To whom it may concern:

It has been brought to my attention that you are once again considering a cap and trade bill that had been dismissed in the previous session. I am a senior citizen and our house is heated with natural gas and we like to drive around to see areas of this beautiful state but it seems you are trying to keep us off the roads and in our cold houses if you pass this bill. These price increases that are sure to come would place a hardship on us and our friends who have farms would really be hurt more than us as it is needed to run their business. To make such an increase in everyone's costs of doing business will in the end effect everyone in the state as all prices must go up and many businesses will simply move out of the state to avoid bankruptcy. I see no benefit to the cap and trade bill(LC19) other than to brag that you did something but it will have no positive effects, only negative. I urge you to reconsider passing such a burden on the people of Oregon--VOTE NO. Thank you for your time.
