I am a big supporter of HB2020 last year. Republicans walked out of Oregon's Legislation session. I support HB2020 because I want a world that my Grandchildren can live in without constant weather related threats. Some Republicans agree, but they it is years away. Just look at Australia, California and even here in Oregon! I saw a recent report that says the amount of ice melting in Greenland is equal to 2,000 elephants jumping into the ocean every second.
