Dear Senators and Representatives

Please strengthen this version. It leaves so much out terms of emission reduction targets.

You are now hurting rural oregon, whereas you weren't before. You leave them out of the required actions, and the funding that would come their way.

I live in Bend, Oregon, and parts of my location are considered rural.

I think Republicans are likely to walk out anyway. Sen Tim Knopp has told some of our voters as such. In the end, is there anything that would make them want to pass this bill?

I think the better solution is to take away something from Republicans that they really want this legislative session. Or have Gov Brown threaten an executive order that targets the polluters that fund Republicans, or Roblan.

Thank you for your efforts
