I am concerned about L19. I don't want the gas price for my car to raise. I don't want higher bills for groceries because of transportation costs. I don't want my heating and electricity prices to raise. I don't want schools, hospitals, and all business to be hurt by this bill.

My extended family was and is in the logging industry and they are very much against L19. Some of my family lives on rural farms and it will raise their costs. Some people will lose their jobs.

Please do not pass L19.

Carolyn Webb, Corvallis, OR
