Senator Michael Dembrow,

Subject: Legislative Concept 19 - What a concept?

I had to look up your biography to confirm my initial suspicions. You come from an academic background and now live in the world of politics. You have never run a business or had to make payroll. Similar legislative members with similar backgrounds all seem to congregate together and come up with these group think ideas that are completely separated from reality and are devoid of common sense.

You and your democratic membership are on a non stop run to ruin the economy of Oregon and make it completely unaffordable to the common citizens. You are under the impression that your Clean Energy Jobs Bill will create good paying jobs especially where it's needed most? Out of touch and pretty much clueless to the reality of today's economy and how this world functions. LC-19 combined with the insane CAT tax will be the two measures that will send our state to the bottom.

Nothing we do in Oregon will impact the climate. It will only increase an already burdensome tax total that has been foisted upon us citizens. It's all about the taxes.

This is a backwards attempt to patch a bleeding PERS system that the smartest guys in the room came up with. Sad.

This is the State we live in when both houses and governorship are run by one party.

Is there anybody in Salem with an ounce of common sense or understanding of how an economy works?

I urge you to kill this measure and reject it for the good of our State.
Thank you.
