Senator Dembrow,

My name is Preston Fowler. I am a 48 year resident of the state of Oregon. In my time in this great state I have observed many changes. First paper bags became evil and plastic was the cure. Now plastic is evil and reusable plastic is the cure. What a crock.

The purpose of this email is to let you know how I and my family feel about can and trade, and Oregon's place in climate change. According to the US Energy Information Administration the United States greenhouse gas emissions are at the lowest rate since the early 1990's. Oregon being one of the cleanest states already a minuscule amount comparatively. Yes, the climate is changing, has been for over 4 billion years. What the legislature is proposing can not make a discernible difference in greenhouse gasses, but will harm everyone in the state. It will drive up the costs of gasoline and diesel. Industries who rely on transportation will be devastated.

I see only costs going up, negligible if any reduction in emissions, and businesses folding left and right. Is this what we want for our state? I say HELL NO!
