Stephanie Bradley
from Southwestern Oregon.
Retired and a lifelong citizen of Oregon.
I oppose LC19.

I am against cap and trade. There will be no significant environmental benefit. By turning emissions into commodities that can be bought and sold, cap and trade will remove the incentive for industries to reduce emissions and open doors for fraud and corruption.

Living in a rural area I already pay more for my commodities. My car is 21 years old and I am still paying off a 2 year old hospital bill. I drive a 70 mile round trip for my husband's prescriptions. Oregon is taxing me into the Poorhouse.

I have the right to vote on bills that affect me and my State. No emergency clause.
