I am opposed to LC 38. The measures stated in LC 38 make firearms for self defense useless. Why is it such a difficult concept to understand that "self defense" means defending oneself against a perpetrator who has the advantage of surprise and none of the burdens imposed by laws? There are bad people out there. This isn't a myth being dreamed up by a bunch of paranoid rednecks.

When you can control the evil desires of people, then I will seriously consider further restrictions on firearms.
