCY CLAUSE

SECTION 111. This 2020 Act being necessary for the immediate preservation of the public peace, health and safety, an emergency is declared to exist, and this 2020 Act takes effect on its passage.
